INSTRUCTIONS FOR ORDERING

Write your NAME AND ADDRESS CAREFULLY—it is well to print your name. Give directions as to whether we should ship by express or freight. We pay the delivery charges on Hardy Plants, Roses and Vines, on orders of $2.00 and up, to any point within 300 miles of Boulder, but not on Shrubs, Evergreens or Trees.

"MADE IN COLORADO" STOCK

It will be to your advantage to plant our Colorado Grown Stock, as it is acclimated and suited to our climatic conditions. Our prices are as low as any, delivery will cost you little, if anything; whereas in buying from the "east" you will have to pay the express, which is now from thirty to fifty per cent higher than ever before, and will sometimes double the original cost of plants.

PRICES

Our prices are for the best stock that can be grown. The Stock is guaranteed to reach you in good growing condition. Notice OUR NEW PLAN given below, where prices are quoted for lots of TWELVE, THREE and for SINGLE PLANTS. The "twelve" prices will be allowed on six of ONE KIND. This does not mean, for instance, six Phlox assorted varieties, but six Phlox of ONE variety. Prices are for stock ordered from catalogue. Stock selected at Nursery will be charged for at its value.

A PRESENT FOR YOU

We are making you a present of TWENTY FULL pages in our Handbook. Read on Page 55 what this means—a short course in gardening. It will help you to successful gardening. It is a real present, and valuable.

OUR NEW PLAN

Many people buy one plant of a kind, which is never satisfactory, as it takes three or more plants of one sort to make any show in the garden, or to furnish enough flowers for cutting. You will be much better pleased with the plants, and will enjoy them much better, either in the garden, or when cut for the house, if you buy six or twelve of one kind, rather than buying one each of six or twelve different plants. Buy six or twelve of a few sorts this year, and then next season add six or twelve of some other varieties—in this way you will build up a garden that will afford you the maximum of enjoyment. We offer much lower prices for THREE, SIX or TWELVE plants of one sort.

OUR GUARANTEE

We send out only plants that are in a good, healthy, growing condition, and guarantee them to reach you in that condition. If you are not satisfied with them when received, write us or return them to us AT ONCE and we will send others in their place, or return your money. We do not hold ourselves responsible for your success in growing the plants—they will grow if properly planted and given reasonable care, so no complaints can be entertained unless made immediately upon receipt of the stock. See pages 55 to 58 for Planting Directions.

TERMS

Please send money-order or check with order. Customers known to us may pay for stock UPON ITS ARRIVAL. We do not carry monthly accounts, but will expect a check for any stock bought within a week of its shipment.

SIZE OF PLANTS

Many eastern nurseries send out tiny plants that have been grown in a greenhouse, cheaply produced, but not always sold as cheaply. They are so small they require expert care to make them grow, and most of them would require a year to develop into the size of the plants we supply. We send out strong, field-grown plants and they will reach you in a good growing condition, and almost without exception will bloom the first year. On most varieties we can furnish large clumps at an advanced price; prices upon application, as they will vary on different plants.
Sutherland Novelties and Plants of Unusual Merit

The next few pages are made up of NOVELTIES, and PLANTS OF UNUSUAL MERIT. While they are not all new plants, they are ALL plants of unusual merit. We are grouping them together in this way so that if you wish to have in your garden the VERY BEST garden plants, you can select from these pages knowing that you will have the best to be had. In addition you will find here a number of special offers, BARGAIN OFFERS of good standard plants, and Special offers of Groups, etc. All of these are of the best of their sorts; and all will please you.

ASTILBE

If you want something unusually beautiful, and something that is DIFFERENT, you will like our ASTILBE. Read about it on page 11.

BOUQUETS FOR WINTER DECORATION

Very attractive winter decorations may be had by cutting the following flowers and drying them, they hold their forms and colors all winter.

- Echinops
- Eryngium
- Hardy Grasses
- Limonium
- Physalis
- Tamarix (a shrub)

BUDDLEIA—Summer Lilac

One of the new plants, and properly a shrub, but as it has to be cut to the ground each spring we class it with hardy plants. It has most attractive, long racemes of the Lilac-like flowers from July almost until frost, and cannot be surpassed for cutting; is a great attraction for the butterflies. Comes from the root each year, and grows to a height of five to six feet. Allow plenty of space for it, as it makes a large shrub. Dozen, $5.00; Three, $1.40; One, 50c; Larger size, 75c.

CAMPANULA GLOMERATA

Campanula Glomerata is one of the "Blue Bell" group, and one of the finest. It can be used at the front of the border, as the foliage is only a few inches high. From June to August it has clusters of funnel-shaped violet-blue flowers on 18 inch stems. One of the best of the Campanulas.

- Dozen, $2.50; Three, 75c; One, 30c.

THE WONDERFUL NEW WREXHAM DELPHINEUM

These wonderful new hybrids were developed by a gentleman gardener of Kings Mills House, Wrexham, England, and at important flower shows have carried off the highest honors. These hybrids grow unusually tall, and have mammoth flowers in wonderful spikes, with a splendid range of color in shades of blue, pink, and shade from the most delicate to the deepest tones. The most magnificent of all the Delphineums. We are offering them at an unusually low price for such striking novelties.

- Dozen, $5.00; Three, $1.40; One, 50c.

EUPHORBIA—Milkwort

It was only last summer we recognized the importance of this delightful little flower. When called upon to take care of an important church decoration we were at a loss for a small white flower on the order of the Baby Breath to give lightness to the decorations. Looking thru our nurseries we came upon this plant in an out of the way corner; we had forgotten we had it. It grows eighteen inches to two feet high, and from June to late summer is a mass of beautiful little pure white flowers. This is the finest flower of its character we know of; and if you want a flower that will give a dainty, foamy effect to bouquets, etc., this IS THE ONE. We are going to plant it in EVERY garden we have anything to do with.

- Dozen, $2.50; Three, 75c; One, 30c.
The Most Intense Scarlet

The most intense scarlet in the floral world is found in the Geums. Geum, Mrs. Bradshaw. They are as near a "spectrum red" as is found in any flower, not the orange-red of the Oriental Poppy that jars with everything else in the garden, but a clear, bright, glowing red, resplendent in its brilliancy. If you want a most gorgeous flower; this is it.

GEUM—Avens

JAPANESE IRIS

The Japanese Iris are the most gorgeous of the Iris family, making one think of immense Orchids. They are perfectly at home in Colorado and need no special care. A rich soil and plenty of water from the time they show bud until after the blooming season being their only requirements. We offer them in a splendid assortment of colors.

WHITE, Orange center..........................40c
WHITE, blue veils..............................40c
LAVENDER and white..........................40c
DEEP blue ......................................40c
ROYAL Purple ..................................40c

Assorted colors from a fine lot of named varieties, our selection, all beautiful. Dozen, $2.50; Three, 75c; One, 35c.

KNIPHOFIA—Torchlily

A beautiful orange lily-like flower. See page 19 for general description.

HYBRIDS. Lovely new Hybrids in shades of yellow, orange and red. These have proved extremely hardy in the most severe winters. Dozen, $2.50; Three, 75c; One, 35c.

LUPINUS—Lupine

LADY STRATHEDEN. Large double flowers of a rich golden yellow. A splendid and beautiful variety that is in bloom almost all summer. Should have a sandy soil.

MRS. BRADSHAW. Large double scarlet flowers, practically an ever-bloomer; gorgeous.

ORANGE QUEEN. A new English variety, a variety with brilliant coloring intermediate between Mrs. Bradshaw and Lady Stratheden, sometimes showing orange, red and yellow in combination.

Price of Lupine, except where noted. Dozen, $3.50; Three, $1.00; One, 35c. One each of the four, $1.25; Three each, $3.50.

A FEW RARE PHLOX OF GREAT BEAUTY

Here are four new Phlox of rare beauty, recent introductions of noted European specialists.

COMMANDER. The most striking of the Phlox. Crimson red with a darker eye.

FIREBRAND. The most brilliant Phlox known, flowers brilliant orange-scarlet, almost vermilion, produced freely and throughout the entire summer. Medium height.

MRS. MILLY VAN HOBOKEN. A strong growing Phlox with very large flowerlets of bright pink, with a slight mauve suffusion. Very lovely.

PINK BEAUTY. This, in our opinion, is the most beautiful pink Phlox grown. Our color chart shows it as 'Deep Rose Pink,' the eye being "Rose Color." This does not sound unusual, but take our word for it, you will be delighted with it. There is no finer pink phlox.

Price of Rare Phlox, Dozen, $3.50; Three, $1.00; One, 35c. One each of the four, $1.25; Three each, $3.50.

Price of Rare Geum, Dozen, $3.00; Three, $1.00; One, 35c. One of each variety for $1.00.
DWARF PHLOX

AMOEBA. A little gem for carpeting the ground, for the rockery or for the front of the border, also for use over bulbs. It grows only three to four inches high, and in spring is smothered under a sheet of bright pink flowers. One of the most showy dwarf plants grown. Dozen, $2.50; Three, 75c; One, 35c.

OENOTHERA—Evening Primrose

FRASERI. Large, showy yellow flowers from June to October, a fine bright flower for a sunny spot, or on a rockery. One of our most attractive yellow flowers. Price, Dozen, $2.50; Three, $1.00; One, 35c.

PRIMULA—Primrose

"The Primrose seems the very flower of delicacy and refinement," writes Dr. Forbes Watson. It is the most exquisite of our spring flowers, in form, color and fragrance, and coming when it does, when there is a dearth of flowers, in the early spring, it is most acceptable. It should be grown in the shade, or semi-shade, in a fairly light soil, and should have plenty of moisture. It runs through a large range of colors in yellow, bronze, orange, buff, red, etc., and all of them delightful. Primroses cannot be praised too highly.

ENGLISH PRIMROSE, mixed colors. Dozen, $2.50; Three, 75c; One, 25c.

ENGLISH PRIMROSE. Special strain of large flowered sorts, in selected colors light and dark yellow, purple, lilac, pink, and crimson, all of them beautiful. Dozen, $3.50; Three, $1.00; One, 35c.

MOERHEIM HYBRIDS. A new strain of Hardy Primrose with unusual shades of yellow, orange, purple, lilac, pink, and crimson, all of them beautiful. Dozen, $4.00; Three, $1.25; One, 50c.

THALICTRUM

NOTE THIS

DIPTEROCARPUM. (Yunnan Meadow Rue). If this had a more simple name it would be in every garden, as it is a gem that has dainty, graceful sprays of violet-mauve flowers, elegantly arranged on stems four feet high, and is invaluable for cutting. You would pay $2.50 to $1.00 for a rose, and yet this will last for years without any care, and is more daintily beautiful. If not so showy. See Thalictrum, page 28 for general description. Price, Dozen, $2.50; Three, 75c; One, 25c.

I'M ALMOST AFRAID

I'm almost afraid to tell you about the Trollius, because if I could describe it as I see it I could never get any stock ahead. It is hard to propagate, but easy to grow, and no plant is more hardy and the rock garden, and TRUE BLUE is in bloom all summer. An exquisite little flower for cutting. Dozen, $2.50; Three, 75c; One, 25c.

TROLLIUS—Globeflower

Beautiful flowers, like giant double buttercups, in bright, glowing shades of yellow and orange. 18 inches. Wonderful cut flowers, unrivaled for the garden. Prefers partial shade, though at home in full sun. Give it a rich soil and plenty of water.

ORANGE GLOBE. Large double blossoms of a deep orange color, superb. Dozen, $5.00; Three, $1.25; One, 50c.

LEMON QUEEN. Large double yellow flowers. Dozen, $3.50; Three, $1.00; One, 35c.

SUPERBA. Large double deep golden yellow flower, one of the finest. Dozen, $5.00; Three, $1.25; One, 50c.

HYBRIDS in mixed colors. Dozen, $3.50; Three, $1.00; One, 40c.

VERONICA—Speedwell

The Veronicas are amongst the best dwarf and semi-dwarf perennials, and make charming bedding plants for the front of the hardy border, or to use with roses. Do not allow the flowers to go to seed and they will bloom continuously. THE FIVE MOST BEAUTIFUL ROSES

THE FIVE MOST BEAUTIFUL ROSES

The following five roses are, in our opinion, the five most beautiful garden roses grown. Each, we believe, is the best of its color. We have found that good garden varieties, strong and vigorous in growth, splendid in form of both bud and flower, and their coloring is exquisite. A proper description of their beauties would exhaust our vocabulary. You will be delighted with each one. We cannot do justice to one in less than a page.

HADLEY. The best deep crimson, deep and velvety; buds large and finely formed, a free bloomer, keeps well and has a delightful fragrance. Each, $1.00.

LOS ANGELES. Considered one of the finest roses ever introduced; growth is vigorous, flowers large, of luminous gold, the petals touched with coral, and shaded with translucent gold at the base of each petal, buds long and pointed. A lot of words, but this IS a magnificent rose. $1.00.

MRS. CALVIN COOLIDGE. A new rose with flowers of clear buff-yellow, with orange centre, and shaded with translucent gold at the base of each petal, buds long and pointed. A lot of words, but this IS a magnificent rose. $1.00.

SOUVENIR DE CLAUDIUS PERNET. The new and most famous yellow rose, awarded the Bagatelle prize. A most vigorous grower, buds long and pointed, carried on long stiff stems, very large flowers with elongated petals, color a most striking sunflower-yellow, deeper in the centre, without any color blending, and which is retained without fading in the hottest weather. The most gorgeous yellow rose. Strong two-year plants. $1.00.

NEW HYBRID VARIETIES OF VIOLA

These two Violas are hybrids and are lovely little flowers, like giant Violets in form, almost as large as pansies. They are hardy, being true perennials, and will last in your garden many years, becoming more beautiful each year. They should be grown when there is a dearth of flowers, in the early autumn, it is most acceptable. It should be grown in the shade, or semi-shade, in a fairly light soil, and should have plenty of moisture. It runs through a large range of colors in yellow, bronze, orange, buff, red, etc., and all of them delightful. Primroses cannot be praised too highly.

G. WERMIG. A wonderful variety of the Tufted Pansy, with the true Violet form, of a rich deep violet blue, forms large clumps, and is in bloom all summer. An exquisite little flower for cutting. Dozen, $2.50; Three, 75c; One, 25c.

JERSEY GEM. A deep purple and the finest we have seen. The flowers are a deep purple, almost as large as a small pansy, sweetly perfumed, and the growth is vigorous and the plants form large bushy clumps. It cannot be praised too highly. One of the most beautiful of the newer flowers; we consider it a 'Gem' in every particular, and we have lowered our price this year to place it within the reach of every one. Dozen, $3.00; Three, 85c; One, 30c.

The Beautiful Paul Neyron Rose. See page 28.
SOUVENIR DE GEORGES PERNET. The general effect is a deep, glowing, reddish pink, impossible to describe, but a wonderfully beautiful rose, the most admired of all the roses in our show garden last summer. A rose that is unequalled in color by any variety. It has long pointed petals, orange red, edged with carmine, and suffused with a rich golden sheen, a strong, vigorous grower and a profuse bloomer. $1.25.

ONE EACH OF THESE FIVE MAGNIFICENT ROSES FOR $4.50, delivered anywhere within a thousand miles of Boulder.

VINES
BLUE MORNING GLORY
You have probably seen this magnificent Morning Glory here and there throughout the state in some old-fashioned garden, and have wished that you might have it in your own garden. It has been hard to obtain as seeds grown in California (where most of our garden seeds are grown) make plants that come into bloom too late. Our seeds are COLORADO-GROWN, and if planted early will bloom in early summer, and from then until frost. They are much like flowers of the richest sky-blue, the most gorgeous climbing flower you have ever seen. Per package, 25c.

WISTERIA—Wisteria
WISTRIA THAT WILL BLOOM
Very few Wisterias have bloomed in Colorado. Our grafted plants will insure bloom. You can now have the Wisteria in YOUR garden.

Unquestionably the most beautiful of all hardy climbers is the Wisteria. The beautiful long racemes of lovely lavender-blue flowers appear in all scenes of Japanese gardens and temple grounds; and in Japanese paintings and embroideries the Wisteria is always to be found. In addition to their beauty the flowers are also delightfully fragrant. Most people have the impression that the Wisteria takes many years to come into bloom, and propagated in the usual manner they frequently do not bloom at all. We have found that by grafting from flowering vines plants can be secured that will bloom soon after planting, frequently the first year. Last year we had some in our nursery that were only a year from the graft, the vines only a few feet long, and yet they had quite a quantity of bloom. They should be planted where they have something to climb on immediately, and in the grafted plants, it is well, with plenty of thoroughly rotted manure spaded in, and plenty of moisture. Our grafted plants, given this care, will delight you. Plant where they do not have the sun too early in the spring, as they bloom early. Set so the graft is three inches below the surface.

BLUE WISTERIA. Strong grafted plants that should bloom this year, $1.00; Extra strong plants, $1.25.

SILVER LACE VINE
The Silver Lace Vine is the BEST vine for most purposes. It is a rapid grower, hardy, a free bloomer, good foliage—everything you could ask for in a vine. Read about it on page 34.

BEAUTY BUSH
(Kolkwitzia amabilis)
One of Wilson's greatest introductions, and one of the most beautiful shrubs ever introduced into our gardens.

This is the most beautiful shrub of recent introduction, introduced from the wilderness of China.

It grows to a height of six feet or more, erect in habit, and its long arching branches are covered in spring with clusters of small, tubular flowers, much like the honeysuckle, bright pink in color, and are borne in such profusion that the bush is one cloud of beautiful pink. Nothing like it has been produced.

Strong field-grown plants, 2-year, Each, $1.50. Extra strong 3-year field-grown plants, Each, $3.00.

EUONYMUS
THE EUONYMUS are our most beautiful shrubs for fall color, in both foliage and berry. Read about them on page 37.

SOUVENIR DE GEORGES PERNET. The grand bush honeysuckles are amongst the finest of our large shrubs, and Maacki is the finest of them all.

THE MOST BEAUTIFUL HONEYSUCKLE
MAACKI. (Amur Honeysuckle). This grand bush honeysuckle grows to a height of 16 feet, and is covered with trumpet shaped white flowers in spring, followed by bright red fruits that remain on the bush all winter. The most attractive of the Bush Honeysuckles. Each, $1.00; Dozen, $10.00.

PHILADELPHUS—Mock Orange
For general description see page 38.

FOUR SPECIAL PHILADELPHUS
Here are four unusually beautiful Mock Oranges. You will find them splendid additions to your flowering shrubs.

SOULE DE ARGENT. A variety of moderate growth, where Coronarius would be too large, smothered with large white flowers. The most double of any variety.

BANZIERI. A tall variety, with long branches covered with a profusion of semi-double flowers. Very beautiful.

MONT BLANC. A delightful dwarf variety, with large fragrant flowers produced in great abundance.

NIVALIS. The stamens of this variety are cream-colored, making the effect of the flowers snowy white. A fine variety.

Price of the four novelties, large, strong bushes, 4 to 5 feet in height, each, $1.00; one each of the four for $3.50.
THE MOST BEAUTIFUL MOCK ORANGE

**VIRGINAL.** This is the most beautiful of the Mock Oranges, is a novelty just introduced within the last few years. It is also the finest new shrub introduced in this country. The flowers are large, pure white, double, and very sweetly scented. No finer flowering shrub can be had. We paid $3.50 for one plant only a few years ago, and are now offering them at $1.00. There is nothing in the shrub line more beautiful in its flowers. If I could only have one flowering shrub, I believe my choice would be Philadelphus Virginal. Each, $1.00; Dozen, $10.00. We have some extra large plants at $1.75 and a few very large ones at $2.00.

**THE BEST PINK FLOWERED SHRUBS**

Pink Flowering Shrubs are not often seen in our gardens, which is a great pity, as they make wonderfully beautiful effects at a time when flowers are not in season. The Double Fink Flowering Plum and the Double Pink Flowering Plum are both very lovely, and can be grown successfully in any sunny spot. These are all grafted plants, and should be planted with the graft three to four inches below the ground, which will prevent suckers coming from below the graft and cut off close to stem. If allowed to grow they will kill the plant. See "PRUNUS" page 38.

**PEARL BUSH**
The Finest of the White Flowering Shrubs

This is a shrub we have not considered as hardy in Colorado, but we have discovered that after it becomes established it is perfectly hardy. Last spring it attracted more attention than any shrub we had on the place, when it was literally smothered with dazzling white flowers. No other white flowering shrub approaches it. Most distinct. Good strong stock. $1.25.

**ARISTOCRATS OF THE GARDEN**

"Chinese Wilson," the man who has hunted the world over for new plants, and who has introduced so many of our new garden aristocrats, puts the Sorbarias in this class. If you do not know them, you are missing some of our most beautiful shrubs. They ARE "aristocrats." See picture below.
SORBARIA—False-Spiraea (3)

Until recently these were classed with the Spi- receas though they are quite distinct both in flow- er and foliage. All have attractive foliage, resemble- ing the mountain Ash—such as Aupeoaria—from which they take their name. These plants are tall and slender with handsome fern-like leaves, and beautiful white flowers. Aitkinsoni should be used towards the back of the shrub border and Sorbobilla stellapeda about the center.

Aitkinsonia. A tall variety 5 to 6 feet with foliage finely-divided like a fern, and large pan- nicles of double foamy-white flowers. A most beau- tiful shrub. Each, $1.00; Dozen, $10.00.

Sorbobilla stellapeda. A new variety and a great improvement on the Sorbobilla (this we do not list); the foliage is attractive, much like Aitchisoni, dwarfer in habit, and has immense pyramidal panicles of white double flow- ers. One of the most attractive shrubs we know of: know of enough to catalogue it. Scarce. Special price to introduce it. Each, 50c; Dozen, $5.00. Extra large plants, Each, 75c; Dozen, $8.00.

THE SHOWIEST HARDY FLOWERING SHRUB

We have catalogued this shrub for many years, simply listing it with others; and we find that very few people know it. It is catalogued under the name of Syringa Villosa, or Late Lilac. It makes a tall tree-like shrub, and is frequently found for this in every garden. There is no other Juniper. If you want the RAREST and PFITZER JUNIPER is another beauty taller and foliage. All have attractive foliage, resem- bling the Cut Leaf Weeping Birch. A place can be found for this in every garden. There is no other Juniper. If you want the RAREST and PFITZER JUNIPER is another beauty taller and foliage. All have attractive foliage, resem-

TREES

THE MOST BEAUTIFUL TREE

The most beautiful garden tree is, in our esti- mation, the Flowering Crab that is not grafted. A place can be found for this in every garden. There is no other Juniper. If you want the RAREST and PFITZER JUNIPER is another beauty taller and foliage. All have attractive foliage, resem-

NEW FLOWERING CRABS

Do not overlook the lovely new Flowering Crabs offered on page 52. They are amongst the finest of the newer flowering trees.

A BARGAIN OFFER OF ONE OF OUR FINEST FLOWERING CRABS

The Flowering Crab, Sieboldi Calocarpus, is one of the finest we have had. It is the only Flower- ing Crab that is not grafted. We were so taken with it that we planted a large quantity a few years ago; and we wish you to have the advan- tage of this tree stock. Owning to the fact that it is not grafted we can grow it more cheaply than we can the other varieties. The flowers are semi-double, pink and white, fragrant, and it has large scarlet fruits. One of the best.

- 4 to 5 foot trees........................................... $1.25
- 5 to 6 foot trees........................................... 1.50
- 6 foot and over........................................... 2.00

These prices are the lowest at which we have seen Flowering Crabs offered. No finer stock is grown anywhere.

AN OUTSTANDING FLOWERING CRAB

Among our New Introductions, the flowering crab, ALDERHAM CRAB, is one of the most attractive. First time, is of unusual beauty. The branches are pendulous, the flowers are red, the best red to date, and the fruit is later than any other. This vari- ety it is particularly useful in the making of a group for an extended period of bloom. Although this is a novelty, offered for the first time, we are making a moderate price on it. Good, strong trees, Each, $2.50.

A SPLENDID STREET TREE

For a splendid street tree see Aecer Platanoideas, in our Tree Department.
The Hawthorns and the Flowering Crabs are two other splendid parking trees. For a narrow parking there is nothing comparable to our New Moline Elm. See page 51.

TREES OF UNUSUAL BEAUTY

In our general list of trees, page 48, and flow- ering trees, page 51, are some trees of unusual beauty. As there is not enough room amongst our novelties, etc., for full descriptions of them we will simply name them, and you can then read about them in our regular tree department. Each of these we would class as ARISTOCRATS OF THE GARDEN.

CUTLEAF WEEPING BIRCH.
PURPLE LEAF WHITE BIRCH.
CHINESE ELM.
HAWTHORNS.
FLOWERING CRABS.
DOUGLAS PEAR.

ARISTOCRATIC EVERGREENS

We wish to call your attention particularly to our Evergreens, the most complete stock of Colo-rado-grown evergreens in the state. Amongst the New Introductions, the flowering--

THE SHOWIEST FLOWERING CRABS

Aldenham, Dolgo, Hopa, Prunosa. See our New Moline Elm. See page 51.

SOME UNUSUALLY FINE FRUITS

Some unusually fine fruits are NEWPORT PLUM and PRUNUS TOMENTOSA, found under the heading of FRUITS, with our FLOWERING TREES. As the same department are to be found, with the Flowering Crabs, DOLGO CRAB and HOPA CRAB, and at the same price under the heading of TREES.
ARISTOCRATS OF THE GARDEN

With a great deal of pleasure we have been reading Chinese Wilson’s book: “Aristocrats of the Garden.” Mr. Wilson has been an “earth-girdler” in the interest of America’s greatest garden, the Arnold Arboretum; and has introduced many thousands of new plants. In his new book he describes what he considers to be the “Aristocrats of the Garden.” Many of these we list in our Garden Handbook. If you wish some of the best of the garden flowers, shrubs, vines, etc., and are not very familiar with garden plants, you may select from any of the list we give below. While all of these are not included amongst Mr. Wilson’s “Aristocrats,” they are all varieties that are unusually beautiful and that will ornament any garden.

ARISTOCRATIC FLOWERS

Anchusa Myosotidiflora, Aquilegia, Artemisia, Astilbe, Campanula—especially Glomerata, Corresponsis, Hardy Chrysanthemums, Delphineum, Hardy Pinks and Carnations, Eulalia-Hardy Grasses, Geum (gorgeous), Helium, Hemerocallis (our favorite yellow flower), Kniphofia, Lilies, Lilium, Lupine, Myosotis, Oenothera, Peony, Pentstemon, Phlox, Aster, Balsam, Ceanothus (one of the gems), Salvia, Scabiosa, Shasta Daisy (the more uncommon sorts), Early Gem for May, Aster, and Octoberum, and many others. Trollius, Veronica, Viola (especially G. Wermil and Jersey Gem), Iris Ochroleuca Alba and Orientalis.

ARISTOCRATIC SHRUBS

Acer Ginnalla, Red Barberry, Buddleia, Cydonia (especially our new hybrids), Euonymus, Hydrangea, Lonicera Mackii (an outstanding sort with red berries), Philadelphia Coronarius and Virginal, Flowing Almond and Flowering Plum (Prunus Glandulosa and Prunus Triloba), Rosa Rubrifolia, Lucida Alba and Spinosissima, Sambucus Austrophylla, Spiraea Multiflora, Pink Spiraeas Froebelli, Douglasia and Margaretiae, Sorbaria, Syringa-Lilac Villosa, French Lilacs Mme. Casimir Perler and Lydia Spaeth, Tamarix Pentandra, Physocarpus Monogynus, all the Viburnums.

ARISTOCRATIC TREES

Cut Leaf Weeping Birch, and for flowering trees, all the Hawthorns and Flowering Crabs.

CREeping PLANTS FOR GROUND COVERS, ETC.

Ajuga, Arabis, Cerastium, Dianthus Deltoides, Lysimachia, Myosotis, Phlox Subalata and Amanoa, Saponaria, Sedum (dwarf varieties), Thymus, Viola, Vitis, Vinca.

ARISTOCRATIC VINES

Trumpet Creeper, Bittersweet, Scarlet Clematis, Chinese Evergreen Honeyuckle, Silver Lace Vine, Grapes, our GRAFTED Wisteria.

SOME OF THE BEST CUT FLOWERS

Achillea, Aster, Bellis, Bupleurum, Canterbury Bells, Clematis-Vine, Corresponsis, Delphinium, Chrysanthemum, Dianthus, Filipendula, Galillardia, Geum (keeps a very long time), Helium, Hemerocallis, Iris, Lilies, Lilium, Lupine, Myosotis, Peony, Penstemon, Phlox, Aster, Balsam, Ceanothus, among the shrubs the following are unusually good: Amelanchier, Buddleia, Lonicera, Philadelphus, Prunus, Roses, Sorbaria, Tamarix, and of course—Lilacs.

THE BEST BERRIED SHRUBS

Barberry, Cornus, Euonymus, Ligustrum, Lonicera, Rosa, Rhus, Snowberry, Viburnum; amongst the trees: Hawthorns, Flowering Crabs, Mountain Ash.

THE BEST SHRUBS FOR FALL COLORS

BEST TREES FOR FALL COLOR

Acer Ginnalla, A. Saccharum—Sugar, Maple, Skippers C. L. Maple, Betula, Fraxinus, Juglans, Quercus, all the Hawthorns, all the Prunus, all the Flowering Crabs, all the Prunus, Sorbus.

You will find all of the above Aristocrats and Special Plants listed in their proper alphabetical order.

THE BEST PLANTS FOR ROCKERIES

Achillea Tomentosa, Ajuga, Anchusa Myosotidiflora, Aquilegia, Arabis, Ajuga, Carpathia, Campanula Garganica, Cerashtium, Dianthus Deltoides, Dianthus, Frangipani, Heuchera, Lilium, Lonicera, Myosotis, Oenothera, Physostegia, Prunus, Rosa, Rhus, Sorbus, Syringa-Lilac Villosa, French Lilacs Mme. Casimir Perier and Ludwig Spaeth, Tamarix Pentandra, Physoscarpus Monogynus, all the Viburnums.

WILD FLOWERS

For the Shady Corner

Every garden has a shady corner that is usually a problem; when it might easily be the most valuable asset of the garden. The most beautiful spot in my own garden is a shady corner of Ferns, Columbine, English Primroses, Forget-Me-Not, and Wild Flowers. Prepare such a corner by throwing deep, in the fall, old leaves and manure about two feet below the surface for drainage; then work in all the dead leaves you can find, and, if possible, mix in some leaf mould towards the surface. Leaf mould is simply rotted leaves, which you can prepare by burying the leaves from your garden, and keep them wet so that they will rot. Holland Peat helps make ideal conditions. We can supply it. We have gathered together a number of wild flowers, ferns and other flowers that are suitable for the shady corner, list same below.

This is the way to prepare such a bed; but if you do not wish to go to so much trouble simply see that it has good light soil, and spade it up well with some very old, well-rotted cow-manure. My own “shady corner” did not have any elaborate preparation, and it’s hard to beat.

Aconitum

Ajuga

Aquilegia

Aster

Bells

Big Horn Hot Springs State Reserve, Thermopolis, Wyoming.

Regarding the nursery stock that we bought of you last spring for our new park: We are well pleased, every item was up to specifications, and better yet, every one grew, which I consider a splendid record when we take into consideration that there was over a thousand items in the order.

Yours very truly,

J. F. DIVINE, Superintendent.

Eaton, Colorado.

I have gone over the shrubs and trees you planted last spring, and do not find over a dozen dead in close to thirteen hundred planted, which is a real record.

Yours truly,

BRUCE G. EATON.
## Bargain Offers

We are making a few Bargain Offers for the amateur gardener who is at a loss as to what to select from long lists. These are all from our best stock, selected from our named catalogue varieties; and are plants that will please you. Cash must accompany order. **THE SHRUBS ARE ALL EXTRA Sized Stock.** Solicitors would ask you $1.00 to $1.50 each for them.

### SPECIAL DOLLAR COLLECTIONS

These collections are all made up from our regular named varieties (as they appear in this catalogue). The varieties will be selected by us, and no changes will be made. You would probably select many of these in making up your order.

- Five Choice Chrysanthemums, all different.
- Five Choice clove-scented Pinks.
- Four Selected Hardy Ferns, all different.
- Five Beautiful Day Lilies, all different.
- Twelve Pine Iris, all different.

**LOOK FOR OUR SPECIAL PEONY OFFERS.**

Page 22.

Note our special Phlox offer, page 23.

- Five Black Eyed Susan.
- Five Shasta Daisy. Early Gem, May Queen or Articium, five of ONE variety.
- Five Correopsis Lanceolata. Large clumps.
- Five Campanula Glomerata.
- Six Hardy Forget-Me-Nots.
- Six Veronica Spicata.

Any one of these Collections, large, strong plants, mailed to your address for $1.00, five selections for $4.00. No changes in assortments permitted.

### THREE MAGNIFICENT HYBRID PERPETUAL ROSES

These will be our selection of three different roses from the list of six given on page 28 of THIS SUTHERLAND LANDSCAPE AND NURSERY COMPANY. They are all CHOICE Roses, regular price 75 cents each. **Bargain Price, the three for $1.50.**

**NO CHANGES WILL BE PERMITTED IN THESE SPECIAL OFFERS.** At the prices quoted the stock will be carefully packed and delivered to the express company.

---

### Be Sure You Read This

#### SOME USEFUL BOOKS FOR THE AMATEUR GARDNER

- **HOW TO GROW ROSES**, by Pyle, McFarland and Stevens. Makes every step in the culture and care of Roses so clear that any one can understand it and succeed with them. 211 pages, 138 illustrations, including 45 varieties illustrated in color. America’s most popular rose book. $2.00, postage 12c.

- **HOW TO LANDSCAPE YOUR GROUNDS WITH EVERGREENS**, A small, illustrated booklet, telling how to plant evergreens, and how to use them effectively. Free to our customers.

- **A CONFIDENTIAL TALK ABOUT YOUR GARDEN**, A twenty-four page booklet describing, and showing pictures of many of the Colorado gardens we have planned and planted. It gives the reasons for planning even the smallest garden, and tells how the plans are made and executed. The editor of BETTER HOMES AND GARDENS says of it: “It is the most outstanding thing of the kind I have seen.” Price 25c. Free, if you own your own home and contemplate making a garden. It is also free to ALL of our customers.

The preparation of the ground, planting, pruning and the general care of Trees, Shrubs, Plants, etc., is gone into very thoroughly in the article “A PRESENT TO THE GARDEN OWNER,” beginning on page 55. This is of great value to you. Be sure you read it.
Buy From Our Handbook

IT IS THE IDEAL WAY

Buy from our Handbook. It is the ideal way. You can buy to better advantage this way than from a solicitor, or even at the Nursery itself. Read the reasons given below and you will agree.

Buying From The Solicitor

Solicitors may have their place; but usually they do not have the information concerning the plants you should have, nor the time to give it to you. Then, too, their prices are necessarily higher; it costs more to sell that way.

Seeing The Plant In Bloom

At first thought it would occur to you that seeing the plant in bloom would be the best means of getting acquainted with it, and of course it is interesting to see it first-hand; but that is not the best way to learn about it. Spend your odd moments reading our Handbook and you will learn more about plants and their habits than you would by visiting all the nurseries in the country.

Some Things You Should Know Before Buying

Do you know how to prepare the ground for planting? Do you know how to plant? Do you know how to care for the plants after they are planted? Do you know the various requirements of the individual plants? Only expert gardeners do; and the solicitor or the man at the nursery does not have time to give you a course in Gardening. Our Handbook does just this. See page 55.

Why Do We Use Botanical Names? There Is A Reason

On page 57 you will find a full explanation as to why we use Botanical Names. There is a reason—and you should know it.

The Truth About Flowers

Most catalogues tell the truth, but all do not tell the “Whole Truth.” We have tried to do that; and to the best of our knowledge have done so. If a plant has a bad habit, we tell it. If it has some individual requirement we tell that, also. Many plants, good in their way, may not be suited to your garden, or for your particular needs. Our Handbook will help you decide that.

Buy At Your Leisure

You buy at your leisure from our Handbook. There are only twenty-four hours in each day, and at the busy season the nurseryman needs thirty; so, if you buy at the Nursery no one has time to give you the information about the plants that you should have. Our Handbook tells you everything you need to know about the plant; and you can sit down quietly, at your leisure, and select what you need, not what someone thinks you should have. Our stock is carefully packed; and is delivered to your door without any effort upon your part.

Why You May Depend Upon The Plants We Offer

For nearly twenty years the writer has been planning and personally superintending the planting of many of the largest Colorado Gardens. These gardens have been under his personal observation for two to five years after they have been planted, so that he has had an opportunity of seeing just what the various plants would do under our climatic conditions in the ordinary city garden.

Although we offer a very large assortment, the varieties are all of merit, and adapted to our conditions; and each year we are trying out the new varieties and offer them for sale only when we are convinced that they are worthy of a place in our catalogue. You can depend upon what we offer.

We have twenty-two acres of Made-in-Colorado Plants for you to select from. They are hardy, grown here, and adapted to our conditions.
Sutherland Hardy Perennial Plants

ACHILLEA—Yarrow
Mostly robust growing plants that should not be planted with other perennials, as they tend to crowd the others out; plant with shrubs, or where they have plenty of room to spread. The Pearl and Perry's White are particularly fine for cutting.

PILAFENDULA. This is a most picturesque plant; we did not think much of it at first; it seemed rather coarse, however, as the season went on, we were quite impressed with it, as it stood out in a bold way that was quite striking. We expect to use it in our gardens wherever we want a bold, striking plant. Plant it with the shrubs for best effects. Height about three feet, lacy-like foliage and flat heads of bright yellow flowers from June to September. Dozen, $2.50; Three, 75c; One, 25c.

THE PEARL, Large sprays of handsome white rose-like flowers. Dozen, $2.00; Three, 60c; One, 25c.
PERRY'S WHITE. A choice new variety with flowers much larger than The Pearl. Dozen, $2.50; Three, 75c; One, 25c.
TOMENTOSA, A good dwarf plant with yellow flowers in June, 6 to 12 inches, does well in any soil, but seems to be at its best in dry, rocky soil; a splendid rockery plant.
Price of Achillea, except where noted, Dozen, $2.50; Three, 75c; One, 25c.

ACONITUM—Monkshood
Think of the most intense blue you have ever seen and you will have the blue of the Monkshood. These are adaptable flowers, doing well in either sun or shade. They are summer and autumn bloomers with spikes of beautiful flowers somewhat on the order of a giant Snapdragon.
FISCHERI. (Azure Monkshood). Dwarf, 18 inches, pale blue flowers in September.
SPARKS VARIETY. See NOVELTIES, page 1.

AJUGA—Bungle
A most useful as well as a good flowering plant. Genevensis makes a good cover for Lilies and other Bulbs; and is a useful edging plant. Repens is one of the best ground covers we have, and will grow where it is difficult to establish grass. It is a splendid plant for covering bare spaces amongst shrubs, but should not be used amongst any but the strongest growing perennials, as it would soon run them out.
GENEVENSIS, Six to eight inches high, dense spikes of blue flowers.
REPTANS. Three to four inches, with deep purple flowers.
Price of Ajuga, Dozen, $2.50; Three, 75c; One, 25c.

ALTHEA—See Hibiscus

ANCHUSA—Bugloss
ANCHUSA. (Bugloss). Giant Forget-Me-Not. Real blue flowers are scarce; here are some of the best, the foliage is rather coarse, and they should be planted amongst shrubs, where their intense, sky-blue flowers show up to advantage; height about three feet, and blooming in May and June.
DROPSMORE VARIETY. Rich gentian-blue flowers.
OPAL. Splendid large flowers of a lustrous light blue.
Price of Anchusa, Dozen, $2.50; Three, 75c; One, 25c.

WHAT'S IN A NAME?
"Giant Forget-Me-Not" would attract but ANCHUSA MYOSOTIDIFLORA- well, lots of people would be afraid to try and pronounce it, and lose interest.

AQUILEGIA—Columbine
The Columbine, our state flower, is too well known to need description. Few, however, are acquainted with the beauties of the new hybrids; they come in the most delicate shades of pink, blue, yellow and white. Try a few. You will be delighted with them. Fine for cutting. Two feet. June to August.
COERULEA. Our beautiful native blue and white Columbine. Dozen, $2.00; Three, 60c; One, 25c.
CHRYSANTHA. A golden yellow everblooming variety.
CHRYSANTHA ALBA. A pure white flower.
ANEMONE—Anemone

CANADENSIS. A splendid white flower from our eastern "woods." One foot in height, bearing a profusion of pure white flowers in June and July. Makes a beautiful effect amongst the shrubs; good for cutting. Dozen, $2.50; Three, 75c; One, 30c.

JAPONICA. (Japanese Anemone). One of the best of the late summer and fall flowers, in bloom from August to November. Should have a rich soil, and be left undisturbed, as the flowers increase in size and beauty each year. Makes a lovely effect when planted with ferns, and does well in sun or shade, but must be kept moist. We have it in a pure white and a delicate pink. Dozen, $3.50; Three, $1.00; One, 40c.

ANTHEMIS—Camomile

This sounds like medicine, but it is an attractive, golden-yellow, daisy-like flower, about fifteen inches tall, and in bloom most of the summer. Palastrai points a moral in the "lovely camomile."

KEW’S CAMOMILE. A much improved variety introduced by one of the famous English hybridizers; splendid golden-yellow, daisy-like flowers. Dozen, $3.50; Three, $1.00; One, 40c.

ARABIS—Rock Cress

The most delightful of our early spring flowers; coming into bloom before the snow has gone. We have seen it buried beneath a foot of snow and coming up fresh as a daisy. A mass of pure white flowers all spring. Six inches. A splendid ground cover to cover Lilies, Narcissus, Tulips, etc. Price, Dozen, $2.50; Three, 75c; One, 30c.

ARUNDO DONAX—See Grasses

ARMERIA—See Statice

ARTEMISIA—Wormwood 

See NOVELTIES, page 1.

ASCLEPIAS—Butterfly Flower

TUBEROsa. Showy umbels of brilliant orange flowers in July and August, 2 to 2 1/2 feet. To be at its best should be in a sandy soil and a warm location. Price, Dozen, $2.50; Three, 75c; One, 30c.

HARDY ASTERS—Michaelmas Daisy

For fall effects the Aster is one of our most attractive hardy plants; it has wonderful masses of bloom in September and October; in shades of white; pink, lavender and purple. Combined with Boltonia, Artemisia, Golden Rod and Helium, it is quite gorgeous. Novi Belgi varieties may be grown in partial shade. Others should have full sun. They should be divided and replanted every two to three years. Do not confuse these with the annual astra which they are in no way similar. ELFA. A new variety with large semi-double flowers of deep lavender, one of the brightest colors, and a splendid keeper when cut. LADY LLOYD. Another new variety with fine clear rose pink flowers, lasts well.

MAID OF COLWELL. The finest pure white, long, loose spikes of large flowers.

NOVA-ANGILLAE. A tall sort with deep purple flowers, the Elk Color.

NOVA-ANGILLAE ROSEUM SUPURBUM. A splendid large flower of a very deep shade, almost red.

NOVI-BELGI CLIMAX. We have discontinued this, as it is subject to disease.

LILY FARDELL. A tall growing sort with very large pink flowers. Next to Barr’s Pink, the best pink.

PERRY’S WHITE. One of the finest white Asters introduced, perfect in habit, and very free flowering, stout stems, well-branched covered with pure white flowers, 2 1/2 inches across.

ST. EGWIN. The need for a dwarf Aster of good form and color has been felt; we have it in St. Egwin; it is a pleasing shade of rosy pink (not magenta) and makes a striking effect in the garden, as it bears a multitude of flowers. Dozen, $3.00, Three, $1.00; One, 35c.

Price of Asters, except where noted, Dozen, $2.50; Three, 75c; One, 30c. One each of the eight varieties for $2.00.

THREE NEW ASTERS OF RARE BEAUTY

BARR’S PINK. A strong vigorous grower, four to five feet, and the finest bright pink of any aster yet introduced.

MONS. A bright reddish violet, very showy, but refined, particularly useful in fall bouquets. Dozen, $3.50; Three, $1.00; One, 40c.

QUEEN MARY. The best blue aster to date, awarded a certificate of merit by the Royal Horticultural Society of England, flowers of a pleasing blue, tinted lavender, 3 1/2 feet, one of the best for cutting.

Price of the two novelties, Dozen, $3.50; Three, $1.00; One, 40c; One of each for $1.00.

SOMETHING NEW

Do not overlook reading about our Astilbes.

ASTILBE

If you want something different, and at the same time beautiful, try a few of our new Astilbes. These are the beautiful pink and white flowers sold by the florists at Easter; but they are just as much at home in the garden. They do well in either sun or shade, but are at their best in partial shade, and though they are at home in any good garden soil they will grow much more luxuriously in a rich soil with plenty of water. No garden flower we have is more dainty or beautiful. 2 to 3 feet, June and July. For good results large three year clumps are the best, and these are what we offer.

GLORIA. Brilliant dark pink, shaded lilac.

PINK PEARL. Delicate pink.

VESTA. Lilac rose.

Price of Astilbe, 75c.
BABY BREATH
See Gypsophila, Euphorbia and Limonium

The true Baby Breath is Gypsophila, but there are several other plants with flowers of a similar character that are useful for giving a dainty, fairy lightness to bouquets. Here are those. They are: Euphorbia, Gypsophila, Limonium. You will find these listed in their proper alphabetical order. Artemisia Silver King and Thalictrum have foliage that is unequalled for use with these, and the Thalictrum blossoms are in a class with the Baby Breath.  

BAPTISA—Wing Indigo

AUSTRALIS. Dark blue pea-shaped flowers in June; both foliage and flowers are attractive. 2 feet. Dozen, $2.50; Three, 75c; One, 35c.

BERGAMOT—See Monarda

BLEEDING HEART—See Dicentra

BOCCONIA—Plume Poppy

CORDATA. “A noble hardy perennial, beautiful in foliage and flower, flowers creamy white, growing 6 to 8 feet, adapted for planting in shrubbery, etc.” This is the description I read in most catalogues. It’s a good plant, if you like it; I don’t think much of it, but we have some for sale. Dozen, $2.50; Three, 75c; One, 35c. They are really not worth it, but it costs money to handle them.

BOUQUETS FOR WINTER DECORATION
See NOVELTIES, etc., page 1.

DO YOU LIKE BLUE FLOWERS?

Good blue flowers are scarce; the Campanulas are amongst the best. Do not overlook them.

CAMPANULA—Bellflower

Beautiful bell-shaped flowers with great variety of height, form, and color. flowers, a year long, are used almost every day in bouquets. They may be divided and grown in a pot of soil, then transplanted in spring. Plant in spring or fall, in full sun. Dozen, $2.50; Three, 75c; One, 35c.

CAMPANULA—Gloriosa

See NOVELTIES, etc., page 1.

CAMPANULA MACRANTHA. Enormous drooping bells of fine satiny lilac and deep purple shades. June and July. 3 feet. Dozen, $3.50; Three, $1.00; One, 40c.

CAMPANULA COERULEA. A beautiful bluebell, with pale blue flowers in June and July. 2½ feet. Dozen, $3.50; Three, $1.00; One, 40c.

CAMPANULA MEDIUM (Cup and Saucer Canterbury Bells). The best known of the Campanulas, and the showiest. Pink, White, Blue, 2 to 3 feet. Dozen, $3.50; Three, $1.00; One, 40c.

The Dainty Boltonia

BOLTONIA—False Camomile

Very showy flowers resembling the Hardy Aster, but blooming earlier, furnishing the garden with a sea of bloom during the late summer and early autumn months. Fine for cutting. Asteroids combines well with Salvia Azurea and Helianthus; also with the Hardy Sunflowers.

ASTEROIDES. Pure white, five feet.

ASTRAGALUS. Light pink, four feet.

ASTRAGALUS NANA. Every one who is familiar with the Boltonia has wished for a variety that did not grow so tall, so that it might be used towards the centre of the border, where a real tall plant would be out of place. We now have it in this new variety, a semi-dwarf plant, 18 inches to 2 feet, has all the delightful qualities of the taller sort.

Price of Boltonia. Dozen, $2.50; Three, 75c; One, 35c.

BUDDLEIA—Summer Lilac

See NOVELTIES, etc., page 1.

CHELONE—Shell Folwer

Handsome fall-blooming plants with bright pink flowers somewhat on the order of Snapdragons, but much larger. Dozen, $2.50; Three, 75c; One, 35c.

CLEMATIS

CLEMATIS ERECTA. A fine new plant for the Hardy Border, grows 3 to 4 feet in height and has the same delightfully fragrant flowers of the popular Vine. Clematis Paniculata, blooms in June and July, and is a plant amongst the finest of our blue flowers. Dozen, $4.50; Three, $1.00; One, 35c.

COREOPSIS—Coreopsis

LANCEOLATA. A very showy summer-blooming plant, with masses of flowers like giant Golden Marguerite. Splendid for cutting. Two feet. Dozen, $2.00; Three, 60c; One, 25c.
Coreopsis—Like a Golden Marguerite

CHRYSANTHEMUM COCCINEUM

PAINTED LADY—Formerly Known as PYRETHRUM

A beautiful garden flower, much like the Shasta Daisy, but more loosely constructed, and in shades of pink, red, white. Give it a rich soil and plenty of well rotted manure. See illustration on page 14. Dozen, $2.50; Three, $1.00; One, 35c. Red, Dozen, $3.50; Three, $1.00; One, 40c.

CHRYSANTHEMUM ULIGINOSUM

Formerly known as Pyrethrum Uliginosum. Symmetrical plants, about three feet in height. They are covered with large white daisy-like flowers, three inches in diameter, from July to September. Fine for cutting. Dozen, $2.50; Three, 75c; One, 30c.

“MUMS” THE WORD

“Mums” the word when you want some brilliant color in your Fall Garden. Plant Sutherland Hardy Mums—Chrysanthemums; in spite of early frost you should have flowers three to four years out of five.

HARDY CHRYSANTHEMUMS

We had an unusually early fall in 1929, but in spite of that Carmelite, Comoleta, Eva and Tints of Gold bloomed to perfection. The other varieties were in bloom when the freeze came. We picked some of them, and put them in water in a cold cellar and had good flowers for the table Thanksgiving Day.

This is the choicest of our Hardy Fall Flowers, coming after most flowers are gone, and again furnishing us with a wealth of color. Some varieties start blooming early, and continue until cut down by heavy freezes. Eva is in bloom in September, Carmelite, Canary Bird and Bronze Beauty in October, and all the varieties we offer can usually be depended upon to bloom before the heavy freezes. The early frost, unless accompanied by a freezing snow, will not injure them; and if a heavy freeze occur a slight protection for a few nights will assure bloom. Nothing finer for cut flowers. Don’t fail to plant some “Mums.” We send out strong plants that will bloom this season.

These Chrysanthemums may be potted up and taken into the house in September, and make the finest kind of pot plants.

Sutherland’s Hardy Chrysanthemums

BRONZE QUEEN. A striking shade of bronze, one of the hardiest, and a sure bloomer. Button Variety. We have a lot of these and will make you a special price of six for $1.00, twelve for $1.75; large plants.

MARIE ANTOINETTE. A good midseason variety of a pleasing shade of deep pink. Very good.

MRS. F. H. BERGEN. Midseason bright pink.

FIREFLICKER. A very hardy tall sort with large, showy flowers of a brilliant red, tipped with copper.

MRS. PHILLIPS: A very lovely “Mum” with large single daisy-like flowers of a clear pink, three to four inches across. A splendid midseason sort.

WHITE DOTY. One of the best pompoms, pure white flowers borne on very stiff stems, making it fine for cutting. A hardy sort of a tall grower. Price, Dozen, $2.50; Three, 75c; One, 30c. One of each of the six varieties for $1.35.

EARLY BLOOMING CHRYSANTHEMUMS

None of these have ever been caught with the frost in our nurseries; they bloom in September or October and we have had flowers regularly.

CARMELITE. A beautiful large bright golden yellow “Mum,” one of the earliest to bloom.

EVA. The earliest of all, sometimes by the last of August. Color a bright pink, the first few flowers are somewhat of a disappointment, but after a few cool nights in September they are very fine. Rather a dwarf grower, fifteen to eighteen inches.

TINTS OF GOLD. This is what the name implies, “Tints-of-Gold,” shades of bronze and gold, a most beautiful flower, large and loosely constructed.

Price, Dozen, $2.50; Three, 75c; One, 30c; large clumps, each, 50c.

OLD FASHIONED HARDY GARDEN VARIETIES

These are some that have been found in old gardens, the very hardiest sorts. All have large flowers, and are free bloomers.

OLD HOMESTEAD. Old rose, gradually shading lighter.

WHITE QUEEN. A large pure white.

Prices of Old Fashioned Sorts, Dozen, $2.50; Three, 75c; One, 30c; Field Clumps, Dozen, $3.50; Three, $1.00; One, 50c.

CHRYSANTHEMUM MAXIMUM AND ARTICUM

(See Shasta Daisy)

CONVALLARIA—Lily-Of-The-Valley

This favorite of the old fashioned garden, too well known to need description, well repays a little extra care. Spade in some well-rotted manure when making the bed, and each fall or spring give a top dressing of the same, and you will be more than gratified with the results.

Small plants, Dozen, $2.00; Three, 75c; One, 25c. Prices of Old Fashioned Sorts, Dozen, $2.50; Three, 75c; One, 30c; Field Clumps, Dozen, $3.50; Three, $1.00; One, 50c.

CUTTING FLOWERS

See NOVELTIES, etc., page 7.

More Lovely Blue Flowers

No garden is complete without the lovely Delphinium, or Hardy Larkspur. Some of the finest香港 invades of our gardens are found amongst the Sutherland Hybrid Delphinium.
DIANTHUS—Hardy Pink

The Pinks are delightful little plants for edgings and rock gardens, with clean, attractive foliage and lovely flowers of various shades of pink, red and white. Some of them deliciously fragrant. Deltoides makes an attractive edging, a good cover for lilies and other bulbs and for use on the rockery. Plumbarius, the old fashioned garden pink, with its spicy fragrance, are amongst the best for edgings, as the foliage is held almost all winter, and being of a different hue from other greens of the garden it makes a most attractive effect at all times. After blooming these should be sheared to the ground, a new growth of neat looking foliage will appear and be held throughout the winter. If you enjoy a garden of "Sweet Smells" plant some Pinks.

DELTOIDES. (Maiden Pink). A beautiful little plant with narrow leaves, and a great profusion of small crimson flowers in June and July. A splendid plant for the front of the border, or for the rockery.

DOUBLe CLUSTER PINK. A most striking Pink, resembling a giant Sweet William. The flowers are a brilliant, deep scarlet, double, and bloom freely all summer. One of the most magnificent of the Pinks.

NEGLeRIUS. One of the most beautiful of the wild pinks, has deep rose colored flowers on six inch stems, frequently two to a stem. Your garden is not complete without a little pink Dozen. $3.50; Three, $1.00; One, 40c.

PLUMARIUS. (Grass Pink). The old-fashioned fringed kind with a delightful clove fragrance; the flowers range in color from white to delicate pink and rich crimson.

PLUMARIUS, HER MAJESTY. A fine double white sort, sweetly fragrant, and a fine "button-hole" flower.

PLUMARIUS, ESSIX WITCH. A similar variety with bright pink flowers.

PROCUMBENS. A gem for the rock garden, of trailing character, with rich green foliage, and deep wine-red flowers. Dozen. $2.50; Three, $1.00; One, 4c.

Price of Dianthus, except where noted, Dozen. $2.50; Three, 75c; One, 25c.

DIANTHUS BARBATUS—Sweet William

Though a flower of the old fashioned garden, the Sweet William is not as often seen in our gardens as it should be. It is one of the brightest of our flowers, and if the faded blossoms are removed it will continue in bloom until October.

SPECIAL MIXTURE. A fine mixture of colors running through white, pink and red shades beautifully reticulated. Dozen, $2.00; Three, 50c; One, 25c.

DICENTRA—Bleeding Heart

One of the most beautiful of the old-fashioned plants, with heart-shaped rose-colored flowers in drooping spikes; should be given partial shade. Blooms in April and May; the plant also is taller. A warm, rich and rather light soil, and should be planted in a somewhat sheltered location, as it blooms early. Price, each 50c.

DIGITALIS—Foxglove

Another one of the old-fashioned flowers, dignified and stately, sometimes growing to a height of three to four feet, large stalks of flowers in shades of Purple, White and Rose.

DIGOXINIAEFLORA. The popular variety, three to four feet, blooming in June and July, and ranging in color from rose to deep purple. Dozen, $2.50; Three, 75c; One, 25c.

DORONICUM—Leapordbane

These hardy Golden Daisies bloom very early in the spring when flowers are scarce. The bright blossoms sparkling in the sun are a delight to the eye; and they endure for a longer period than any other spring flower. Dozen, $2.50; Three, $1.00; One, 35c.

ECHIANCEA—Hedgehog Cornflower

PURPUREA. A plant that was formerly listed with the Rudbeckias; the flowers are similar in form to the Blackeyed Susan (Rudbeckia Speciosa) but much larger; the plant is taller; the flowers are a deep rose-color and are very attractive. Splendid for cutting when combined with Euphorbia Corollata. Dozen, $2.50; Three, 75c; One, 35c.
ECHINOPS—Globe Thistle

BIRTO. Attractive thistle-like plants with globular heads of deep metallic blue flowers. These are not alone attractive in the garden, but may be dried and used in the house for winter decorations. An attractive and striking. Dozen, $3.00; Three, $1.00; One, 30c.

ERYNGIUM—Sea Holly

Attractive thistle-like plants; the stems and flowers carrying steel-blue tints; they make very striking effects when planted in masses. Cut and dried these keep well. Dozen, $2.50; Three, 75c; One, 25c.

EULALIA—See Grasses

EUPATORIUM—Hardy Ageratum

Hardy flowers much like the Ageratum in bloom from August to frost.

URTICAEOPIUM. Dense heads of pure white flowers which are fine for cutting, 2 to 3 feet.

COELESTINUM (Mistflower). Beautiful light blue flowers, carrying just a suggestion of pink in the centre, so that it combines well with pink flowers, particularly with our Bedding Rose, Ellen Price, for house decoration. Dozen, $2.50; Three, 75c; One, 30c.

EUPHORBIA

This splendid white Baby Breath Flower is fully described with our NOVELTIES on page 1.

FILAPENDULA—Meadow Sweet

These elegant border plants, all of which have good foliage and feathery plumes of flowers, were until recently, classed as SPIRAEAS. In the new Standardized Plant Names they have been placed in a separate group to be known as FILAPENDULA. They are all plants that will attract attention, and while they do well almost anywhere they are at their best when planted in half shaded location, rich moist soil. Their height, 18 inches to 2 feet. All the white Filapendulas combine well with Penclis and Hemorocallis. For "Japanese Spiraen" see Astibe.

ARUNCUS. Has long feathery panicles of white flowers in June, very graceful. 4 feet. Dozen, $3.50; Three, $1.00; One, 40c.

DROP WORT.

A Filapendula with fine fernlike foliage and creamy-white flowers on stems about 18 inches long. July. A beautiful little plant for the front of the border. See illustration page 58.

ULMARIA. Deep green foliage, and large heads of double white flowers in June and July. 2 feet. Price of Filapendula, Dozen, $2.50; Three, 75c; One, 30c.

HARDY FERNS

Almost every garden has some out-of-the-way corner that is not sunny enough for flowers. Dig in some light soil, preferably leaf mold, or use our Holland Peat, which makes the soil porous and helps retain moisture, and plant a few of our Hardy Ferns; you will be delighted with the results.

On the north of our house we have a bed about six feet by twenty, filled with Ferns, Forget-Me-Not, Columbines, English Primrose and Lilies and is the most delightful little garden plot I know of. Almost any backyard has a similar plot and it is the most delightful little garden plot I

INTERRUPTED FERN. (Osmunda Claytoniana). A beautiful fern, two to three feet in height, that is suitable for growing in boxes or pots, as it thrives with much less moisture than most ferns. Should be grown in shade. Extra Large Plants, Dozen, $3.50; Three, $1.35; One, 50c. Clumps, Dozen, $7.50; Three, $2.00; One, 75c.

MAIDENHAIR FERN. (Adiantum pedatum). The most graceful of all the wood ferns, requires rich, moist soil, and a shaded location. Plant one inch deep. Dozen, $2.00; Three, 75c; One, 35c.

OSTRICH FERN. (Onclea struthiopteris). A very handsome fern as graceful as a palm. Sterile fronds will reach a height of two to four feet, with a width of six to ten inches; will grow in sun or shade. Use lots of well-rotted manure as this fern is a great feeder. Large Plants, Dozen, $3.50; Three, $1.00; One, 35c. Clumps, Dozen, $6.00; Three, $1.35; One, 30c.

ROYAL FERN. (Osmunda Regalis). One of the prettiest of the large ferns, 2 to 3 feet, will grow in sun or shade but must have plenty of water; will grow at the edge of ponds. Dozen, $3.50; Three, $1.00; One, 40c.

SENSITIVE FERN. (Onclea Sensibilis). A very pretty fern about one foot in height, does well in either sun or shade and should be kept fairly moist. Dozen, $2.50; Three, 75c; One, 35c.

VIRGINIA FERN. (Woodwardia Virginica). A pretty wood fern, grows in sun or shade and in any ordinary garden soil. Excellent for rockeries. Dozen, $2.50; Three, 75c; One, 35c.

WOOD FERN. (Aspidium spinulosum). An evergreen fern, one and one-half to two feet in height, should have shade and a rich soil; crown should be planted just at the surface. A beauty. Large plants, Dozen, $3.50; Three, $1.00; One, 40c.

SPECIAL OFFER

Four Ferns, all different, our Selection, for $1.00 postpaid.
Six Ferns, all different, our Selection, for $1.50, postpaid.

GAILLARDIA

Large showy flowers, like giant Marguerites, in shades of orange, yellow and crimson, very striking and in bloom all summer. 18 inches to 2 feet. See illustration below.

Gaillardias adapt themselves to any condition in the garden, are perfectly hardy, have full sun; and they also have the additional advantage of being at home in the driest soils, in soils so dry you would think a plant could not exist. A splendid flower for neglected spots—the places you forget to water. Price of Gaillardia, Dozen, $2.50; Three, 75c; One, 30c.
HARDY ORNAMENTAL GRASSES

The Hardy Grasses are indispensable in making Garden Pictures, their airy, graceful foliage blending in beautifully with the flowers and shrubs. No garden is complete without them. They vary in height from two to ten feet, so are adapted to the smallest or to the largest garden. Towards fall all of them have beautiful plume-like heads which keep in good condition all winter in either house or garden. No plant we have to offer will give you greater pleasure.

The plumes if cut just after opening make attractive bouquets for winter, and will keep in good shape for many months; can be colored. The grass formerly known as Eulalia is now called Miscanthus.

GRASSES FOR WINTER DECORATION

The plumes if cut just as they are opening and dried will keep all winter. They make splendid winter bouquets when used with Sea Lavender, Globe Thistle, Sea Holly and Tamarix. Did you know the Tamarix blossoms would dry and keep all winter—and retain their bright carmine color? See Shrubs for Tamarix.

GRASSES

MISCANTHUS SINENSIS—Eulalia

All four varieties of Eulalia offered below are splendid plants for giving boldness and variety to the perennial border.

MAIDEN GRASS. (E. Gracillima). Narrow foliage, 3 feet, plumes about five feet.

STRIPED EULALIA. Foliage green with a broad stripe of white down the centre, 4 to 5 feet, plumes 5 to 6 feet.

SINENSIS. (Japonica). Foliage dark green, 6 feet, plumes 8 feet.

ZEBRA GRASS. (Zabra). Foliage bright green with narrow bands of yellow across the leaves, 5 to 6 feet, plumes 6 feet.

ARUNDO DONAX. (Giant Reed). A very striking giant reed, growing to a height of 8 to 10 feet, effective as a specimen on the lawn, or as a background for Eulalias in a planting of hardy grasses. Dozen, $8.00; Three, $2.50; One, 50c; large clumps, postage not prepaid, $1.00.

Price of Grasses, except where noted, Dozen, $5.00; Three, $1.90; One, 35c; Clump, 50c.

GEUM—Avens

This is the most attractive of our red flowers. Read about it. See NOVELTIES, page 2.

FOXGLOVE (See Digitalis)

FRAGRANCE IN THE GARDEN

For fragrance in the garden plant some of our clove-scented Pinks, "Dianthus Plumarius," Hardy Carnations, Hemerocallis, Iris, Lavender, Peonies, Phlox Divaricata, Violets.

GYPSOPHILA—Gypsophila

Baby’s Breath

PANICULATA. A fine plant for using amongst other perennials, or in the shrub border, grows 2 to 3 feet in height, and in June to August is covered with a mass of minute pure white flowers, forming a beautiful gauze-like appearance, makes a splendid combination with other cut flowers. Dozen, $2.50; Three, 75c; One, 35c.

EHRLEI. This is the finest of the Double Baby Breaths, the flowers are pure white, and almost as large as the Achillea. Dozen, $8.00; Three, $2.00; One, 75c.

REPANS. A most beautiful trailing plant for the rockery, has quantities of small pink and white flowers in July and August. Dozen, $2.50; Three, 75c; One, 30c.

LAVENDER BABY BREATH

See "Limonium"

Are You Fond of Orange and Bronze?

If you are fond of orange and bronze shades in flowers you will find these colors at their best in Helinmum. See page 17.
HELENIUM—Helen Flower

Helen Flower, named after the celebrated Helen of Troy, is a rich shade of bronze and gold. Beautiful. Bronze Beauty, a very fitting name, as the flowers are long and are borne very freely. For a fine combination plant Oriental Iris Superba back of this.

Yellow Day Lilies

Yellow Day Lilies, do you know them? You can have about five months of the best yellow garden flowers. Try a few. We have about five months of the best yellow garden flowers. Try a few. We are growing eight or ten sorts we have not catalogued. I'd like to plant some of these in every garden. I have a large group of them, all the different sorts I grow, around the little pool in my own garden; I wish you might see them. They are a constant joy from May to September, as the different varieties come and go. Try a few. We are growing eight or ten sorts we have not yet catalogued.

HEMEROCALLIS—Day Lily

These delightful Day Lilies are among the most satisfactory of our hardy garden flowers; most of them have exquisite fragrance; and the large, lily-like flowers vary from the palest yellow to the deepest orange. They vary in height from about one foot to six, and in time of bloom from May to September. They are not surpassed for golden yellow flowers from July until frost; they are most beautiful sort. Dozen, $3.50; Three, $1.00; One, 40c.

HELIANTHUS—Hardy Sunflower

Perennial Sunflowers should be planted in masses against a background of shrubs, or at the rear of the Hardy Perennial Border. They are profuse bloomers, and make a gorgeous effect in yellow; combine well with Boltonia, Artemisia and Helianthemums. A new variety about two feet in height, and blooming in July and August, large bright golden yellow flowers, brown centered.

HEUCHERA—Coralbells

These are dainty little plants for the front of the border, have very ornamental leaves held until well along in winter, the flowers will keep fresh in water for weeks. They have slender, fairy-like spikes of graceful little flowers; carmine pink; exquisite for cutting.

HIBISCUS—Marshmallow

ALTHEA is the botanical name but the old name is so well known I have adhered to it.

New Giant Marshmallow

Mammoth Flowers of Red, Fink and White

See page 18.

See illustration, page 16.
GIANT MARSHMALLOW

NEW GIANT FLOWERING MARSHMALLOW.

A wonderfully improved form, with immense flowers, frequently ten to twelve inches in diameter, in bloom from July until almost frost. Mixed Colors, Dozen, $2.50; Three, 75c; One, 50c. Separate Colors, Red, Pink or White, Dozen, $3.50; Three, $1.00; One, 40c. Extra large plants, 50c each. See illustration, page 17.

OLYHOCK

No need to describe these beautiful flowers, you have seen them in every old-fashioned garden. Nothing more strikingly beautiful than a row of these along a fence or trellis.

DOUBLE HOLLYHOCKS. In separate colors, Tall, S. and F. $2.00. Trellis, S. and F. $1.50. Price of Hollyhocks, Dozen, $2.00; Three, 65c; One, 25c.

HYPERICUM. See Shrubs

Flowers for Memorial Day

If You Wish Flowers for Memorial Day—Plant Iris

Sutherland Garden Iris

Don't have a garden without the Iris. It has a peculiar charm that appeals irresistibly to those of refined taste. Its soft iridescent colorings and its ethereal formations are so rare and ethereal in their beauty it is hard to believe that this modern Iris is the successor of the once common "Flag" of the old-fashioned garden. Our collection of Iris will be found one of the most comprehensive in the country and on novelties our prices are much lower than those of the eastern Iris "Specialists." The Iris is our particular fad and we offer the finest varieties to be had anywhere. "S" represents Standards or upright petals; "F" the lower or drooping petals. Cut back to the ground after blooming and they will send up new foliage that will keep fresh until fall.

CHOICE VARIETIES AT A MODERATE PRICE

ALBERT VICTOR. One of the finest of the lavander blues, very tall, fragrant.

ALCAZAR. S. Soft blue—violet, overlaid bronze. F. dark violet, bronze-purple veins, a mammoth flower and very showy.

CAPRICE. S. and F. light purple, blending to soft lavender at base. Very fine.

CELESTEL. Light blue, an old variety, but still one of the best of its color. Dozen, $1.00; Each, 50c.

GRAND SULTAN. A showy variety, S. old gold, F. rich deep plum, striking.

HER MAJESTY. S. rose-pink, F. bright crimson tinged darker, general effect pink. One of the best pinks.

IRIS KING. Few Iris are as rich and brilliant in color as this; immense flowers. S. old gold, F. crimson-maroon, edged yellow. One of our favorites. Dozen, $3.00; Three, 80c; One, 30c.

ISOLENE. One of the Queens of the Iris family; immense flowers of dainty beauty. S. pink, F. rose, shaded mauve. A beautiful variety. Dozen, $2.50; Three, 75c; One, 30c.

INNOCENCE. Still one of the best whites, pure paper white.

KOEHL. Deep purple and one of the best. Dozen, $2.50; Three, 75c; One, 30c.

LA BEAUTÉ. We think this one of the best light blue garden varieties.

LONDON. Immense flowers of a deep violet-purple mauve.

MRS. BRAYNARD. A very fine medium-dwarf deep rose-pink, one of the most striking of this color.

MME. CHEREAU. One of the old favorites, S. and F. white delicately edged lavender.

PARISIAN. S. mot¬

ted lavender pink, F. creamy white centre heavily bordered lavender pink.

PROSPER LAUGIER. S. S. silver bronze, F. vel¬

vety ruby purple, one of the most distinct and striking of the standard sorts.

QUEEN OF MAY. S. and F. soft rosy-lilac, almost pink, a beautiful tall growing sort.

RHINE NIX. S. pure white, F. raspberry purple edged white, a splendid grower and one of the most striking.

Price of above Iris, except where noted, Dozen, $2.00; Three, 60c; One, 25c.

The set of eighteen varieties for $2.50.

TWELVE CHOICE IRIS OF UNUSAL COLOR, SIZE, FORM

AMBASSADEUR. One of the finest. S. deep lavender suffused bronze, F. maroon with purplish cast. Immense flowers of magnificent form and unique color. Three, $1.50; One, 60c.

BLUE FAIRY. We bought this some years ago and lost the name, so have renamed it. The tallest sort we have seen, very large lavender blue flowers, borne seven to nine to a stalk. We think it one of the best blues we have seen. Dozen, $5.00; Three, $1.50; One, 60c.

BALLEINE. A superb variety, 4 feet high, wonderful flowers of porcelain blue with broad rounded wavy margins, falls slightly deeper, delicately scented. Each, $1.00.

CECIL MIINTURN. A beautiful flower of soft Cattleya rose, broad petals gracefully waved and crinkled. One of the largest and most beautiful Iris. Each, 50c.

DENT WILLIAMSON. Exceptionally large flowers on tall stems. S. bright lobelia blue, shot fawn at edges, F. rich velvety purple suffused blue at the edge, bright golden yellow beard. Each, 50c.

LORD OF JUNE. One of the finest Iris in cultivation, a strong grower with flowers of perfect form. S. pale lavender blue, F. deep aniline-blue. Each, 75c.

PRINCESS BEARICE. The true pallida type, and still one of the best and most satisfactory, flowers of large size. S. and F. clear lavender-blue and sweetly scented. Strong, vigorous growth. Dozen, $3.00; Three, 80c; One, 30c.

ROYALTY. This is a unique variety that we do not find offered elsewhere. S. and F. are a rich deep lavender-blue, edged and blotched white, a most striking variety. Dozen, $3.50; Three, $1.00; One, 50c.

RUTH PEFFER. Large flowers, tall and fragrant, color white and lavender. Dozen, $4.00; Three, $1.25; One, 50c.

SHEKINAH. Considered by many the most delicately beautiful of all the pale yellow sorts, a tall grower, and a conspicuous variety of uncommon color, the yellow showing amber shadings. Each, 50c.

Note the Dainty. Airy Grace of the Oriental Iris

—Snow Queen—An Iris That is Different, And That ALL Will Like
SHERMAN WRIGHT. This is a vigorous growing, free-flowered golden yellow Iris, a variety that has long been wanted. The flowers are a rich golden yellow, stand well above the foliage, show no markings or shadings, and are produced in lavish profusion. No other yellow has so many good features. We now have sufficient stock to offer it at a popular price. Dozen, $2.00; Three, 60c; One, 25c.

ROYAL PURPLE. A splendid free-flowering sort of a rich royal purple, and a splendid companion to Sherman-Wright. We know of no deeper or richer or more free-flowering purple. Dozen, $3.00; Three, 85c; One, 35c.

The set of twelve varieties for $5.00.

IRIS OCHROLEUCA

A very tall Iris, four feet, or over in height; the foliage is very striking, the yellow sort being almost in character, while both the yellow and the white are suitable for planting in connection with pools.

OCHROLEUCA GIGANTEA. Bright yellow showy flowers. Dozen, $2.50; Three, 75c; One, 35c.

OCHROLEUCA ALBA. A tall sort—we have had it almost six feet in height, foliage very ornamental at all times, and has pure glistening white flowers of great beauty. One of the most beautiful of all Iris. Dozen, $2.50; Three, $1.00; One, 35c.

JAPANESE IRIS

These are so unusually beautiful that we have included them with our NOVELTIES, page 2.

Do not overlook them.

ORIENTAL IRIS

These are amongst the most delicate and elegant of the Iris family, have narrow grass-like foliage and delicately formed flowers of blue and white. These are so unlike the Variety that has been known as "German Iris" they are a surprise to all who are not familiar with them. They are the most dainty of the garden Iris.

O. GEO. WALLACE. An extra tall sort with azure-blue flowers.

O. SNOW QUEEN. Large flowers of a pure snowy whiteness with a delicately satiny texture to the petals. A most beautiful white Iris.

O. SUPERBA. A tall growing sort with deep royal blue flowers. Makes a splendid combination with Hemerocallis Dumorteri. They bloom together, and the brilliant yellow of the Hemerocallis is intensified by the intense blue of the Iris, a most beautiful Iris, except where noted, Dozen, $2.00; Three, 60c; One, 25c.

The set of three for 60c.

EMPEROR. A splendid new variety, has the largest blooms of any of the Siberican group, a striking dark violet blue. A most beautiful Iris. Unexcelled for cutting. Dozen, $4.00; Three, $1.25; One, 50c.

DWARF IRIS

These lovely little Iris come into bloom about a month before the taller sorts, a time when flowers are scarce in the garden, and are particularly useful as a border for beds, or for planting in front of the taller Iris.

CYANEA. Deep royal purple delightfully fragrant.

STEWART. Very large flowers of a brilliant golden-yellow, by far the best dwarf yellow, as brilliant as Sherman Wright.

Price, except where noted, Dozen, $1.50; Three, 50c; One, 25c.

The Flaming Torchlily.

"Foliosa" Has Proved Absolutely Hardy With Us.

any soil, but responds quickly to liberal treatment; should be given some protection, or taken up in the fall and stored in sand. It’s worth any amount of trouble; nothing like it in the garden. See illustration.

FOLIOSA. (Sword Torchlily). A strong grower, blooming in May. It has immense flower spikes, 10 to 12 inches long on 3 foot stems, orange-red, shading to yellow as bloom matures. Does not need protection. Immense plants. Dozen, $5.00; Three, $1.50; One, 50c.

PFITZERIANA. (Bonfire Torchlily). An ever-blooming sort, from August to October, spikes 3 to 4 feet high, with heads of bloom of a rich orange-scarlet; makes a grand effect—planted singly or in masses. Dozen, $3.50; Three, $1.00; One, 40c.

HYBRIDS. For these beautiful hybrid Torchlily see NOVELTIES, page 2.

"Consider the Lilies"

Lilies, the most superb flowers of the garden, have a fascination for every flower-lover; but most have denied themselves these lovely flowers owing to the general impression that lilies are difficult to grow. They are if treated as you would the general run of plants, but they can be grown by anyone when their few and simple requirements are known and met. YOU CAN GROW THEM IN YOUR GARDEN.

PLANTING AND CARE OF HARDY LILIES

A SOUND HEALTHY BULB IS THE FIRST REQUISITE. Bulbs that have been lying around in stores for an indefinite time have lost their vitality. You can detect this at once. A sound bulb is firm; a flabby one is deteriorating.

A LOOSE LOAMY SOIL IS A REQUISITE, and it must be free from manure or fertilizer of any description whatever. Leaf mould though not an absolute necessity is very beneficial; but the general condition of the soil should be open and porous. DO NOT USE ANY manure in a Lily Bed.
GOOD DRAINAGE IS MOST ESSENTIAL. The bulbs should be set so that there is at least an inch of sand under and over them; this keeps the bulbs surrounded by a dry pocket regardless of the water used. (Swamp loving lilies can be grown by being set on top of an inverted flower pot, and the sand sifted with sharp gritty sand.)

SHADE FOR THE ROOTS IS ALSO VERY NECESSARY. Most Lilies should be planted amongst low shrubs, or ferns, or should have a protecting growth of dwarf plants over them, for though they grow naturally in the full sun, they are always in locations where the ground is sheltered from the direct rays of the sun. Phlox sublata, Phlox amoenus, Cerastium, Myosotis, Dwarf Sedum, Leptichium Nunmularia and Viola, closely planted, are all good ground covers for this purpose. They should also be given the protection of a mulch of leaves, or of THOROUGHLY STABILIZED manure for winter.

Chinese Wilson gives as a rule twice the depth of the bulb itself, but we have found that in Colorado a greater depth is required, and would recommend three to four times the depth of the bulb. We plant large bulbs of Auratum and Speciosum right to ten inches deep. A large bulb of Lilium Canadense is less than one inch high, but we never plant them less than ten inches deep, and as deep as twelve. Do not be afraid of deep planting.

ANY AMATEUR GARDENER can provide in any garden simple requirements, but not experiment with any but the few hardy Lilies listed here, unless you are an expert. “Chinese Wilson,” the acknowledged authority on Lilies in this country, only suggests two other varieties besides those that we list for the amateur gardener, unless he is expert on Lilies. He states that any good gardener carrying out the essentials given above will succeed with the varieties we are offering.

HARDY GARDEN LILIES

AURATUM. Gold Banded Lily of Japan. One of the most magnificent of the Lilies, has large, graceful fragrant flowers, composed of six petals of a delicate white, thickly studded with crimson spots, and striped through the centre with a band of golden-yellow. Mammoth Bulbs, Dozen, $5.00; One, 50c.

CANADENSE. A beautiful native of the eastern woods with bell-shaped blossoms varying from yellow to red, 3 to 5 feet. Dozen, $2.50; One, 30c. Mammoth Bulbs, Dozen, $4.00; One, 40c.

CANDIDA. (Madonna Lily). The best white Garden Lily, the variety that is found in all the old fashioned gardens, makes a splendid effect when planted with Phloxes and Canterbury Bells. Plant ONLY two or three inches deep, in sight of each other. The bulbs should be planted in the early fall, August or September, preferably in August, before our fall catalogue is ready, we will find to the right variety for others in our catalogue for this spring, and we will send the bulbs when they are ripe. Ours are home grown and freshly dug; price of Tiger Lily. Mammoth bulbs, Dozen, $5.00; Each, 50c.

ELEGANS. Large tulip-shaped blossoms of violets shades of orange-red, and red, one of the brightest and easiest to grow, 2 feet. Dozen, $3.50; Three, $1.00; One, 35c.

REGALE. This new variety from China is considered one of the most beautiful garden lilies, is 3 to 5 feet in height, blooms in July, and is perfectly hardy. Has large trumpet-shaped, delicately scented flowers, ivory white, shaded pink, and tinged with canary yellow at the base of the petals. Dozen, $3.50; Three, $1.00; One, 40c. Large Bulbs, Dozen, $5.00; Three, $1.35; One, 50c. Mammoth Bulbs, Dozen, $7.50; Three, $2.00; One, 75c.

SPECIOSUM MAGNIFICUM. A gorgeous variety with large white flowers spotted and splashed with bright crimson. Dozen, $6.00; One, 55c.

SPECIAL OFFER OF LILIES

UMBELLATUM. (Western Orange-cup Lily). A tall, vigorous grower, with red flowers, flushed with orange. Very attractive. One of the easiest lilies to grow. Price, mammoth bulbs, Dozen, $4.00; Three, $1.00; One, 40c.

LATHYRUS LATIFOLIUS

Perennial Pea

LIATRIS—Gayfeather

PYCNONOSTACHYA. Nothing will attract more attention than the Gay Feather on account of its unusual appearance; it is also beautiful as well as odd. It blooms in midsummer, throwing up long narrow spikes of rich purple flowers which last a long time. Wonderfully effective when planted.
with Boltonia, and are a great attraction for the butterflies. Dozen, $2.50; Three, 75c; One, 35c.

SCARIOSA. Has large, showy purple flowers, blooming later than Pachystachia, the two making a good group. Price of Liatris. Dozen, $2.50; Three, 75c; One, 35c.

LILY-OF-VALLEY—See Convallaria

LINUM—Flax

PERENNE. A beautiful little plant for the rockery or the front of the border, with light, graceful foliage, and large bright blue flowers borne all summer. Plant in sandy soil 1½ feet. Dozen, $2.50; Three, 75c; One, 35c.

LIMONIUM

For this most beautiful lavender Babybreath see NOVELTIES, page 2.

LUPIN

See NOVELTIES, etc., page 2.

LYSIMACHIA—Loosestrife

CLLOTROIDES. (Loosestrife). Long, recurved spikes of pure white flowers from July to September; foliage colors beautifully in fall, 2 feet. Dozen, $2.50; Three, $1.00; One, 35c.

NUMMULARIA. (Moneywort). Valuable for growing under trees, and in odd corners where grass will not grow. A fine ground cover. Dozen, $2.50; Three, 75c; One, 35c.

MERTENSIA—Blue Bells

VIRGINICA. One of the most attractive of our early spring flowers, with panicles of baby-blue flowers, turning to pink as they mature. The foliage disappears toward midsummer, so that Paniesies or any shallow rooting annual may be planted over them, thus giving two periods of bloom. 1 foot. Do not miss this lovely little spring flower. Dozen, $2.50; Three, 75c; One, 35c.

MONARDHA—Beebaum

Very showy plants, 2 to 3 feet in height, with aromatic foliage, and producing their bright flowers during July and August. Especially well adapted for using in front of shrubs, or amongst the dwarfer kinds, where their brilliant flowers will show up to good advantage when the shrubs are through blooming.

CAMBRIDGE SCARLET. Brilliant crimson-scarlet. Dozen, $2.50; Three, 75c; One, 35c.

MYOSOTIS—Forget-Me-Not

We have a hardy Forget-Me-Not that is a continuous bloomer throughout the entire season, blooms as late as November. It has the old-fashioned flowers of bright sky-blue, makes a most attractive bed or border, and is splendid for cutting. One of our choicest flowers. Does best in partial shade but will grow in full sun. Do not confuse with the common Forget-Me-Nots, which are mostly annuals or biennials.

One of the best ground covers for planting over Lily and other bulbs. Dozen, $2.50; Three, 75c; One, 30c.

MONTBRETIA—See Tritonia

MYRTLE—See Vinca Minor

NEPTA—Ground Ivy

MUSSINT. A good plant for any position, but especially for the rockery, of dwarf, compact habit, with masses of flowers of a beautiful shade of lavender. 1 to 1½ feet. July and August. Dozen, $2.50; Three, 75c; One, 30c.

OENOTHERA—Evening Primrose

One of the best of our yellow flowers. See NOVELTIES, page 3.

Monarcha—Beebaum

Very showy plants, 2 to 3 feet in height, with aromatic foliage, and producing their bright flowers during July and August. Especially well adapted for using in front of shrubs, or amongst the dwarfer kinds, where their brilliant flowers will show up to good advantage when the shrubs are through blooming.

OENOTHERA—Evening Primrose

One of the best of our yellow flowers. See NOVELTIES, page 3.

Sutherland’s

Superb

Peonies

Peonies for Spring Planting

While fall is usually considered the best time to plant Peonies, spring is also a favorable time. The difficulty about spring planting has been the fact that the plants start into growth so early, even before the frost is entirely out of the ground, that it has been impossible to dig them early enough. Last fall we dug a quantity of the varieties offered below, and carried them through the winter in our storage cellar, so they will be in the best possible shape for planting this spring. Carry out our planting directions and you are assured of success.

Sutherland’s Fragrant

Peonies

We have a very fine collection of Peonies, but as they have to be dug very early in the spring, we only offer our full collection for fall planting. The following sorts we have dug and can ship them any time during the spring months. Order early.
Humming Birds in Your Garden

Would you like to see Humming Birds in your garden, every day, and all day during the summer months? Then plant Penstemon. Last summer when the Penstemon were in bloom I could go out in my garden any time of the day and see numbers of Humming Birds darting from flower to flower, and their greens making as brilliant spots of color as the reds and pinks of the Penstemon.

PENSTEMON—Penstemon

The Penstemon are tall growing plants, 2 to 3 feet, with brilliantly colored flowers somewhat like giant Snapdragon, borne in great quantities throughout the entire summer. Divide and replant every two years.

TORREYI. Bright Coral-red flowers, a very bright and lovely shade. Dozen, $2.50; Three, 75c; One, 25c.

PIK TONNOYI. A good bright pink shade, a decided novelty, and a very pleasing color. Dozen, $3.50; Three, $1.00; One, 40c.

PHYSOSTEGIA—False Dragonhead

Heather-like plants, 2 to 3 feet in height, forming large clumps, and bearing long spikes of tubular formed flowers in July and August. Virginia is somewhat weedy, and should only be planted among shrubs, or in some place where it will not interfere with less robust plants. The white form, Alba, is not weedy, nor has Vivid proven weedy with us. 30 inches.

VIRGINICA. Delicate pink.

VIRGINICA ALBA. A pure white variety, fine for cutting.

VIRGINICA VIVID. A new and dwarfer variety with larger flowers of a darker and more brilliant pink. One of the finest late summer flowers. Dozen, $3.50; Three, $1.00; One, 40c.

Price of Physostegia, except where noted, Dozen, $2.50; Three, 75c; One, 25c.

SPECIAL OFFER

Three good peonies, our selection from named varieties, two different shades of pink, and one white, $1.00.

Three extra good peonies, named varieties, our selection, pink and white, and two pinks, if you prefer, $2.00.

PAPAVER—Poppy

Oriental Poppies are amongst the most striking of our garden flowers. When dug from the ground they must be set VERY EARLY in the spring or in early fall, when they are dormant. We are growing them in pots, so they should handle safely up to the middle of May.

MRS. PERRY. We find this described as "Salmon-Rose" and "Orange-Apricot." Ours is a very pleasing shade of soft pink. It is the most beautiful Pink Poppy we have seen.

ORIENTAL. Immense flowers of a brilliant orange-scarlet. Should not be planted near flowers of other colors, as this shade will not blend with any known color.

Price of Oriental Poppy, Dozen, $3.50; Three, $1.00; One, 40c. One of each variety for 75c.

Oriental Poppy—Plaunting, Silky Red Banners

To be successful with Peonies they should be planted in soil that is free from any traces of fresh fertilizer, and should be planted so that the crown (see the red buds) should not be more than one, or at the outside, two inches below the level of the ground. Deeply planted peonies will not bloom. Be sure to send for our Fall Peony List. We have over a hundred of the best standard varieties, with many of the latest novelties and not at Novelty Prices.

The figures following the name, see Baroness Schroeder, indicate the rating given by the American Peony Society. 10 would be perfect, 3 is a very high rating.

A LIST OF CHOICE PEONIES FOR SPRING PLANTING

BARONESS SCHROEDER. (Kelway) 9.0. Considered one of the finest whites grown, pale blush when first opening, $1.50.

COURONNE D'OR. (Calot) 8.1. A splendid white with a ring of yellow stamens around a tuft of Carmine-tipped center petals. A splendid cut flower, rather late. 50c.

DUCESS DE ORLEANS. A lovely flower of a dark carmine pink, with a centre of soft pink when first opening, $1.50.

P. H. REDDICK. 7.7 (Brand). One of the best dark reds, medium height, large, semi-rose, very brilliant cut flower. Centre tinted rose. A very fine cut flower. 50c.

FELICITAS MAXIMA. (Meillez) 9.3. One of the oldest whites, and still considered one of the best, large flowers of wonderful substance, pure white with carmine-tipped center petals. A splendid cut flower, rather late. 50c.

EDULIUS SUPERBA. One of the fine old fragrant pink peonies, usually in bloom for Memorial Day. 50c, three for $1.00.

P. H. REDDICK. 7.7 (Brand). One of the best dark reds, medium height, large, semi-rose, very brilliant cut flower. Centre tinted rose. A very fine cut flower. 50c.

MONT BLANC. (Lemoine). A fine milk-white variety, centre tinted rose. A very fine cut flower variety for $1.00.

PLUTARCH. (Kelway). A large, rich crimson. The only good red at a moderate price. 75c, three for $1.50.

PRISCILLA. An attractive peony, worth a lot more than we are asking for it; large flowers of a light pink with salmon centre. 35c.

RACHEL. 7.9 (Terry). A splendid red, semi-rose type, a splendid bloomer. Priced at 75c to meet the demand for a good red selling for less than $1.00. 75c.

WELLINGTON. There is no peony that we think more highly of than this. It has a large flower, guard petals deep shell-pink, inner petals creamy-yellow. In the centre of the flower is another bud of deep shell-pink, edged carmine, with a few petals lemon-yellow, broadly edged carmine. One of our most beautiful many-colored varieties. This peony will not disappoint you. 75c.
The Hardy Phlox are the showiest of our garden flowers, coming in many shades of pink, white, red and lavender, and if handled properly may be kept in bloom from early summer until late fall. After the main head of flowers has faded it will send out another crop of flowers; then this head should be pinched off when new buds will quickly develop from the side of the stem, these in turn should be picked after fading; and in this way a continuous crop of bloom may be had. Do not allow them to go to seed. Seedlings will be mostly artificial light.

After the main head of flowers has faded it will send out another crop of flowers; then this head should be pinched off when new buds will quickly develop from the side of the stem, these in turn should be picked after fading; and in this way a continuous crop of bloom may be had. Do not allow them to go to seed. Seedlings will be mostly ugly majenta shades. Phlox do best when given plenty of water; they should be planted to a depth of two or three inches, and the ground around them should be kept loose. Phlox should have a top dressing of good rich soil every spring. Re-plant every two or three years. Our prices are for good, strong field-grown plants that will bloom every two or three years. Our prices are

**SOME GOOD SORTS**

These are all good varieties; we have a large stock of them and wish to bring down our quantity, so will make you a special offer on them. Don't think these are cheap sorts, because we are offering them at a low price; they are good, but we have too many.

**ATHIS.** Considered one of the best salmon pinks, a pleasing shade.

**BAUER'S PINK.** A pleasing shade of soft rose pink. Very attractive.

**INDIAN CHIEF.** Similar to the famous Phlox, Miss Lingard, but has pink flowers.

**MRS. JENKINS.** One of the best standard whites, immense panicles of large flowers, and a free bloomer, medium height.

**PRINCESS LOUISE.** Semi-dwarf, white, with a faint pink eye, a very free bloomer, and fine for garden effects.

Price of above sorts, Dozen, $1.50; Three, 50c; One, 20c. One each of the six sorts, $1.00.

**SUNSET.** Considered by many the best of the deep pink shades.

**A COLLECTION OF THE BEST STANDARD SORTS**

**APPLE BLOSSOM.** This is a self color, a very pleasing shade of pure pink, flushed deeper towards the centre.

**DOROTHY.** White, shading to salmon towards the centre, general effect a soft salmon pink.

**EUROPA.** Large white flowers with a crimson red eye.

**FRAU BUCHNER.** One of the very best whites, medium height, large trusses of large pure white flowers.

**JULES SANDEAU.** A very large free flowering watermelon pink. One of the very best.

**MISS LINGARD.** The best white in existence. The foliage is light green, a bright shining green, it has immense heads of white flowers, comes into bloom a month before any other phlox, and continues until frost. This is the best pendant of this species.

**PEACH BLOSSOM.** Color what the name suggests, a delicate peach-blossom pink.

**PURPLE QUEEN.** A very beautiful shade of a flower of a deep, brilliant purple. This is a very rich shade, and particularly fine in shade.

**R. P. STRUTHERS.** This will always be one of the favorites, bright rosy-carmine with claret-red eye. Very showy.

**NEYSTROM.** Another very fine pink, different from Struthers, more of a soft rose shade. One of the very best.

**THOR.** A beautiful and lively shade of deep salmon pink, suffused with a scarlet glow, aniline red eye.

**VON GOTHE.** This is a beautiful shade of deep rose pink, and one of the best sorts for color effects in the garden.

**VON LASSBURG.** Pure white, large trusses of large flowers, will always be one of the best whites.

Price of standard collection of Phlox, Dozen, $2.50; Three, 70c; One, 25c.

One each of the sixteen sorts for $3.00.

**SPECIAL OFFER OF PHLOX**

We have a large stock of some of the best sorts, and are going to give our customers the advantage of this surplus. No changes from quantities or varieties. The prices include delivery by mail anywhere in Colorado. These are all GOOD varieties, choice colors, and large field grown plants. The prices set are no indication of the value of the plants, but are governed by the quantity we have.
OTHER DWARF PHLOX

AMOENA. A very lovely dwarf Phlox. See NOVELTIES, page 3.

DIVARICATA. Blue Phlox. This Phlox is in a class by itself, having flowers of a pleasing shade of lavender-blue, and a delightful fragrance. It grows about ten inches high, and in May is in full bloom. Does well in either sun or shade; should be cut back after flowering. Dozen, $2.50; Three, 75c; One, 35c. Clumps, Dozen, $4.00; Three, $1.00; One, 50c.

LOTS OF SIX PLANTS

Lots of six plants of one variety sold at the dozen rate. This does not mean that six Phlox of different colors, for instance, are sold at the dozen rate, but that six Phlox of ONE variety is entitled to the rate.

PLATYCODON—Balloonflower

A most attractive blue flower, similar to the Canterbury Bell, but much larger, and a true perennial, about two and one-half feet in height, and in bloom from July to October; makes a splendid show in the garden. Prefers a dry soil. See illustration below.

GRANDIFLORA. Large blue flowers.

MARIESII. A dwarf form, well adapted for planting toward the front of the border, or on rockeries as it only grows about one foot in height, has the same large blue flowers as the Grandiflora type.

Price of Platycodon, Dozen, $2.50; Three, 65c; One, 25c.

PLUMBAGO—Plumbago

LARFENTAE. A beautiful little blue flower, in bloom from early summer to fall, is dwarf in habit, only 6 to 8 inches in height, and has beautiful deep blue flowers. Plant in warm sandy loam or in sandy soil. Try these. Dozen, $2.50; Three, 75c; One, 35c.

A Flower With Bizarre Colors

POLYGONUM—Fleeceflower

MARBLE FLEECEFLOWER. A striking novelty from China. The new foliage appears in the most bizarre color effects, being a bright green, marbled and streaked with white, yellow and red. Very striking. A robust grower and may be planted amongst shrubs; also good for naturalizing. Dozen, $3.50; Three, $1.00; One, 50c.

PACHYSANDRA—Japanese Spurge

Said to be a “Wonderful” trailing plant and ground cover. We found it a “lemon.” We have a few. IF YOU WANT THEM, we don’t. What will you give for them?

Giant Flaring Blue Bells of the Balloonflower (Platycodon)

POLYGONUM—Fleeceflower

MARBLE FLEECEFLOWER. A striking novelty from China. The new foliage appears in the most bizarre color effects, being a bright green, marbled and streaked with white, yellow and red. Very striking. A robust grower and may be planted amongst shrubs; also good for naturalizing. Dozen, $3.50; Three, $1.00; One, 50c.

A Flower With Bizarre Colors

POLYGONUM—Fleeceflower

MARBLE FLEECEFLOWER. A striking novelty from China. The new foliage appears in the most bizarre color effects, being a bright green, marbled and streaked with white, yellow and red. Very striking. A robust grower and may be planted amongst shrubs; also good for naturalizing. Dozen, $3.50; Three, $1.00; One, 50c.
Each variety has a name of its own. July to September. We have many sorts. Be sure to look there. But, have you ever seen the Blue Salvia? They are thinking of the glaring red of the Salvias used in parks; and they have a place there. But, have you ever seen the Blue Salvia? Think of the soft blue of a summer sky, near the horizon, and of the deep blue of indigo, and you have the blues of our Hardy Salvias.

**Scabiosa—Scabiosa**

These are amongst the brightest and showiest of our yellow flowers, and make a wonderful display in the garden, besides being fine for cutting. Each variety has a name of its own. July to September.

**Scabiosa—Caucasica**

A Beautiful Soft Lavender

**Rudbeckia—Coneflower**

These are amongst the brightest and showiest of our yellow flowers, and make a wonderful display in the garden, besides being fine for cutting. Each variety has a name of its own. July to September.

**GOLDEN GLOW**

The well-known double yellow flower. Six feet. Spreads like a weed—and then some.

**SPECTIOSA**

Black-Eyed Susan. Deep orange-yellow flowers with a black cone centre. Very handsome. Dozen, $3.00; Three, $1.00; One, 35c.

**TAXOBATA**

Has large clusters of small golden-yellow flowers with black centres. Very fine for planting amongst shrubs. July to September.

Price of Rudbeckia, except where noted, Dozen, $2.50; Three, 75c; One, 25c.

**Some People “See Red”**

Some people see red, and only red, when they see Salvia. They are thinking of the glaring red of the Salvias used in parks; and they have a place there. But, have you ever seen the Blue Salvia? Think of the soft blue of a summer sky, near the horizon, and of the deep blue of indigo, and you have the blues of our Hardy Salvias.

**Salvia—Meadow Sage**

Beautiful blue flowers, much like Larkspur in appearance, but easier to grow and harder. They grow three to four feet in height and bloom in the late summer and autumn months. Three feet.

**AZURBA**

Light blue.

**PITCHERI**

Deep, rich blue. Dozen, $3.00; Three, $1.00; One, 35c.

**NEMEROSA**

A very handsome dwarf variety with dark blue blossoms. Price except where noted, Dozen, $2.50; Three, 75c; One, 25c. One each of the three sorts for 75c.

**Bouncing Bet**

Bouncing Bet. I have been trying to “bounce” her from a plot in my garden for over eighteen years, and Bet is still here and thriving.

Bouncing Bet is Saponaria Officinalis, and people who have become acquainted with Betty have been afraid of everything under the name of “Saponaria.” The dwarf variety, Saponaria Ocymoides, is a very pretty little creeping plant for the front of the border, and has none of Betty’s aggressive ways.

**Saponaria—Soapwort**

**SAPONARIA OCYMIOIDES** (Rock Soapwort). This is the pretty little creeper I mentioned above, has masses of attractive small bright rose flowers from May to August. Very useful where a dropping plant is desired. 8 inches. Dozen, $2.50; Three, 75c; One, 35c.

**Scabiosa—Scabiosa**

A very fine blue flower for cutting. Should have full sun and well-drained soil. Keeps a long time in water. A most attractive flower.

**CAUCASIA**

A soft and most pleasing shade of lavender-blue, in bloom from June to September. Between stepping stones, for rockeries, and for filling in any odd corner where it is difficult to make grass grow, also for covering Lilies and other bulbs. Few plants have so many uses.

**ACRE.** (Goldmoss). Bright green moss-like foliage, bright yellow flowers.

**SIEBOLDI** (Siebold Stonecrop). Round, succulent, glaucous foliage, bright pink flowers in August and September. Very pretty.

**STAHLI** (Stahl Stonecrop). Fine, compact growth, with crimson autumn foliage.

**Stolonifera.** (Running Stonecrop). One of the best, flat leaved growing close to the ground, purplish-pink flowers.

**Scarlet Running Stonecrop**. Similar to above, but with crimson flowers.

Price of Dwarf Sedum, Dozen, $2.50; Three, 75c; One, 25c. One hundred, $18.00.

**Sedum—Stonecrop**

**Dwarf Varieties**

Splendid little creeping plants with attractive foliage which is usually retained throughout the winter, often assuming brilliant shades of blue and red. We use it for covering banks, planting between stepping stones, for rockeries, and for filling in any odd corner where it is difficult to make grass grow, also for covering Lilies and other bulbs.

**Price except where noted, Dozen, $2.50; Three, 75c; One, 25c. One hundred, $18.00.**

**Sedum—Tall Varieties**

**Spectabile.** (Showy Stonecrop). One of the best erect growing varieties, broad light green foliage, and immense heads of handsome, showy, rose-colored flowers in early fall. 18 inches.

**Brilliant.** A new variety of Spectabile with rich amaranth-red flowers.

Price of Sedum, Dozen, $3.50; Three, 75c; One, 25c.

**You Don’t Know the Shasta Daisy**

You don’t know the Shasta Daisy if you only have the one variety. Most gardens only have the late summer variety. You can have them for Memorial Day, and then on throughout the summer and fall. We have many sorts. Be sure to read about them, They are the mainstays of the garden at all seasons.

**Shasta Daisy—Botanically Chrysanthemum Maximum**

**Early Varieties**

This class blooms in May and June, and can always be depended upon for Memorial Day, a time when garden flowers are scarce. These are very attractive and brighten up the late spring garden immensely.

**Early Gem**. A new variety of Shasta we recently obtained from England, which on account of its dwarf habit is unusually valuable for an edging, growing only about one foot in height. Its Marguerite-like flowers are borne in quantities on slender stems and are fine for cutting.

Dozen, $2.50; Three, 75c; One, 25c.

**May Queen**. Another new English variety, blooming in May. Plants are robust in habit, and flowers are large, on long stems, height two feet.

Dozen, $3.00; Three, $1.00; One, 25c.
SUMMER BLOOMING VARIETIES

**ALASKA.** One of the best of the large-flowered sorts, and more uniform in growth than most. Dozen, $2.00; Three, 75c; One, 25c.

**KING EDWARD.** An English variety with enormous flowers. Dozen, $2.50; Three, 75c; One, 25c.

**MRS. C. LOUTHIAN BELL.** This magnificent white Marguerite is the largest of this class, flowers frequently measuring six inches across, with very broad petals of great substance. 2½ to 3 feet. Dozen, $2.50; Three, 75c; One, 25c.

AUTUMN VARIETIES

**ARCTICUM.** (Arctic Daisy). (Chrysanthemum Arcticum). This is a gem amongst the autumn-blooming flowers. It forms an attractive rosette-like clump of pretty dark green foliage, and in September multitudes of flower stems appear, terminated by pure white flowers 2 to 2½ inches in diameter. They begin to develop in September and continue through in good condition until November. As they fade they assume a pinkish tinge, making them most attractive. One of the best new plants introduced in years. 18 inches. Dozen, $2.50; Three, 75c; One, 25c.

**ULIGINOSUM.** (Giant Daisy). Grows three feet high, and is covered with large daisy-like flowers during the late summer. Dozen, $2.50; Three, 75c; One, 35c.

**SIDALCEA—Prairiemallow**

**ROSY GEM.** Erect growing, branching plant with bright rose-colored mallow-like flowers in June and July. 3 feet. Dozen, $2.50; Three, 75c; One, 35c.

**SILENE—Catchfly**

**SCHAFTA.** (Autumn Catchfly). A charming border of rock plant about 4 inches high, with masses of bright pink flowers from July to October. Dozen, $2.50; Three, 75c; One, 35c.

**SOLIDAGO—Goldenrod**

**GOLDEN WINGS.** One of the finest, 5 feet in height, and has immense heads of bright golden-yellow flowers from July to September.

**FLEECewing.** Another giant sort, the heads of flowers are immense, but are more loosely constructed than Golden Wings, having the loose flaccy effect of Artemisia. Dozen, $3.50; Three, $1.00; One, 35c.

Price of Golden Rod, except where noted, Dozen, $2.50; Three, 75c; One, 25c.

**SPIRAEA—See Filipendula and Astilbe**

**STACHYS—Betony**

**GRANDIFLORA.** A new hardy plant with pinkish lavender flowers somewhat resembling a Penstemon, 18 inches, flowering June and July. Dozen, $2.50; Three, 75c; One, 35c.

**STATICE—Thrift**

**ARMERIA.** An attractive dwarf plant with evergreen tufts of bright green foliage, innumerable dense heads of purple flowers on stiff wiry stems, ten to twelve inches high, from early spring to late fall. A good rockery plant, or for the front of the border. Divide and replant every two to three years.

**THYMUS—Thyme**

**VULGARIS.** (Common Thyme). An old garden plant, grown as a sweet herb, flowers small, lilac or purple; foliage fragrant. Fine for rockeries. Dozen, $2.50; Three, 75c; One, 35c.

DO YOU KNOW THE MEADOW RUES?

I have been surprised to find how few people are acquainted with the Meadow Rues, as they have so many good qualities. The foliage is dainty, like a Maiden Fern; it is attractive in the garden at all times, and the soft foamy flowers are very fine for cutting, making a lovely effect with Columbine, Ranunculus, etc. Candace Wheeler, in her delightful book, "Content In a Garden," says of the Meadow Rue, "This columbine leaved creature placed among my pink peonies gives the great rose-colored flowers the effect of being afloat in a foamy sea of infinitesimal blossom." Don't you want to become acquainted with the Meadow Rue?

**THALICTRUM—Meadow Rue**

Delicate foliage like the Maidenhair-Fern, and dainty foamy-like flowers of white or purple.

**ADIANTIFOLUM.** (Maidenhair Meadow Rue). A somewhat taller sort, with leaves more like the Columbine, and masses of foamy white flowers in June and July. This is the variety referred to by Mrs. Wheeler in "Content in a Garden."

**DASYCARFUM.** (Purple Meadow Rue). A lovely purple flowered variety of above. Dozen, $3.50; Three, $1.00; One, 35c.

**DIPTEROCARPUM—The Loveliest**

**STOKESIA—Stokesia**

**LAEVIS.** (Cyanea). Generally described as a plant with handsome lavender-blue centaurea-like flowers, 4 to 5 inches across, from July to October, succeeding in any open, sunny position. Perhaps it is not sunny enough in Boulder, for it has not flowered well with us. Dozen, $2.50; Three, 75c; One, 35c.

**STATICE LATIFOLIA—See Limonium Latifolio**

**STOKESIA—Stokesia**

**VULGARIS.** (Common Thyme). An old garden plant, grown as a sweet herb, flowers small, lilac or purple; foliage fragrant. Fine for rockeries. Dozen, $2.50; Three, 75c; One, 35c.
TROLLIUS (Globeflower)

The Trolls, in our opinion, is the most beautiful garden flower. See NOVELTIES, page 3.

TRITOMA—See Kniphofia

TUNICA—Tuniceflower

SAXIFRAGA. A dainty little plant with tufted flowers, a mass of pretty little pink flowers produced freely all summer. Useful for front of border or rockery. Dozen, $2.50; Three, 75c; One, 35c.

VALERIANA—Valerian

OFFICINALIS. (Garden Heliotrope). A tall plant that makes a very fluid effect when planted with Oriental Poppies or Peonies; should be planted back of them. Has large heads of rose-tinted white flowers in June and July, and has a delicious heliotrope odor. Not often seen, but a splendid garden flower. Dozen, $3.00; Three, $1.60; One, 40c.

VERONICA—Speedwell

This group contains some of the most beautiful plants for the front of the border, and for the rockery, and their blues are unsurpassed. Give them a rich soil, in full sun and their growth and beauty will amaze you.

INCANA. (Wooly Speedwell). A pretty little dwarf plant, suitable for edging; has silvery foliage and numerous bright blue flowers, 6 inches. A good cut flower. We exhibited this at one of the flower shows last summer, and it was one of the few that was honored with a special writeup in the papers. It is one of the loveliest blues known. Dozen, $2.00; Three, 75c; One, 25c.

LONIFOLIA SUBSESSILIS. (Clump Speedwell). One of the most brilliant of our garden blue flowers; forms a bushy plant 2 to 3 feet high, with long, dense spikes of deep blue flowers from July to September. Very fine for cutting.

PROFUSUS. One of the best rock plants, very dwarf and close growing, with sheets of brilliant blue flowers.

REFENS. (Creeping Speedwell). A very pretty little creeping plant with attractive light blue flowers.

REFENS VARIEGATA. (Variegated Speedwell). A handsome little variety we secured from Holland before the war, has the same habit as Repens, but the leaves are prettily variegated with yellow, and when in bloom is smothered under clouds of bright blue flowers. Dozen, $3.00; Three, $1.60; One, 40c.

RUPESTRIS. (Rock Speedwell). A fine dwarf form with gorgeous spikes of blue flowers, 18 inches. Thickly matted deep green foliage and in spring is hidden under a cloud of bright blue flowers.

SPICATA. (Spike Speedwell). Similar to Rupestris, but with flowers of a bright rose color.

TRUE BLUE

See NOVELTIES, page 3.

Price of Veronica, except where noted, Dozen, $2.50; Three, 75c; One, 35c.

“TO THROW A PERFUME ON THE VIOLET”

“To throw a perfume on the Violet

Is wasteful and ridiculous excess.”

And it would be just as idle for me to try and enthuse anyone regarding the Violet, as it is already enshrined in every heart. But I wish every flower lover the fact that there is a great host of Violets that can and should have a place in every garden. Our own Little Black Yac garden, to the largest country estate. Be sure to read about Violets G. Wermig and Jersey Gem, and for fragrance none are superior to Princess of Wales and Gov. Herrick.

THE TWO CHOICE VIOLAS

G. WERMIG AND JERSEY GEM

See NOVELTIES, page 3.

VIOLA—Violet

True Violets, Hardy Garden Varieties

No flower is a greater favorite than the Violet; and there is no garden that does not have at least a little spot that can be given up to it. All the Violets we offer are perfectly hardy, and while they do well in almost any location they are at their best in partial shade. In our own garden we have had Sweet-scented Violets in bloom in February.

GOV. HERRICK. Large single clear blue flowers, and sweetly scented.

PRINCESS OF WALES. Broad pansy-like flowers of a beautiful violet-purple shade, very free flowering.

PALMATA. A wild violet with palm-like foliage and attractive single blue flowers.

APLIONAGEA. Butterfly Violet. A robust grower, with flowers of lavender-blue. Dozen, $2.50; Three, 75c; One, 35c.

VIOLA CORNUTA (Tufted Pansy)

This is the best edging plant for the hardy border, and a splendid plant for using in rose beds. If kept from forming seed, and sheared rather close whenever they tend to become straggly, they will continue in full bloom throughout the entire season, from earliest spring until winter. Before the very heavy frost we had in November, plants of these were in full bloom in our garden, and we have had them in early March. Today, January 17th, as I write this, these Violas are in bloom in our garden.

ADMIRATION. A fine deep purple.

BLUE PERFECTION. A radiant blue.

GIANT YELLOW. A bright golden yellow.

WHITE QUEEN. A pure white variety.

Price of above. Dozen, $1.50; Three, 75c; One, 25c; Hundred, $15.00.

VIOLA HYBRIDS AND SPECIES (Everblooming)

These are amongst our loveliest garden flowers. See NOVELTIES, page 3.

VINCA—Periwinkle

VINCA MINOR. Commonly known as Myrtle. The best all-around ground cover, will grow where it is difficult to establish grass. The foliage is a dark, bright green, and is held in perfect shape until the new foliage takes its place in the spring. Has lovely sky-blue flowers in March and April, and though these may be partly covered with ice and snow at times they come out fresh as a daisy. Splendid for covering slopes, for planting amongst shrubs and evergreens, giving the green finish to the ground that is so necessary, also for planting between stepping stones. Dozen, $2.00; Hundred, $15.00.

YUCCA—Adam’s Needle

FILAMENTOSA. This is one of the most stately and striking of the hardy flowers, its broad, sword-like foliage makes it very effective at all times (it holds through the winter) and the enormous spikes of large, fragrant, drooping creamy-white flowers during June and July, make an most effective plant for any position. Give it as dry a soil as possible. Dozen, $3.50; Three, $1.00; One, 40c.

VARIEGATA. A new variety with foliage striped with yellow. Very striking. Each, 50c.

MEMORIAL DAY FLOWERS

We have large quantities of Cut Flowers suitable for decorating graves on Memorial Day; and at prices within the reach of everyone. Send for our list a week before Memorial Day, or call at the Nursery.

Twenty Pages Given You This Year

In order to help you make your garden a success we have added TWENTY PAGES to our Garden Handbook this year. They are written up to fuller descriptions of the plants offered, and to notes regarding their needs, etc., also to directions regarding the preparation of the ground, pruning, planting and care of Trees, Shrubs, Plants, etc. It has added largely to the cost of the booklet; but if we can thereby help you make your garden a success we will think it money well invested. Your success is our success. See page 55.
Sutherland Garden Roses

All of the roses offered in our list are perfectly at home in Colorado Gardens. The Hybrid Tea Roses should be protected in the winter by a covering of leaves, which should not be allowed to become matted, as the plants will then rot, or earth may be heeled up around the plants to a height of six to eight inches, and then hoed away in the spring. Hybrid Perpetuals may be treated in the same manner, though they are hardy without protection in most localities. Our plants are all LARGE, STRONG, FIELD-GROWN stock, practically all of them on their own roots, so that they will not sucker as will grafted ones. There is no better stock in the country, and our prices compare with any. You will be pleased with our Roses.

HYBRID PERPETUAL ROSES

These are large growing Roses, with very large, full, fragrant flowers in immense quantities in June and July, and if cut back after flowering will produce numbers of flowers during the summer and fall months. They are more hardy than the Hybrid Tea Roses, and are very satisfactory in every way. There are no handomer Roses than these.

We offer large, field-grown, dormant plants; sure to grow and bloom. They should be cut back to 2 to 6 eyes when planted.

We offer just a few of the very best, as the Hybrid Teas, though not as hardy, are the more popular.

**FRAU KARL DRUSCHKE.** Pure snow-white, long-pointed buds, and immense full flowers; the ideal white rose, very free bloomer.

**GEORGE AHRENS, OR PINK FRAU KARL DRUSCHKE.** A tender rose-colored form of the popular Druschke; has the large size and free-flowering habits of its parent, and in addition is highly perfumed, a gorgeous rose.

**MRS. JOHN LAING.** A novel and distinct blend of colors, rich red with a suffusion of deep salmon and coral-pink. Unusually free and continuous bloomer.

**ULRICH BRUNNER.** Large, cherry-red, of fine form. One of the best.

**PAUL NEYRON.** Brilliant scarlet-crimson, an old favorite, and one of the best roses grown.

**M. EDOUARD HARRIOT.** Known as "The Daily Mail Rose." Buds are coral-red, shaded yellow at the base; when open the flowers are a superb coral-red, shaded with yellow and bright coppery-scarlet, passing to shrimp pink. Unusually free.

**FRAU KARL DRUSCHKE.** The Finest White Rose Grown

**CAROLINE TSETOUT.** Large, full, globular flowers, of bright, satiny rose, very free and fragrant; the rose that made Portland famous as the Rose City.

**DUCHESSES OF WELLINGTON.** Intense saffron-yellow, flushed crimson, changing to deep coppery-yellow, buds long and pointed; considered by many the best yellow.

**EDITH PART.** A novel and distinct blend of colors, rich red with a suffusion of deep salmon and coppery-yellow; very sweetly scented.

**GEN. S. A. JANSSEN.** Deep, glowing carnations; large, full, deep flowers carried on robust, stiff stems; very free.

**IMPERIAL POTENTATE.** A fine fragrant rose, deep shining pink, shading lighter on the reverse of the petals.

**LADY URSULA.** A magnificent rose; exceedingly free, blooming during the entire summer and fall months. Flowers are produced on every shoot, are large, full and of great substance and perfect form, color a delightful tone of flesh-pink; delicately tea-scented.

**MRS. W. C. EGAN.** A vigorous grower, with long pointed buds of perfect shape, flowers of good form, a two-tone pink, reverse of petals soft light pink, interior deep flesh, the flowers are carried on long stiff stems, and last well on the plant or cut, exceptionally free and continuous bloomer.

**PADRE.** A splendid free flowering bedding rose that has been greatly admired; has long buds of a rich brilliant coppery-scarlet, flushed with golden yellow at the base, of unusual formation and attractive at all stages.
Radiance. An ideal bedding rose, blooms freely in the hottest weather; a brilliant carmine-pink, large and salmon-pink flowers along the base of the petals. A rose for every garden.

Red Radiance. A counterpart of Radiance, of which it is a sport, possessing all the good points of Radiance; color a bright cerise red.

The Sutherland Dozen is made up on the most popular roses. They are two-year, field-grown, dormant plants that will bloom freely this summer, and will be good for years to come. You will find these listed by most Nurseries and Rose Growers at $1.00 each. Our price, with the exception of Mme. Jules Bouche, is 75c, but we will include it in the dozen for $8.50. Delivered anywhere within a thousand miles of Boulder.

The Five Most Beautiful Roses

See Novelties and Plants of Unusual Merit, page 3.

The Best White Everblooming Rose

Mme. Jules Bouche. A rose bed is not complete without a white, and here is the best white to date. Both buds and full-blown flowers are of splendid form, large and fragrant; a vigorous grower and a free bloomer. Each, $1.00.

A Brilliant Crimson Bedding Rose

Gruss an Teplitz. This is the most outstanding of our bedding roses. The color is a deep, intense crimson-scarlet, and a mass of bloom all summer. A tall, vigorous bloomer. Each, 50c; Dozen, $5.00. Delivered.

Sutherland Colorado Bedding Roses

Have you seen our Colorado Bedding Roses? We have used large quantities in many Denver gardens. These are dwarf roses, ideal for bedding, have large clusters of good sized roses, in a fine assortment of colors, and are never out of bloom from early June until late frosts. The early frosts do not affect them; they are often in bloom until well along in November. There is no other class of rose as fine for our Colorado gardens. We have carried them through the winter in our own garden in Boulder for over ten years absolutely with¬out protection, and should be treated as shrubs, and grown in the shrub border. Tausendschon, though a climbing rose, makes a very fine effect when planted among shrubs, especially when placed back of a medium-growing variety, where its shoots will entwine themselves with the branches of the shrub, and make it appear an immense rose bush. Trier is also a very fine variety to plant with the medium-growing shrubs, as its foliage is good at all times and it is practically ever-blooming.

Harrison's Yellow. A large, showy shrub with a multitude of golden-yellow, semi-double flowers. Very showy, and an old favorite. Large field-grown plants. 50c.

Persian Yellow. Similar to Harrison's Yellow, with bright yellow, nearly double flowers of exquisite form. Strong field grown plants, 50c.

Tausendschon. Trier. One of the finest roses for using with shrubs, has fine, clean foliage and large sprays of creamy white, semi-double flowers all summer. The finest hardy ever-blooming rose. Each, $1.00; Dozen, $10.00.

Hybrid Rugosa Roses

The most beautiful foliage of any Rose, with large single or semi-double flowers, followed by immense red fruits that remain on the bushes in good condition until spring.

Agnes E. Carman. Deep, brilliant crimson, double.

Conrad F. Meyer. Double, flowers large, of a pleasing shade of silver-pink.

F. J. Grootendorst. A dwarf, ever-blooming Rugosa, with flowers of a dazzling scarlet. Blooms until very late in the season. A very showy shrub. Each, $1.00.

Price of Rugosa Roses, except where noted, each, 75c; Dozen, $8.00.

Hybrid Rugosa Rose. One of the Finest Roses for a "Shrubbery Planting"
ROSES GROWN AS SHRUBS

For miscellaneous roses and rose species grown as shrubs, see "Rosa," Shrub Department, page 39.

THE FAMOUS HUGONIS ROSE

Although this rose was only introduced from China a few years ago, it has already become famous, as it is distinct from any other rose. It makes a large shrub, about six feet in height, and nearly as broad, has good foliage, and makes a symmetrical bush. Its delicate single yellow flowers are produced on long arching sprays early in May, a month before any other rose, making a gorgeous show when few other shrubs are in bloom. Try this rose. There is nothing like it. Perfectly hardy. Strong two-year field-grown plants, $1.00.

Lincoln, Nebraska.

Please send one Sorbaria Stellapeda, the $1.25 size. Your shrubs you have sent are all wonderful, all so healthy looking, and started to grow right away. The rose bushes you sent me last spring have done wonderful, made a great growth.

Yours sincerely,

MRS. I. W. BRADT.

Sutherland Hardy Climbing Roses

While all the climbing roses we offer are hardy under ordinary conditions, we sometimes have extraordinary conditions in Colorado, so, to insure bloom—for climbing roses bloom on the old wood—it is wiser to give some protection during the winter. This may be a covering of burlap, or burlap and straw, or the roses may be taken down and laid on the ground, and covered with brush or earth; care will have to be taken however, to start uncovering early, so that the roses will not start into growth under the covering. About four years out of five they will come through our winters without protection. When they are forming buds use our "Vigoro" fertilizer.

CLIMBING AMERICAN BEAUTY. A beautiful rose with flowers almost as large as the American Beauty, but a more pleasing color, being a rich rose pink, a splendidly formed double rose.

DOROTHY PERKINS. Soft shell-pink flowers borne in great profusion, fragrant and lasting. One of the best climbing roses.

FLOWER OF FAIRFIELD. An everblooming variety of the well-known Crimson Rambler. A most brilliant color and a satisfactory rose as it furnishes flowers over a long period. Each, $1.00.

MARY WALLACE. This is a splendid rose to grow in semi-bush form, for use amongst shrubs, or as a pillar rose. It is one of a new type that will become very popular when better known. It has well-formed semi-double flowers of a bright, clear pink with salmon base to the petals; the flowers are large and generally exceed four inches in diameter; very free flowering.

PAUL'S SCARLET CLIMBER. This is a most gorgeous climbing rose, the flowers are a brilliant scarlet, of good form, semi-double, very freely produced, the plants being literally covered from top to bottom. There is nothing like it. Try this.

ROSERIE. Another new climbing rose that is making many friends; similar in habit and flower to the famous Tausendschon, but a deep and even shade of cerise-pink, or carmine; a strong, vigorous grower and free bloomer.

TAUSENDSCHON. Distinct from any other climber, and one of the finest. The individual flowers are of an elegant and graceful form, semi-double, and a most delicate shade of pink when first opening, changing to a carmine on the reverse of the petals when fully expanded, produced in immense trusses, which are splendid for cutting. One of the very best.

TRIER. Not as tall a grower as most, should be planted with shrubs or grown against a low wall or fence. The foliage is more attractive than that of most climbers, and the large semi-double flowers, in long sprays, are borne in great quantities throughout the summer, each new shoot bearing a spray.

Price of climbing roses, except where noted. Each, 75c; any four for $2.75.
How to Plant Roses

Roses do best in a heavy, clay soil, clay soils are best, but they will do well in a sandy soil if plenty of food is supplied.

They like strong soil, and plenty of food. Well-rotted manure, preferably, though stable manure is nearly as good, should be used in quantity, to the extent of one-third of the whole bed. Dig in more each spring. Roses starve the soil. Dig the manure in 8 or 9 inches deep. Prepare the ground as long as possible before the planting is done, and soak it so that it will be thoroughly settled.

When your roses arrive; if you are not ready to plant "heel in," which is simply laying in a slanting trench and covering with earth. Always keep the roots covered.

Dig each hole so that it is larger than seems necessary, carefully cut off any mangled ends of roots with a sharp knife or pruning shears. If planted in spring remove all but 3 or 4 of the strongest branches, and cut the remaining ones back to 2 to 3 eyes, or buds. If planted in the fall cut back lightly.

Set the plant in the hole, with the roots spread out carefully and packed in. A good, fine earth can be brought into contact with each, and when they are separated fill in good soil, packing it firmly with hands, and when the hole is full stamp firmly with feet. No plant will do well if loosely planted. Water thoroughly after planting, and see that the ground is kept moderately moist, not soggy. A mulch, is not too much, but it MUST BE WELL STABLED. The material should be well rotted and thoroughly stirred into the soil. Dig in more each spring. Roses starve the soil. Dig the manure in 8 or 9 inches deep. Prepare the ground as long as possible before the planting is done, and soak it so that it will be thoroughly settled.

NO plant will do well if loosely planted. Wet earth is kept firm by the roots and stem. A mulch is used, and this is put over the surface. A two inch mulch of our Holtec is good. Plant so that the "crown" of the plant is one inch lower than it was in the nursery, the difference in color on the stem will indicate this.

Hybrid Perpetual Roses should be planted 2 to 3 feet apart. The Hybrid Teas—Everblooming Roses, may be set from 12 to 18 inches apart.

Roses need continuous cultivating. Keep the soil stirred so that it does not cake about them, but do not cultivate deeper than 2 inches, as the soil MUST be firm and tight about the roots and stem. A mulch of dust will keep the hot rays of the sun off the roots. Mr. Robinson, the famous English gardener, records in his "The planting of Pansies, Violets, and Mignonette with roses." We are very partial to Violas,—Viola Cotswold and frequently use Mignonette, but care must be taken that these do not grow too close to the rose plants. When you water, Water, do not "sprinkle." A good soaking once or twice a week will do more good than a "sprinkling" twice a day. Use some of our Vigoro fertilizer every few weeks during the blooming season.

Most of our roses are on their own roots, but where they are budded the name is preceded by an (*). Budded roses should be planted so that the bud, marked "C," is three to four inches below the level of the ground. Hybrid perpetuals are better for deep planting, plant so that surface of ground is midway between "A" and "B." From all Hybrid Perpetuals back to "A" when planted, and Hybrid Teas and Bedding Roses almost as short. If suckers should appear from the roots cut them off at once, close to the main stem. You will know them by their different growth; they have usually seven leaflets, and the stems are more or less covered with small spines. The cut is a fair representation of our average Hybrid Perpetual. Hybrid Teas and Bedding Roses run somewhat smaller. But ALL are large, strong two-year field-grown plants.

Bugs may appear, and may do spray the plants. But the bugs, with arsenate of lead several times told, to June 30, beginning while the plants are dormant. For green aphis spray with a solution of "Black Leaf 40." Follow these directions and you will have roses that you will be proud of. If they are worth spending good money for they are worth proper planting and care.

Our roses are good, strong, 2 year, field grown plants that will bloom freely this summer. Potted plants set out in June, may be in leaf, or even in flower when set out, but they will not give anything like the quantity of bloom the first summer that our field grown plants will; it will take them a year to attain the size our plants are when you receive them.

A very few of our Roses are "budded" and these will be marked with a *. These should be planted with the bud three inches below the surface of the ground, and you can tell from the "crock" on the stem just above the root, where the bud is. See cut of rose bush on this page.

A NEW GARDEN BOOKLET

Have you seen our Garden Booklet: "A CONFIDENTIAL TALK ABOUT YOUR GARDEN"? It tells about the planting of a garden, and shows pictures of many of the gardens we have planted and cared for. The editor of "BETTER HOMES AND GARDENS" says of it: "It is the most outstanding booklet of its kind in America."

No expense has been spared in getting up this booklet in an endeavor to make it interesting and of real value to gardeners; and while it is not for free distribution generally, we WILL send it free to any home owner who is interested in planning his garden.

HOW TO GROW ROSES

HOW TO GROW ROSES, by Pyle, McFarland and Stevens. Makes every step of the culture and care of Roses so clear that any one can understand it and succeed with them. 211 pages, 136 Illustrations, including 45 varieties Illustrated in color, America's most popular rose book. $2.00, postage 12c.

TWENTY EXTRA PAGES GIVEN YOU THIS YEAR

This year we are making you a present of TWENTY EXTRA PAGES in our NEW GARDEN HANDBOOK. We have added twenty pages just in giving additional information about plants that we think will be helpful and interesting to you. A number of our descriptions have had added to them information that has not been contained in our previous Hand Books; and information that is found in few, if any, garden catalogues published in this country. Facts worth knowing about the various plants, and information about them that is found in few, if any, garden catalogues published in this country. Facts worth knowing about the various plants, and information about them that is found in few, if any, garden catalogues published in this country. Facts worth knowing about the various plants, and information about them that is found in few, if any, garden catalogues published in this country.

In addition to that the last three pages in the book are given up entirely to directions that should help you make a success of your gardening. To not pass these last pages by to you they are the most important in the book.
Sutherland Hardy Vines

What To Do With Vines

What to do with a Vine depends upon its habit of growth. For growing on walls there are only three vines that are at all hardy in the middle west. The Englishman Ampelopsis can be depended upon anywhere; it is absolutely hardy. Plant so that it will not cover windows; it is a rampant climber, and will climb all vines away from corners of buildings, or angles, and see that they do not cover any architectural feature. For trumpet wood, walls without support and turns most gorgeous in autumn. Keep it away from windows. Should have a large open wall space. Note in illustration above.

Do Not Overlook The Trumpetcreepers

BIGNONIA—Trumpet creeper

Strong growing vines that require a support on which to grow, a heavy cord or wire, stretched tightly from the cornice of a house to the ground, makes a good support. These are amongst the most showy of the vines. The two Grandiflora varieties are grafted and should be planted with the grafted three inches below the surface. BIGNONIA GRANDIFLOR. (Chinese Trumpet creeper). This is the one shown in our illustration. It has small yellow flowers, and running copper or galvanized wire between them, close enough together so that the vines can readily take hold. Many of the vines appear to best advantage when seen falling over a wall, and when allowed to grow wild on banks and steep terraces. The most gorgeous flowering vine is the Wisteria. Like the Wisteria, these are useful for this purpose, and Ampelopsis Heterophylla is a splendid creeper, and produces the most artistic way of using a vine. These will usually bloom the first year. We have had plants in the nursery not over two feet high with great clusters of orange bloom. The flowers are immense, two to three inches across, somewhat in form like the Nasturtium, and the color is a gorgeous bright orange. Like the Wisteria, Trumpet creepers should be grafted to insure bloom. Strong grafted plants that will bloom this year, each $1.25. A few larger plants at $1.50. See illustration above.

BIGNONIA RADICANS. (Trumpet creeper). A very showy vine with large trumpet-shaped flowers of dark red, with an orange throat. Should not be planted against a house as it will twist all woodwork out of shape. Each, strong plants, 50c; Dozen, $5.00; large plants, 75c; extra large plants, $1.00.

CE LA STRUS—Bittersweet

Woodvines that are particularly adapted for planting on banks, and above walls, also for pergolas, trellises, etc. The brilliant red berries that

AMPELOPSIS

AMPELOPSIS ENG LE MANNI. (English creeper). The best clinging vine for Colorado, absolutely hardy, clings to stone, brick or rough wood walls without support and turns most gorgeously in autumn. Keep it away from windows. Should have a large open wall space. Note in illustration. How it tends to grow over the windows, and how it hides the architectural lines of the building. Strong plants, each 35c; Dozen, $5.00; Extra Size, 75c; Dozen, $8.00.

A New One—Porcelain Ampelopsis

AMPELOPSIS HETEROPHYLLA. (Porcelain Ampelopsis). A vine of moderate growth, with beautifully divided foliage, somewhat on the order of the grape. In fall it has large clusters of porcelain-blue berries. A splendid vine for growing on fences, trellises, etc. for planting above a wall, where its beauty can be seen to best advantage. Strong plants, 75c.

AMPELOPSIS TRICUSPIDATA. (Japanese creeper). Better known as Boston Ivy. The popular clinging vine used in the east; has finer foliage than the Englishman Ivy, and clings closer, the leaves lying almost flat against a wall. Although not hardy in all sections of Colorado it does well in Denver, Boulder, and most of the towns outside of the mountains when given an east or north exposure; on the south or west it will winter-kill. Good three year plants, extra strong, and the only kind worth planting here, each, 75c; Dozen, $8.00.

Do Not Overlook The Trumpetcreepers

BIGNONIA—Trumpet creeper

Strong growing vines that require a support on which to grow, a heavy cord or wire, stretched tightly from the cornice of a house to the ground, makes a good support. These are amongst the most showy of the vines. The two Grandiflora varieties are grafted and should be planted with the grafted three inches below the surface. BIGNONIA GRANDIFLORA. (Chinese Trumpet creeper). This is the one shown in our illustration. And though very little known, it is a good climber, not going so high as Radicans, and is even more gorgeous in its bloom. It is a splendid vine for growing on a bank, or for falling over a wall—really the most artistic way of using a vine. These will usually bloom the first year. We have had plants in the nursery not over two feet high with great clusters of orange bloom. The flowers are immense, two to three inches across, somewhat in form like the Nasturtium, and the color is a gorgeous bright orange. Like the Wisteria, Trumpet creepers should be grafted to insure bloom. Strong grafted plants that will bloom this year, each $1.25. A few larger plants at $1.50. See illustration above.

BIGNONIA RADICANS. (Trumpet creeper). A very showy vine with large trumpet-shaped flowers of dark red, with an orange throat. Should not be planted against a house as it will twist all woodwork out of shape. Each, strong plants, 50c; Dozen, $5.00; large plants, 75c; extra large plants, $1.00.

CE LA STRUS—Bittersweet

Woodvines that are particularly adapted for planting on banks, and above walls, also for pergolas, trellises, etc. The brilliant red berries that
are retained almost all winter are very attractive; and a vine in full bearing may be seen the distance of a city block.

**CELASTRUS SCANDENS.** (American Bittersweet). A vine but little known in Colorado, but one of the best. It is a vine with long branches and is very effective for covering walls, fences, trellises, rocks, or for climbing trees. The foliage is clean and free from insect pests, and the bright berry-like fruits remain on the vine most of the winter, making it a most attractive sight. Extra strong plants, 75c. We have a few very large plants at $1.00 and $1.25.

**SUTHERLAND’S CLEMATIS**

All the Clematis we offer are hardy, and are amongst the most satisfactory for the garden. They are particularly adapted for covering trellises, fences, etc., but should be given a wire, cord or other support around which they can twine themselves. Do not overlook the Clematis Coccinea, although an old plant it is little known, but a beauty. For best results leaf mould and lime should be dug into the soil, and each spring a trowel full of lime should be dug in about each plant, and a winter protection of manure given. Plant so that the crown is three inches below the surface of the ground.

**A SCARLET CLEMATIS**

Do you know there is a Brilliant Scarlet Clematis? It is not at all common, and yet it is one of our most attractive vines.

Clematic Texensis—Scarlet Clematis

**SCARLET CLEMATIS.** The growth is somewhat slender, after the manner of the Jackmani Clematis; has most attractive coral-red, bell-shaped flowers, and is in bloom from June until frost. Most attractive. Each, 65c; Dozen, $6.50.

**CLEMATIS JACKMANI AND HYBRIDS**

These are slender vines with tremendous quantities of enormous flowers in purple, lavender, red, pink and white shades. Jackmani, the best known, is a royal purple, and a most gorgeous flowering vine. They require a fairly rich soil, and a moderate amount of water, but should be given something to climb on immediately, and should be firmly tied to it with soft cloth. The vines are very slender, and are easily broken.

**JACKMANI.** (Jackman Clematis). Large flowers of a rich royal purple, the popular, well-known Purple Clematis. Large field grown plants, Each, $1.50.

**POTTED CLEMATIS**

Some amateur gardeners have trouble starting the large flowered Clematis. Our pot grown Clematis will solve your difficulty; they will be shipped to you in paper pots, and all you have to do is to set them in the ground, pot and all. The pot will soon rot. Plant so that the pots are two to three inches below the surface of the ground.

**HENRYI.** Like the purple variety, but has immense pure white flowers.

**JACKMANI.** The well-known gorgeous purple sort

**MME. EDOUARD ANDRE.** Bright carmine, very free flowering

**RAMONA.** Immense flowers of a delightful shade of lavender blue.

Price of potted Clematis, $1.00.

**FALL BLOOMING CLEMATIS**

**CLEMATIS PANICULATA.** (Sweet Autumn Clematis). Generally known as Japanese Clematis. The hardiest form of the Clematis, makes a vigorous growth of good bright green foliage, and in September is covered with a mass of sweetly-scented, white star-like blossoms. Strong plants.
35c; large, extra strong plants, 50c. We recom-

mend planting the larger size, as the smaller

plants take some time to become established.

EUONYMUS—Euonymus

EUONYMUS RADICANS VEGETUS. (Bigleaf

wintercreeper). An evergreen hardy climber that

will cling to rough walls without support. It has

beautiful, glossy green foliage, held in good condi-
tion all winter, and when well established has

bright orange-red berries that are held on the

plant all winter. A splendid vine for planting

against low foundation walls, or at the base of

all purposes, and. with the exception of Hall's,

the first winter or two. You will find a plant here

everywhere; it is perfectly hardy in any location. We have them

wintercreeper),

HEDRA HELIX. (English Ivy). Unfortunately

this beautiful clinging vine is little known in our

Colorado gardens, and yet it can be grown quite

successfully if properly placed. It should be

grown against a wall on the north side, or north-

east, and should be protected from the west winds.

Give a little covering of leaves or litter (lightly)

the first winter or two. You will find a plant here

and there in most towns of the state.

Strong, field-grown plants, Each, 50c; larger

plants at 75c and $1.00.

LONICERA—Honeysuckle

The Honeysuckles are among the most satis-

factory of our twining vines, and are adapted to

all purposes, and, with the exception of Hall's,

will do well on any exposure. Hall's should be

given an east or north exposure, as it sometimes

kills on the west or south, though, as a rule, it is

perfectly hardy in any location. We have them

out on a fence where they have the full sweep of

the west winds, and have never had one winter-

kill. All of the Honeysuckles are good in foliage,

all have most attractive flowers, some varieties

are sweetly-scented, all attract the humming-birds.

HALL'S FRAGRANT. Pure white flowers, de-

lightfully fragrant, turning to yellow, in bloom all

summer, foliage dark, glossy green, and usually

evergreen. Should be in every garden, if only for

its fragrance. Each, 50c and 75c.

HUCKROTHI. An ever blooming Trumpet Honey-
suckle, one of the finest; has deliciously fragrant

flowers of a dark, rich yellow, shaded chocolate,
in bloom all summer. Extra strong plants, 75c.

The Picture Was Taken About Five Months After

the Vines Were Planted (One on Each Side of

Arch)

WINTERCREEPER),

HENDERSONI. A true everblooming Hone-
suckle, as each new twig bears a large cluster of

small trumpet shaped flowers, which change the second
day to orange red, the clusters are larger and

longer than the Red Coral, more brilliant in color, and

are borne on longer stalks, making them valu-
able for cutting. Extra strong, three year plants,

$1.00.

CHINESE EVERGREEN. Bright showy foliage

of a purplish-green, flowers white, pink and yellow,

fragrant, produced freely all summer. One of the

best. One of our fastest growing plants, as well

as one of the most beautiful. Extra strong plants,

$1.00.

SCARLET TRUMPET. The old favorite Red

Coral Honeysuckle, has large clusters of brilliant

coral red flowers at frequent intervals throughout

the summer, followed by bright red berries re-
tained all winter. Both flowers and berries mak;

attractive decorations. Good strong plants, 50c.

Extra large, 75c.

THE FAMOUS SUTHERLAND

SILVER LACE VINE

It is impossible to say too much in praise of

the Silver Lace Vine; it is without an equal. It

is hardy, a good grower, has attractive foliage,

and several times during the season is a billow-

y mass of creamy, lace-like flowers. There are

two vines on the arch shown in our illustra-
tion, they were planted in May and the picture

was taken in September of the same year. We

believe you will feel no further comment is neces-

sary. It can be grown from seed, and such plants

are being offered, but as a rule they do not bloom.

Ours are made from cuttings. If you want ONE

vine this is the ONE. Strong field-grown plants,

75c; Extra Size, $1.00; Extra Large, $1.50.

LYCICUM—Barbarium

Barbary Matrimony Vine

MATRIMONY VINE. (Lycium Barbaram). "A

nest, half-climbing plant bearing small light pink

flowers in summer, followed by berries which turn
to a beautiful scarlet in the fall, when it is

ev ery ornamental." I read this description, would

not describe it that way myself; I think it coarse,

and it "runs wild;" it is, however, a useful plant

for covering banks and other rough places. Each,

50c; Dozen, $1.50.

AGAWAM. Berries large, sweet, aromatic. A
delicious grape. Each, 35c; Dozen, $3.50.

BETA. For arbors, trellises, etc., this is one

of the best grapes grown. It is a hybrid of a

northern wild grape, originating in Minnesota, in-
suring a very hardy constitution. The foliage is

exceedingly ornamental, and it will produce fruit

where climatic conditions are unfavorable for

grape growing. A splendid vine, as well as a good

grape. One of the best for jellies, etc. Each, 50c.

GONCORDERIA. The well-known grape, 35c.

DELAWARE. Small red fruit, very sweet, 50c.

NIAGARA. Large white fruit of fine flavor, 35c.

WILD GRAPE. The best for trellises and per-
golas, etc., 35c. 35c varieties, $3.50 dozen; 25c varieties, $2.50
dozen; 50c varieties, $5.00 dozen.

A WONDERFUL NEW BLUE MORNING GLORY

See NOVELTIES, etc., page 4.

VITIS—Grape

GRAPES

Grapes are not only amongst the most orna-

mental of vines, but in addition furnish quantities

of luscious fruit. The Wild Grape is most orna-

mental in foliage with the Delaware a close sec-

ond, though all varieties have attractive foliage,

and a delightful perfume while in bloom.

Our grapes are extra strong, 2 year stock, that

will give quick results.

AGAWAM. Berries large, sweet, aromatic. A
delicious grape. Each, 35c; Dozen, $3.50.

BETA. For arbors, trellises, etc., this is one

of the best grapes grown. It is a hybrid of a

northern wild grape, originating in Minnesota, in-
suring a very hardy constitution. The foliage is

exceedingly ornamental, and it will produce fruit

where climatic conditions are unfavorable for

grape growing. A splendid vine, as well as a good

grape. One of the best for jellies, etc. Each, 50c.

GONCORDERIA. The well-known grape, 35c.

DELAWARE. Small red fruit, very sweet, 50c.

NIAGARA. Large white fruit of fine flavor, 35c.

Wordon. The well-known black grape, 25c.

The best for trellises and per-
golas, etc., 35c. 35c varieties, $3.50 dozen; 25c varieties, $2.50
dozen; 50c varieties, $5.00 dozen.

WISTERIA

See NOVELTIES, etc., page 4.
OUR stock is made up of only such varieties as may be depended upon to give the best results under our climatic conditions. Only such varieties are offered as have proven satisfactory after a test extending over a number of years. Our plants are strong and well rooted and will please you. The many Colorado gardens and parks planted with our shrubs will assure you of the value of Colorado-grown stock. See page 43. We do not give the size of shrubs in feet as such a description means nothing. A stocky shrub two feet high is worth three single-stemmed shrubs that frequently are described as "3 to 4 feet." Our shrubs will measure up in value with any in the country. Our small size will usually run about 3 feet—bushy plants, the large size will run about 4 feet. Large bushy plants—we do not send out any small shrubs such as are sent by mail.

Your money back if you are not satisfied.

The botanical name is given first, followed by the common name

Prune Your Shrubs

Most shrubs should be cut back after planting, the amount to be cut back varying with the shrubs. Following the name of each shrub will be found a figure in brackets. (1) indicates cut back one-fourth; (2) cut back one-third; (3) cut back half, or more. Indian Currant and Japanese Barberry will do best when cut to within six inches of the ground.

Do not overlook the directions for preparing the ground, planting and care of shrubs on page 55. You should thoroughly understand about the requirements of plants before planting. We have added a large number of pages to our Garden Handbook for the purpose of helping you to Success in Planting.

Shrubs or Shrubbery

Are you planting shrubs or "shrubbery?" What you select and the quantity you will require will depend upon how you decide this. We have explained the difference in our articles on Planting, beginning on page 52. Be sure and read "Shrubs or Shrubbery" on page 57 before you order. It will help you decide.
BUDDLEIA—Summer Lilac (3)

BUDDLEIA. (Summer Lilac). This has been commonly known as 'Summer Lilac,' but 'Buddleia', the fly bush' is the accepted common name. A most attractive shrub with flowers of a pleasing shade of violet-mauve in dense spikes, borne in profusion from July to frost. Should be cut to the ground and allowed to come from the root each year. The Buddleia is most profuse in bloom, and the flowers are excellent for cutting, may be used in a flower bed as well as with shrubs. Strong 2-year plants, Each, 50c; Dozen, $5.00. Extra large size, 75c.

CARAGANA ARBORESCENS

Siberian Pea (1)

A tall, tree-like shrub with bright yellow pea-shaped flowers. Very handsome. Will grow 10 to 12 feet if given a fairly dry, sunny exposure. Each, 50c; Dozen, $5.00; Larger size, 65c; Dozen, $7.00.

CORNUS—Dogwood (3)

Rather large shrubs with attractive foliage that turns beautifully in autumn, flat heads of white flowers followed by blue or white berries. The stems of most make an attractive effect in the winter as they vary in color from purple to brilliant blood-red. A few of the older stems should be cut off to the ground each spring to induce new growth, the new stems always being the brightest in color. A planting of the various sorts will make a much-enjoyed corner in your shrubbery. About 6 feet.

ALTERNIFOLIA. (Pagoda Dogwood). White flowers, followed by blue berries. The habit of growth of this Dogwood is quite distinct, the branches being arranged in irregular whorls, forming flat, horizontally spreading tiers. Makes a splendid specimen plant. Each, 75c; Dozen, $7.50.

BAILEYI. (Bailey Dogwood). Similar in habit to C. Siberica, has dark red branches in winter, and is in bloom nearly all summer. The fall color of the foliage and winter color of twigs are unequalled. The best variety of dogwood for fall and winter effects. Each, 75c; Dozen, $8.00.

GOLDEN TWIG DOGWOOD. Not so tall as most other sorts, the bright golden-yellow twigs are very distinctive in the winter garden, and it makes a splendid contrast when planted with Coral or Bailey's Dogwood. Large plants, 75c; Dozen, $8.00.

SIBERICA. (Coral Dogwood). This has the brightest bark of any shrub, being a deep, bright blood-red during the winter and spring months and brilliant red fall foliage.

SPAETHI DOGWOOD. Another variety with bright red branches in winter but unlike all others, the leaves are broadly edged yellow. One of the best variegated shrubs. Each, $1.00; Dozen, $10.00. Price of Dogwood, except where noted, One, 60c; Dozen, $6.50; Larger, 75c; Dozen, $8.00.

COTONEASTER—Cotoneaster

ACUTIFOLIA. (Feking Cotoneaster). Large, upright, dense shrub, dark green leaves, flowers in nodding corymbas in May and June, followed by attractive purplish-black fruits in September. An unusual and attractive shrub. Each, 75c; Dozen, $7.50; 12 feet.

CORYLUS—Hazelnut

AMERICANA. (American Hazelnut). An ornamental and useful shrub, as it bears quantities of edible nuts. Grows 3 to 8 feet. Each, $1.00; Dozen, $10.00; Large Clump, $2.50; Extra Large Clumps that have borne fruit, $5.00.
EUONYMUS—Strawberry Bush

Burning Bush

These shrubs are particularly adapted for use as lawn specimens. They are tree-like in form, and have very attractive foliage that turns such brilliant colors in the fall as to give them the name of Burning Bush. They also have quantities of red or yellow strawberry-shaped fruits that remain in good shape on the bushes most of the winter, and make the leafless plant almost as brilliant as when in its full glory of fall color.

ALATUS. (Winged Euonymus Bush.) A handsome shrub six to eight feet tall, with most picturesque corky-winged branches, and foliage that turns to glorious shades in autumn. Makes a splendid specimen shrub. Strong plants, Each, $1.00; Dozen, $10.00. Large plants, $1.50; Dozen, $15.00.

TROPICPURPUREUS. (Wahoo). A large shrub, 8 to 10 feet, attractive foliage, turns orange and scarlet in autumn, fruit bright red, retained until mid-winter. The foliage on this is retained very late. In a warm spot south of my house the foliage was still showing in all its brilliance well on in December this year. Each, $1.00; Dozen, $5.00.

BUNGEANUS. (Winterberry Euonymus). A large shrub growing eight to ten feet in height, native of China, leaves two to four inches long, fruit deep red, with orange arils. Very showy. Gorgeous fall effects. Strong plants, Each, $1.00; Dozen, $10.00. Larger, $1.50. A few large clumps, $5.00.

EUROPAEUS. (European Burning bush). One of the best varieties, splendid autumn foliage, and brilliant colors in the fall as to give them the name of Burning Bush. Each, 75c; Dozen, $8.00. Smaller size, Each, 60c; Dozen, $6.50.

FORSYTHIA—Golden Bell (2)

Forsythias are large growing shrubs and should be given plenty of room; they are amongst the best for planting on banks and terraces, but are too large for foundation plantings. In early spring before the foliage appears they are smothered under clouds of bright yellow flowers, making a wonderful effect at a time when flowers are scarce.

HIBISCUS SYRIACUS—Shrub Althea, Rose of Sharon

A large growing shrub which makes an attractive ornament for the lawn or to use back of smaller shrubs. In August it is covered with large flowers shaped like Hollyhocks and are both single and double varieties in a great assortment of attractive colors. Purple, pink, red and white. Each, 55c; Dozen, $7.00. Large shrubs, $1.00 and $1.50.

HYPERICUM—St. Johnswort

Although one variety of St. Johnswort, Aureum, is the brightest yellow and the freest flowering of all Forsythias, it is the brightest yellow and the freest flowering of all Forsythias.

SUSPENSA. (Weeping Forsythia). Has long arching branches almost like a vine; splendid for growing on banks or above walls. Each, 65c; Dozen, $7.00. Price of Forsythia, except where noted, Each, 60c; Dozen, $6.50. Extra large stock, Each, 75c; Dozen, $7.50.

WONDROUS Masses of FLOWERS

Shrubs with wonderful masses of flowers are rather unusual in Colorado. We have been somewhat careless about recommending Hydrangeas to those people who have not been very successful with them. The lack of success we believe is mostly due to our western hurry; we are not willing to wait for anything; results must be immediate. It usually takes several years to establish Hydrangeas here, as the tops will frequently winter-kill the first year or two. They will, however, come up from the roots and will eventually become established. Fortunately they bloom in the new wood so winter-killing is not so serious after all. Do not plant shrubs of dainty foliage where an ornamental effect is desired as their foliage is rather coarse.

HYDRANGEA

PANICULATA GRANDIFLORA. One of the most popular shrubs of the east, and does well in Colorado if protected from west winds; has large panicles of white flowers that later assume shades of rose; the showiest shrub in cultivation. Each, 75c; Dozen, $7.50. Extra large plants at $1.50 and $2.00 each.

HYDRANGEA. (Arborescens Sterile). Hills of Snow. A handsome variety, harder in Colorado than Paniculata. Has large panicles with white flowers well into the greater part of the summer. Each, 75c; Dozen, $7.50. Extra large plants at $1.50 and $2.00.

HIBISCUS SYRIACUS—Shrub Althea, Rose of Sharon

A large growing shrub which makes an attractive ornament for the lawn or to use back of

Hydrangea, Hills of Snow

A Mound of Flowers Six Feet High, and Almost as Broad. In a Boulder Garden
which may be done at any time, and almost regardless of how it is cut the effect of the shrub is always graceful. This is amongst the shrubs that I have used in front of my own house. Seedlings do not have graceful, arching habits. Ours are grown from cuttings and are the true variety. Each, 50c; Dozen, $5.00. Large, 65c; Dozen, $7.00.

PRIVET HEDGES

See page 44.

LONICERA—Bush Honeysuckle

Large-growing shrubs with masses of pink or white flowers in early spring, followed by bright red or yellow berries. Give them plenty of room as they will often grow to an immense size. They need six to eight feet and could use more. Too large for foundation plantings unless in connection with a very large house. They are, however, very attractive shrubs, with their vast quantities of fragrant flowers in the spring, which are followed by bright red or yellow berries, some of them, like Maackii, retaining their fruit all winter. Lonicera is also a useful hedge plant. See Hedges, page 44.

MORROWII. (Morrow Honeysuckle). A graceful, somewhat arching shrub, medium height, with bluish-green foliage. Its brilliant scarlet fruits are particularly attractive in the early fall.

PINK TARTARIAN HONEYSUCKLE. Masses of bright pink flowers, yellow berries.

WHITE TARTARIAN HONEYSUCKLE. Similar to above, but has white flowers.

BUPEECHIANA. (Manchurian Honeysuckle). A large shrub with white flowers turning to yellow; great quantities of red or yellow berries. Very showy. Each, 75c; Dozen, $8.00.

Price of Honeysuckle, except where noted, Each, 60c; Dozen, $8.50. We have a few extra large plants of Pink Tartarian at $1.00.

THE MOST BEAUTIFUL HONEYSUCKLE

See NOVELTIES, etc., page 4.

PHILADELPHUS—Mock Orange

There were no greater favorites in the old-fashioned gardens than the fragrant Mock Oranges; they rivalled the Lilac in popularity. We are offered a number of varieties, differing in foliage, in height of flower, and in time of bloom. Plant a clump of these beautiful shrubs and you will be delighted with them. The flowers are splendid for cutting and most of them are delightfully fragrant.

AVANALOCH. Large fragrant flowers on slender gracefully arching branches.

CORONARIUS. The old-fashioned sweet-scented Mock Orange, forms a large bush and attains a height of ten feet. Large, white, delightfully fragrant flowers. Good stock, 65c; large strong bushes, 75c. Some extra sizes at $1.00 and $1.50.

GORDONIANUS. (Gordon Mock Orange). A vigorous grower and a profuse bloomer. Large fragrant flowers, blooming later than other varieties, particularly valuable on account of its late blooming. A very showy and floriferous variety of moderate growth, not attaining a height of 4 to 5 feet; flowers white, in short racemes, very fragrant, and literally covering the branches. Price of Philadelphus, except where noted, Each, 65c; Dozen, $7.00.

FOUR SPECIAL PHILADELPHUS

See NOVELTIES, etc., page 4.

THE MOST BEAUTIFUL MOCK ORANGE

See NOVELTIES, etc., page 5.

PHYSOCARPUS—Nine Bark (3)

MONOGYNUS. A dainty dwarf Ninebark with small, attractive foliage, and quantities of white flowers in pinck clusters in July. An unusually interesting shrub, and one of the most beautiful of the smaller shrubs. Each, 75c; Dozen, $7.50.

OPULIFOLIUS. (Common Nine Bark). Formerly classed as Spiraea Apulifolia. A rather large shrub with white flowers resembling cherry blossoms, in midsummer, followed by bright red seed pods. An elder planted back of this makes a good combination. Each, 50c; Dozen, $5.00; a few extra sized plants at 75c; Dozen, $7.50.

GOLDLEAF NINE BARK. A striking variety with bright yellow leaves, changing in summer to golden bronzey yellow. Personally I do not care for "Goldleaf" shrubs, but if you choose them this is a good one. Each, 60c; Dozen, $6.00.

POTENTILLA—Cinquefoil

FRUTICOSA. (Shrubby Cinquefoil). A semi-dwarf shrub with small foliage, and numerous bright yellow flowers produced freely all summer. Each, 75c; Dozen, $7.50.

THE BEST PINK FLOWERED SHRUBS

See NOVELTIES, etc., page 5.

PRUNUS—Flowering Cherries, Plums, Almonds

This group contains some of the most showy of the spring flowering shrubs, with well-known Flowering Almond being included. The Flowering Almond, Double Flowering Plum and the Purple Leaf Plum are all grafted, and should be planted below the graft. Watch for suckers coming from the base of the plant, and cut off close to the trunk immediately, for if allowed to grow it will kill out the real plant. These have mostly been grafted on Peach, which is not hardy in Colorado; our stock is on wild plum, and is quite hardy.

GLANDULOSA. (Flowering Almond). This well-known shrub has beautiful rose-like double flowers in pink or white, which appear in spring before the leaves. White or pink, each, 2 to 3 feet. 75c: 3 to 4 feet, $1.00. We have a few very large shrubs at $2.00 to $5.00 each.

A STRIKING NOVELTY—SIBERIAN FLOWERING ALMOND

A wonderful dwarf Flowering Almond from Siberica, with profuse masses of lovely pink and white flowers, completely covering the shrub. Being dwarf in habit it can be used where there is not room for the taller growing Flowering Almond. It is only about three feet in height; has good fall foliage in shades of red; and is the only striking dwarf flowering shrub that can be grown in the mountain states.

Heavy 2 to 3 foot bushes........................................ $2.00

Heavy 18 to 24 inch bushes..................................... 1.50

THE SUTHERLAND LANDSCAPE AND NURSERY COMPANY, BOULDER, COLORADO
PADUS. (European Bird Cherry). A large tree-like shrub, with foliage similar to the Chokecherry, but larger and broader, and which turns to gorgeous shades of orange in the spring and in fall has masses of creamy-white fragrant flowers, followed by berries similar to the Chokecherry. 75c and $1.00; Dozen, $8.00 and $10.00.

PISSARDI. (Purple Leaf Plum). See Tree Department.

TRILGBA. (Flowering Plum). More tree-like in habit than the Flowering Almond, has good foliage, and in early spring is covered with small double rose-like flowers of a brilliant deep pink. Very showy and attractive. 2 to 3 feet, $1.00; Dozen, $10.50. 4 to 5 feet, $2.00; Dozen, $20.00.

VIRGINIANA. (Choke Cherry). A large growing shrub with splendid fall foliage, one of the finest shrubs for fall effects, shades of scarlet and white fragrant flowers, followed by the black cherry-like fruits that make delicious jams and jellies. A group made up of Prunus Virgiana and Padus make a gorgeous fall effect. Both varieties are splendid at all seasons; and the birds will relish the fruits if they beat you to them. Each, 75c; Dozen, $8.00. Small size, 50c; Dozen, $5.00.

THE FINEST OF THE WHITE FLOWERING SHRUBS

See NOVELTIES, etc., page 5.

DO NOT THINK!

This is not intended to suggest that you do not think—we know you do, or you would not be reading our catalogue—but we merely wish to call your attention to the fact that you must not think of “Rose Species” (Wild Roses in various parts of the world) as Roses in the usual sense of the term. Most of them do not have double flowers, a few have semi-double, and most of them have single flowers. Think of them as SHRUBS, and beautiful shrubs that have their place with other shrubs in the shrub border, and for foundation plantings. Once, in making a shrub planting I used one of our most beautiful wild roses, Blanda, and was accused of using “inferior Roses,” as the party for whom the planting was done could only think of “roses” as double flowered garden plants. Hybrid Perpetual, Hybrid Tea, and roses of that class have NO place in shrub planting. You will find all the varieties listed here to be splendid varieties, having long and bright red fruits that remain on the bushes until spring. The Staghorn and Cut Leaf Staghorn become too large for the small garden or for Foundation Plantings unless kept cut back. They may be cut at any time.

Some Shrubs Have Beauty

Some Shrubs Have Beauty, Some Have Utility, Some Have Both. Ribes, Flowering Currants, being that last three, do you know what a wild currant pie is like? Oh, Boy! with a cup of coffee you can't beat it.
RIBES—Flowering Currants (2)

ALPINUM. (Mountain Currant). A dwarf variety with upright racemes of golden-yellow flowers, followed by deep scarlet fruit. A handsome small shrub, and makes a splendid small hedge.

Each, 50c; Dozen, $6.00; Hundred, $30.00.

YELLOW FLOWERING CURRANT. (Aureum). A spreading shrub with masses of yellow fragrant flowers in spring, good fall colors. Fruits make the finest kind of jam and pie. Each, 50c and 65c; Dozen, $5.00 and $6.50.

WILD BLACK CURRANT. (Ribes Floridum). This is one of our handsomest shrubs, has very attractive foliage and bears beautiful in summer. Very effective on banks, and for planting amongst taller shrubs, where it will fall in amongst them in a delightful billowy way. The berries have the flavor of the English Black Currant. If you don't know what these are you have missed half your life.

The black currant is also used for making a drink similar to grape juice; this with English plum cake will make you think of the picnic dinners Dickies describes. Just think! A beautiful shrub, delicious pie, and an ambrosial drink for 75c.

Large shrubs, Each, 75c; Dozen, $7.50.

ROBINIA HISPIDA—Rose-Acacia

A hardy shrub somewhat like the Pink-Flowering Locust in appearance. The flowers are very large, borne in rose-purple, large and showy, blossoming for several weeks. A very attractive plant. Each, 75c; Dozen, $8.00.

SALIX—Willow

FRENCH FUSSY WILLOW. The shrub Willow with large catkins, the largest you ever saw. 75c.

SAMBUCUS—Elder (3)

The Elders are well-known, all have large heads of creamy flowers, followed by berries that are much appreciated by birds and are frequently used for pies and jellies. A splendid background shrub.

ACUTIFOLIA. (Cut Leaf American Elder). Fern Leaf Elder. A form with delicately cut foliage, making a billowy mass of soft green foliage, surrounded by large heads of creamy-white, fragrant flowers. Highly recommended as a substitute for the common "Cut Leaf Elder." The Fern Leaf Elder is a class by itself. Each, 65c; Dozen, $6.50. A few large plants at 75c.

CANADENSIS. (American Elder). Makes a large shrub, should be used in the background; has large heads of creamy-white, fragrant flowers. Each, 50c; Dozen, $5.00. Larger plants, 65c; Dozen, $6.50.

GOLDEN ELDER. "The golden foliage of this makes it most attractive, a very showy when planted with other shrubs." This is the usual description. Personally I think it in bad taste, but if you like "leggy" in shrubs, here it is. Each, 65c; Dozen, $6.50.

PUEBENS. (Scarlet Elder). A splendid red-berried variety of the Elder. Has the same splendid heads of white flowers, followed by brilliant red berries. Very showy. Each, $1.00; Dozen, $10.00.

SHEPHERDIA ARGENTE—Silver Buffaloberry

A large growing shrub with beautiful silvery-grey foliage, somewhat similar to the Russian Olive; has large quantities of bright red or orange berries in the fall. The berries are of a very pleasing, somewhat acid flavor, and are good for jellies, juices, etc., as well as for eating out of hand. Does well at high elevations. Each, 75c; Dozen, $8.00.

ARISTOCRATS OF THE GARDEN

SORBARIA—False Spirea

See NOVELTIES, etc., page 5.

FERNS—Fernleaf Elder. Sambucus Acutifolia. One of the Most Graceful, as well as One of the Most Showy of the Larger Shrubs.

SPIRAEA

The Spiraea form a large group of our best garden shrubs, with a great variety of flower and foliage. The well-known Bridal Wreath belongs to this group. The spring-flowering group are well adapted for base plantings around houses, etc., as are also the Sorbaria, which beautifully were classed with Spiraeas. If the early Spiraeas are closely pruned immediately after blooming the foliage will become more feathery and the quantity of bloom for the following year greatly increased.

EARLY FLOWERING SPIRAEAS

AITCHISONI. See Sorbaria Aitchisoni.

BRUNIFOLIA. (Bridal Wreath). This is the variety that is known in the east as Bridal Wreath. It flowers but sparingly in Colorado, and as the foliage is not as attractive as the Van Houtet, Multiflora and Thunbergi, growing tall and somewhat spindily, we do not recommend it. Each, 75c; Dozen, $8.00.

THE BEST "BRIDAL WREATH"

See NOVELTIES, etc., page 5.

SPIRAEA MULTIFLORA. (Snowgarland). This is the best early white Spiraea, has splendid foliage, which assumes lovely fall colors, and in spring is literally smothered under masses of pure white flowers, making it a "Garland of Snow." It is about the same height as the well-known Van Houttel, and makes a good companion for it, as it blooms several weeks earlier. If pruned back severely immediately after blooming, it will feather out very quickly, with thicker foliage and more bloom for the following season. Should have Japanese Barberby, or some other dwarf shrub planted in front of it, as it is what we call a "leggy" shrub. The plant usually sent out under this name is "Arguta;" it is much easier to propagate, but it is practically worthless here. Our stock is grown from cuttings, and is the true variety. Each, 75c; Dozen, $7.50. A few larger plants at $1.00.

SORBARIA STELLAPAP. See Sorbaria Stellapada.

THUNBERG. (Thunberg's Spiraea). A beautiful dwarf sort with flowers similar to Van Houttel, coming early in the spring. If it had no flowers at all I would consider it one of our best shrubs, as it has very dainty foliage, turns beautifully in the autumn, and holds its foliage later than any shrub I grow. Last fall it was in full leaf well into December when every other shrub had long been bare. Each, 65c; Dozen, $7.00.
VANHOUTTEI SPIRAEA. This is the variety that is known in Colorado as "Bridal Wreath" and is one of the best shrubs, as well as one of the most popular. If it grows too high it may be pruned back immediately after blooming, when it will feather out at once and make a graceful effect, and will also set more abundant bloom buds for the following season. Do NOT cut it off straight across the top, but try to maintain the rounding form of the shrub. Also do NOT cut off the smaller stems that come from the root. They are the ones that lend grace to this shrub.

Good stocky plants, 2 to 3 feet, 50c; Dozen, $5.00; 3 to 4 feet, 65c; Dozen, $6.50; 4 to 5 feet, 75c; Dozen, $7.50. Large clumps, $1.00 to $2.50. These are ALL good stocky plants; all you can ask for.

KOREAN SPIRAEA
See NOVELTIES, etc., page 5.

THE BEST PINK SPIREAS
See NOVELTIES, etc., page 5.

SUMMER-FLOWERING SPIRAEAS
There are so few summer-blooming shrubs in our gardens that most gardeners will welcome our large list of summer-blooming Spiraeas; some of them like Margaritae, Callosa Alba, Frobelli and Douglsai continuing well along into September.

BILLARDI. A hybrid variety 4 to 5 feet high with bright pink flowers in long dense panicles. Very showy and attractive and fine for cutting.

BUMALDA, ANTHONY WATERER. A dwarf variety with bright rosy-crimson (I call it magenta) flowers all summer. Though I don't care for magenta flowers, this is quite effective when planted in front of deep green foliage and kept away from other colors.

CALLOSA ALBA. A pretty little dwarf variety with flat heads of pure white flowers, borne continuously through the summer if the faded blossoms are picked. A fine plant for the edge of the shrub border.

CALLOSA SUPERBA. A tall variety. Has flowers of a pleasing shade of pink. Each, 75c; Dozen, $7.50.

Price of Summer-blooming Spiraea except where noted. Each, 50c; Dozen, $6.00. These are good strong plants.

SYRINGA—Lilac

Although our Colorado seasons are not always favorable for the Lilac we all have such a sentimental attachment to this wondrously beautiful and delightfully fragrant flower that when we do have a favorable spring we feel amply repaid for the little care they have been. If Lilacs are pruned immediately after blooming they will make new growth at once and will set a fuller crop of blossoms for the following season. Plant where they will be protected from the sun in the early spring. Another good plan to insure bloom is to dig a trench about them during the winter, fill it with water and when it has frozen solid put a heavy mulch of leaves or litter on the ground so that the frost will be retained as long as possible. This will retard the budding process, and will usually insure bloom.

If given a rich soil and some lime Lilacs will grow more luxuriantly and bloom more profusely.

LILAC

JAPONICA. (Japanese Tree Lilac.) This makes a tall symmetrical tree-like shrub, with clusters of white flowers in June, long after other Lilacs are gone. Is never caught by the frost. It makes a handsome lawn ornament. Each, $1.25 and $1.50; Dozen, $12.00 and $15.00.

PERSICA. (Persian Lilac). Makes a much more attractive shrub than the common Lilac, and has very dainty loose clusters of light purple flowers. Each, 75c and $1.00; Dozen, $8.00 and $10.00.

CHINENSIS. (Chinese Lilac.) This has the same good foliage as the Persian Lilac and beautiful deep reddish-purple flowers. The most attractive of this type. Each, $1.00 and $1.25; Dozen, $10.00 and $12.50.

VULGARIS. (Common Lilac). The old-fashioned purple fragrant Lilac beloved by everyone. Each, 50c, 75c and $1.00; Dozen, $5.00, $8.00 and $10.00.

NEW FRENCH HYBRID LILACS
These are great improvements on the common Lilacs in color, size of both flower and truss; the common sort usually has to attain some age before blooming, while these frequently bloom when less than two feet in height. If you plant Lilacs be sure to include these beautiful hybrids.

ALPHONSE LAVALLEE. An attractive shade of lavender-blue.

CHARLES X. A bright reddish-purple. Fine.

LUDWIG SPAETH. Very dark crimson-purple, one of the darkest and most beautiful single sorts.

MARIE LEGRAVE. A beautiful single white with immense flowers.

MME. CASIMIR PERIER. The best double white, very large flowers.

PRES. GREVY. A beautiful blue, individual flowers very large and double; the panicle is magnificent; one of the finest Lilacs.

Price of New French Hybrid Lilacs. Small, $1.00; Medium, $1.50; Large, $2.00. Large clumps, we have large clumps of some of these varieties, and shall be glad to quote prices.
AND YET AGAIN—FALL COLOR

For fall color, both in foliage and fruit, it is hard to beat the Viburnums. We have a new variety we hope to offer in a year or two. The fall colors are the loveliest I ever saw. Any lady who could reproduce these on her fall hat could never be torn away from her mirror.

VIBURNUM (1)

The Viburnums are amongst the most attractive of our shrubs; personally I prefer them to any, as they have so many good qualities. They all have good foliage that turns most attractively in autumn, large heads of white flowers followed by red, blue or black berries that are carried well into the fall, and in the American form of Viburnum Opulus, all winter. They are large-growing shrubs, and should be planted back of most other sorts. The well-known Snowball belongs to this family, and in my opinion, all of the other varieties are much more attractive than this favorite.

AMERICANUM. An American variety of the High Bush Cranberry, and superior to the European sort. The foliage turns to a brilliant scarlet in autumn, making a regular bush of fire, and the berries are held until late spring. Scarce. Each, $1.00 and $1.25.

THE SHOWIEST HARDY FLOWERING SHRUB

See NOVELTIES, etc., page 6.

SYMPHORICARPUS—Snowberry (3)

RACEMOSA. (Snowberry). Somewhat taller than the Indian Currant, and has clusters of snow-white berries that are held until late in the fall. One of the most attractive of the berried shrubs. These make a most attractive display in the garden in October and November, and also make good decorations for the house, as they keep well after being cut. Used with the red berries of the Coralberry and Bittersweet the effect is very pleasing. Each, 50c; Dozen, $5.50. Larger, 60c; Dozen, $6.50.

VULGARIS. (Coralberry). Grows two to three feet in height, has very attractive foliage that is held well into the winter, and quantities of deep wine-red berries. Each, 40c; Dozen, $4.50; Larger, 50c; Dozen, $5.50.

TAMARIX (2)

Large shrubs with beautiful feathery foliage, something like the Cedar in effect, and dainty flowers in racemes in May and June. Flowers may be dried and kept all winter. Splendid for cutting. See illustration.

PENTANDRA. Has deep carmine flowers, the brightest of the family. Scarce. Each, 60c; Dozen, $6.50. Larger, 75c; Dozen, $8.00. Some very large plants at $1.00.

ODESSANA. A fine variety with light pink flowers. Each, 60c and 75c; Dozen, $6.50 and $8.00.

DID YOU KNOW?

Did you know that you could cut long branches of bloom of the Tamarix, and that it would dry and keep all winter, retaining its bright carmine-pink color? It will. I have a large bunch of it now, in January, and it looks just as bright as it did when cut. These are the most attractive "dried" flowers I have ever seen. They make a splendid combination with our Eulalias. (See page 16.

BE SURE TO READ DIRECTIONS FOR PLANTING BEGINNING ON PAGE 55.
Viburnum Dentatum in Its June Glory. Berries Similar to Those of Lantana Follow the Flowers.

**DENTATUM.** A bushy sort with an abundance of white flowers in June, which are followed by blue-black berries. Fine fall colors. See illustration above.

**LANTANA.** A large shrub with pretty wrinkled leaves that turn a deep plum color in autumn, large clusters of white flowers, followed by bright red berries, which turn to black as they ripen. If you want to see young robins “stuff” themselves, watch them on a bush of Lantana.

**LENTAGO.** One of the best, becomes almost a small tree, white flowers, blue-black berries held over until spring, and very brilliant orange-red fall foliage.

**OPULUS.** (High Bush Cranberry). Similar to the Snowball, but has flat heads of flowers, followed by red berries. Good fall colors.

**OPULUS STERILIS.** (Snowball). The well-known Snowball. Each, 75c and $1.00.

**PRUNIFOLIUM.** (Sheepberry). A large growing tree-like shrub with flat clusters of white flowers followed by black berries, attractive fall colors.

Price of Viburnums, except where noted, Each, 75c and $1.00; Dozen, $8.00 and $10.00.

**WEIGELA (1)**

Most attractive shrubs four to six feet in height, with large beautiful flowers of red, pink or white, the pink being the most attractive. Although the time of bloom is usually in May or June, they frequently have some flowers throughout the entire summer. Should be protected from west winds. See illustration, page 35.

**CANDIDA.** Large pure-white flowers.

**EVA RATHKE.** Brilliant crimson flowers, ever-blooming. A gorgeous shrub when in bloom. $1.00.

**FLORIBUNDA.** (Crimson Weigela). A beautiful variety with crimson-red flowers, a stronger grower and harder than Eva Rathke.

**ROSEA.** A beautiful rose-pink. The best pink. Price of Weigela except where noted, Each, 75c; Dozen, $3.00.

“A CONFIDENTIAL TALK ABOUT YOUR GARDEN”

This is the title of a booklet telling about the planning of a garden. The editor of Better Homes and Gardens says, “it is the most outstanding booklet of its kind in the country.” It is beautifully illustrated. If you are interested in planning a garden we shall be glad to send you a copy, free.
An enclosure of some kind for the garden or grounds is often desirable; and in many cases a hedge is preferable to a fence. The English type of house almost demands a hedge; and a house of formal style appears more in character when enclosed by a hedge. Hedges also make attractive backgrounds for flower gardens; and they may also be used to good advantage along walks, drives, etc. You will find a few suggestions for hedges. If a flowering shrub is used do not expect it to bloom if kept clipped, as the flowering wood is then lost. Uncipped hedges are often preferable, and when left to grow naturally you will have full advantage of the bloom. Spiraeas, Barberries, Snowberries, certain Roses and Lilacs may be used for this purpose.

TRIMMED HEDGES

A well-kept hedge makes an attractive enclosure for the lawn in front of a residence, and also for enclosing any formal part of the garden. For this purpose our Polish Privet is the best "Trimmed Hedge" for Colorado. The California and most other Privets sold here are not hardy. Privet should be planted one foot apart, or if a thick hedge is wanted quickly, plant two rows one foot apart. Within a few inches of the ground; then cut back the plants have stood in the row, and cut back to two or three inches when the hedge is wanted quickly, plant two rows one foot apart, with the plants one foot apart in the rows, and their many forms and textures make them delightful subjects for all types of garden ing. They take away the look of "newness" from the garden during the four or five months when all other foliage is gone. They make splendid Specimens for large lawns, parks, etc., and for use in marking formal notes in the garden they are in a class by themselves. Do not have a garden without Evergreens. Some are small and for use in our gardens, parks and greens are Pines, or all are Spruces. I planted some in a small, illustrated booklet, telling how to plant evergreens, and how to use them effectively. Free to our customers.

Sutherland Evergreens

WHY EVERGREENS IN THE GARDEN

What does "Evergreen" suggest to your mind? To some it means the mountains, to others it suggests a cemetery; to people who know, it suggests the most beautiful trees and shrubs "nature" has provided for use in our gardens, parks and grounds.

All Pines are Evergreens, but not all Evergreens are Pines, or all are Spruces. I planted some in a well-known Denver garden, and some visitors to the garden asked me to settle a dispute as to form the garden during the four or five months when all other foliage is gone. They make splendid backgrounds for flower gardens, and they can be used for hedging, or in place of grass, or for use in marking formal notes in the garden they are in a class by themselves. Do not have a garden without Evergreens. Some are small and for use in our gardens, parks and grounds.

THE SUTHERLAND LANDSCAPE AND NURSERY COMPANY, BOULDER, COLORADO

RUSSIAN OLIVE.

Makes an attractive large hedge. The foliage is small, is a good color, makes a dense hedge, and when established will turn cattle, as it is very thorny. These hedges for country places. Should be trimmed. Good, strong plants, $15.00 per hundred; extra strong plants, $25.00 per hundred.

Cherry Hill Country Club, Denver, has a fine hedge of Russian Olive furnished by us.

ANOTHER SPLENDID HEDGE

Another splendid large hedge can be made with Hawthorne; in fact, they make the most beautiful large hedges; and as they are very thorny animals could not get through them. Even a dog would give them a wide berth. Should be trimmed. Plants suitable for hedges, $30.00 per hundred.

DID YOU EVER SEE A BOX HEDGE?

Did you ever see a Box Hedge? All of the old colonial gardens had the flower beds enclosed by box hedges. It has been the ambition of all lovers of the formal in gardens to have a box hedge; but this has been impossible in this country except in the South. But we can now have them. Our new hardy privet hedge will do all that the Box does. It is just as dense; and makes a delightful little hedge that can be kept as low as six inches. Never can we have a box hedge faster. We have been building up a stock of this since it was first introduced about five years ago and can now offer it as low as the common privet.

LOWDENSE PRIVET.

The new hardy privet for Box Hedges. Extra strong plants, $25.00 per hundred; strong plants, $15.00 per hundred.

VINES AS HEDGES

An attractive flowering hedge may be made by stringing poultry wire between posts and covering it with Honeysuckle and then keeping them clipped rather close. The best varieties for this purpose are Hall's and the Chinese Evergreen. Ampelopsis and Clematis Paniculata may also be used but are more ragged in appearance. We can furnish small sizes of these vines with the exception of the Chinese Evergreen Honeysuckle suitable for such hedges at $25.00 per hundred.

NEVER be allowed to dry out. They will keep in good condition this way for some days if kept moist. DRYING ONCE IS FATAL.

Do not use manure of any description around evergreens. In the fall hay, leaves or straw should be applied as a mulch and then dug in in the spring. Water frequently and keep the ground well cultivated.

OUR EVERGREENS ARE SUITABLE TO GROW

Our evergreens have been frequently transplanted in our nursery, and when delivered to you they are dug with a ball of earth securely wrapped and tied so that the earth cannot become loose around the roots. The proper soil is piled and planted they will grow—without exception.

JUNIPERUS—Juniper

The Junipers, Cedars as we are accustomed to calling them, have many forms and habits, so that we can select a Juniper that will be appropriate for any position or purpose. Some are prostrate, trailing along the ground, others are more upright, and are adapted for use in connection with shrubs, others again are tall and columnar in form, and make trees of considerable height, but they are all beautiful and worthy of a place in the smallest garden or the largest estate.

PYRAMIDAL CHINESE JUNIPER. (J. S. communis). This is an upright, narrow, semi-dwarf and spreading. The foliage is bright green or a blue-green all winter. This is the best cedar for winter color.

SILVER BLUE. (J. S. communis). This is a semi-dwarf and spreading. The color is most unusual. A bright bluish-green shade. The branches are erect and spreading, with gracefully arching stems 2 to 3 feet high. An unusually handsome plant. 1 to 1½ feet, $4.50.

COMMUNIS. (Common Juniper). This is a variety we secured from Europe before the war and have had it ever since. It makes a tall erect plant, a shrub rather than a tree. The foliage is a very pleasing shade of green both summer and winter. It is a good plant for the small garden and is particularly effective in winter when covered with its dark blue glaucous fruit. 2½ to 3 feet, $5.00; 3 to 4 feet, $7.00; 4 to 5 feet, $9.50.

ROSTER RED CEDAR. This is a rare variety, semi-dwarf and spreading. The color is most unusual, a bright bluish-green shade. The branches are erect and spreading, with gracefully arching stems. 2 to 3 feet, $6.50; 3 to 4 feet, $8.50; 4 to 5 feet, $11.00; 5 to 6 feet, $14.00.

KOSTER RED CEDAR. This is a rare variety, semi-dwarf and spreading. The color is most unusual, a bright bluish-green shade. The branches are erect and spreading, with gracefully arching stems. 2 to 3 feet, $6.50; 3 to 4 feet, $8.50; 4 to 5 feet, $11.00; 5 to 6 feet, $14.00.

COMMUNIS. (Common Juniper). This is a variety we secured from Europe before the war and have had it ever since. It makes a tall erect plant, a shrub rather than a tree. The foliage is a very pleasing shade of green both summer and winter. It is a good plant for the small garden and is particularly effective in winter when covered with its dark blue glaucous fruit. 2½ to 3 feet, $5.00; 3 to 4 feet, $7.00; 4 to 5 feet, $9.50.

THE SUTHERLAND LANDSCAPE AND NURSERY COMPANY, BOULDER, COLORADO
PTITZER JUNIPER. One of the most striking
junipers, somewhat irregular in habit, with
branches spreading nearly horizontally, as broad
as tall, the feathery bluish-green foliage giving
the plant a very artistic and graceful appearance.
1 to 1 1/2 feet, $4.00; 1 1/2 to 2 feet, $6.50; 2 to 2
1/2 feet, $9.00; 2 1/2 to 3 feet, $11.00; 3 to 4 feet.
$15.00.

SABINA. (Savia Juniper). For planting with
shrubs and for base planting in front of porches,
this is without a rival. The foliage is dainty
and the form is quite picturesque. Seldom grows
over 3 feet in height and spreads out fan shape.
See illustration below.

This is the most beautiful of all the small junipers;
and we consider ourselves fortunate in hav¬
ing a good stock of it, as it is becoming very
scarce. Our prices are in line with those of any
first class nursery in the country, and if you fig¬
ure on the freight you would have to pay from
any eastern nursery they are much lower.
On small sizes freight from the "east" would run well
on to two dollars each and express very much
higher.

15 to 18 inches, $3.50; 1 1/2 to 2 feet, $6.50.
2 to 2 1/2 feet, $7.00; 2 1/2 to 3 feet, $10.00; 3 to 4 feet,
$12.50; 4 to 5 feet, $15.00.

SCOPULORUM. (Colorado Juniper). This is the "Cedar"
with the bright silvery foliage found in the west,
and is particularly well adapted for use
where a formal note is wanted in the garden. A
pair of them makes a seat between two trees and
presents a very distinct and graceful appearance.
The best known and most popular cedar in Colorado. Our stock is NOT
gathered from the mountains, but is nursery
grown from seedlings, the trees are well-shaped
specimens that have been several times sheared to
make them bushy and dense in texture. We no¬
tice one of the best-known eastern nurseries offer¬
ing 2 to 2 1/2 feet at $6.00, while our price for 3 to
3 1/2 feet is only $6.50.
3 to 3 1/2 feet, $6.50; 3 1/2 to 4 feet, $7.50; 4 to 5 feet,
$9.00; 5 to 6 feet, $12.00; 6 to 7 feet, $15.00;
7 to 8 feet, $18.00.

SILVER RED CEDAR. A form of cedar with
an intense blue-green foliage, the most intense
blue-green of any evergreen. It is a very suit¬
able grover, irregular in habit, lending a very pic¬
turesque effect to an evergreen planting. This is one of the best known
varieties of evergreens, 2 to 2 1/2 feet, $7.00; 2 1/2 to 3 feet, $9.00; 3 to 4 feet,
$10.00; 4 to 5 feet, $12.50; 5 to 6 feet, $14.00.

SPINEY GREEN JUNIPER. A small tree with a
very symmetrical conical outline foliage of a
metallic pea green of dense habit. Makes a good
accentuating a formal note in the garden scheme.
This is one of the best-known eastern nurseries offering
ten to twelve feet in height that has been there
one starting to go brown it is a sure sign that it
assumes a very pleasing shade of golden bronze.
Very handsome, and attractive when used
directions above and you can grow successfully
the varieties we offer.

THUJA—Arborvitaes

For the average garden, large or small, there are
no evergreens that are more delightful than the
Arborvitaes. They vary much in size, in form, in color and in texture of foliage that they
lend themselves to interesting and picturesque
combinations. It is simply impossible to take
depth pictures and get the better advantage than any other
class of plants. They are particularly useful in
accentuating a formal note in the garden scheme.
The general impression is that they are not hardy in Colorado; but this is a mistake, as you will
find them in the Fairmount Cemetery in Denver
to this day, 12 to 18 inches, $5.00; 18 to 24 inches,
$7.00.

TAMARIX SABIN JUNIPER. This is a dis¬
tinctively American variety of the Sabin, with foliage
of a delightful shade of grey-green. Although
it spreads over a considerable area it grows only
about a foot in height. For "foundation" plant¬
ings, edgings of evergreen plantings, for terraces,
etc., it is in a class by itself. 15 to 18 inch spread,
$4.50; 18 to 21 inch spread, $6.00; 21 to 24 inch
spread, $8.50; 2 to 4 foot spread, $12.50.

VIRGINIANA. (Red Cedar). This is the native
cedar of the east, similar to our native Colo¬
rado variety, but somewhat more spreading and
open in habit. The foliage is a delightful shade of
green in the summer, changing to plum and purple shades, making an effective con¬	rast when planted with other varieties.
3 to 4 feet, $5.00; 4 to 5 feet, $7.50; 5 to 6 feet, $10.00.

WAUKEGAN JUNIPER. A very distinct sort
of creeping habit. Grows close to the ground,
seldom exceeding 4 to 10 inches in height, but
spreads out quite a width. It attracts attention on account of its unusual color,
which is a soft blue in the spring, green in sum¬
mer, and turns to a rich, purple brown in the fall.
It is a splendid plant for "foundation" plantings,
for banks, terraces, 15 to 18 inches, $5.00; 18
to 21 inches, $6.50; 21 to 30 inches, $7.50.

For planting with

AMERICAN PYRAMIDAL. Pyramidal ever¬
greens are of great demand these days, for its
narrow and pyramidal form, deep rich green color
at all seasons, and each tree is uniform in habit,
so that "pairs" can readily be maintained. It is
one of the most hardy forms. 1 to 1 1/2 feet, $2.25;
1 1/2 to 2 feet, $3.25; 2 to 3 feet, $5.00; 3 to 4 feet,
$6.00.

ORIENTALIS. (Oriental Arborvitae). Dense
pyramidal tree, with fresh green foliage turning
a warm orange-brown in winter. 12 to 18 inches,
$5.00; 18 to 24 inches, $7.50; 24 to 30 inches,
$9.00.

DOUGLAS GOLDEN. A variety with foliage of
a bright green, the new foliage showing a golden
color. Very handsome, and attractive when used
as a color note with green evergreens. About 1 foot,
$2.25; 1 to 1 1/2 feet, $3.00; 1 1/2 to 2 feet, $4.00;
3 to 4 feet, $6.00.

A LITTLE GEM—BERKMAN'S GOLDEN
BERKMAN'S GOLDEN. This is perhaps the most
attractive of the dwarf forms of arborvitae. It
has a low compact shape, very broad, but col¬
umnar in general aspect. In early spring it is a bright golden yellow, color gradually changing
to lovely shades of bright green and in the winter
assumes a very pleasing shade of golden bronze.
We have used this for a number of years, and
though sometimes the foliage winter-killed, it
came out again in good shape in the summer.
We have found, however, that by sheltering it from

Sabin Juniper in One of Our Denver Gardens.
One of the Very Best Evergreens for
"Foundation" Plantings.
the west and north, and seeing that it was kept most of the time in a cooler, shaded location, it retained its natural globe shape. This is a gem for the small garden, 12 to 15 inches, $3.50; 15 to 18 inches, $4.00; 18 to 24 inches, $5.00.

WOODWARD. This is the best globe-shaped variety, as it retains its natural globe shape without stunting, even when it contains its full diameter of three feet. Very slow in growth and most useful for marking formal effects in gardens. Sujsted to the smallest garden 12x12 inches, $2.50; 15x15, $3.50; 18x18, $4.50; 24x24, $8.00.

For Canon City, Grand Junction and all towns in those districts all varieties of ARBOR-VITAE are especially at home, and no Evergreens are more beautiful.

PICEA—Spruce

These are the Spruces found in our Colorado Mountains, varying in color from deep green to bright blue-green. They are splendid subjects for use in parks and large grounds, and even in the city yards they have a place as they make a splendid background for a garden, and nothing is better for use as screens and hedges, as they make a fine show of color in winter when all our trees and shrubs are bare. Our stock is nursery grown, and frequently transplanted; and will not fail to grow.

PUNGENS. Our Colorado Green Spruce, and the best color to use when a group is wanted, or an evergreen hedge variety. 24 to 30 inches, $3.00; 30 to 36 inches, $4.00; 3 to 4 feet, $5.00; 4 to 5 feet, $6.00.

BLUE SPRUCE. This is the bright blue variety we see scattered through our mountains. It makes a splendid specimen for a large lawn, or small group. A variety of Picea, the Blue Spruces the brilliancy of the blue is intensified. 24 to 30 inches, $4.00; 30 to 36 inches, $5.00; 3 to 4 feet, $6.00; 4 to 5 feet, $8.00.

SPRUCE FOR BACKGROUNDS, Etc.

We have some Spruces that are not symmetrical enough for specimen trees, but are well adapted to planting for backgrounds, and screens, and these are offered at one-third off the price for regular stock.

KOSTER BLUE SPRUCE

These are the true Koster Blue Spruce, imported from Holland by us before the war. While they are not as brilliant, nor as symmetrical as the Colorado Blue Spruce, they are much better blues than the common Colorado Blue Spruce. We have before us a standard eastern type, and the finest Koster Blue Spruce we have ever seen, much more brilliant than the Koster. And it is not alone the new growth that is so brilliant in the Koster Blue Spruce, but the entire tree, from top to bottom, is the most intense blue that has ever been seen, much more brilliant than the Koster. Our evergreens are grown here in our nursery, and the stock is regular stock.

BRILLIANT BLUE SPRUCE

The Koster Blue Spruce has been considered the most brilliant in color of all the Spruces, and it is a rare blue color, much brighter than the ordinary Blue Spruce. We have, however, a few of the most intensely blue colored trees we have ever seen, much more brilliant than the Koster. And it is not alone the new growth that is so brilliant in the Koster Blue Spruce, but the entire tree, from top to bottom, is the most intense blue that can be imagined. Several eastern evergreen growers were told us that we should ask at least twenty-five dollars each for them, so the low prices at which we are offering them will appeal to you.

3 to 4 feet, $5.00; 4 to 5 feet, $6.00; 5 to 6 feet, $8.00; 6 to 8 feet, $10.00; 8 to 10 feet, $12.00.

PINUS—Pine

PONDEROSA SCOPOLIUM. (Rocky Mountain Yellow Pine). This is the best Pine for most purposes, particularly for a background. Has long needles of a brilliant deep green. It might well be planted in many of our city gardens, where its bright green, glossy foliage will give life to the picture during the dull winter months. 3 to 4 feet, $5.00; 4 to 5 feet, $6.00; 5 to 6 feet, $8.00; 6 to 8 feet, $10.00; 8 to 10 feet, $12.00.

MONTANA. (Swiss Mountain Pine). A beautiful dwarf tree, very hardy and suitable for small gardens. Very handsome bright green foliage winter and summer. 15 to 18 inches, $3.00; 18 to 24 inches, $3.50; 24 to 30 inches, $4.00; 30 to 36 inches, $6.00. Larger sizes priced by letter.

MONTANA HUGHUS. (Hughus Pine). This is the delightful little dwarf, cushion-like pine that is such a general favorite for formal gardens and "foundation" planting. The young foliage is of a brilliant green, and when the new growth opens in the spring, the plant looks as if it were filled with life. Suits the smallest garden and a gem wherever used. 12 to 15 inches, $4.00; 15 to 18 inches, $6.00; 18 to 24 inches, $8.00; 24 to 30 inches, $10.00. Larger sizes priced by letter.

A RARE DWARF PINE FOR ROCKERIES

JAPANESE TABLE PINE. This is most unique of all evergreens. Old trees develop a spread of 3 to 4 feet, but it seldom attains a height of over 2 feet. It is an attractive light green in color. It is small and unobtrusive, and grows so well in rockeries it is a most uncommon and striking novelty. 12 inches, $1.50.

TWO HUNDRED AND FIFTY EVERGREENS FOR ONE GARDEN

A few years ago we planted in the garden of Mr. Lafayette M. Hughes, Denver, over two hundred and fifty evergreens. Mr. Hughes has forty acres in his ornamental grounds. Mr. Hughes realizes the importance of evergreens, and in the second garden he has planned and planted for Mr. Hughes, and in the first one, a very much smaller proposition, we also used evergreens freely. The garden, large or small, should have evergreens.

THE QUESTION OF PRICE

Our prices will compare favorably with the prices of any first class nursery in the country. So far as our knowledge goes, there is no other such complete line of evergreens grown anywhere in Colorado. For the many varieties of Juniper, Arborvitae, etc., we offer, you would have to send "east," and delivery charges would frequently double the price of the plants, and while we do not pay delivery charges on evergreens, the short distance they have to travel should add very little to the price. Do not compare with evergreens gathered from the mountains. Only the common pine, spruce, and fir are found there; and what can be had are rarely good specimens. Difficult to handle, take many years to recover from being disturbed, and a very small percentage of them grow. I have seen spruces brought from the mountains that made no growth whatever for several years, while the Sutherland stock will go right along as if they had never been disturbed. Plant "Sutherland" sure-to-grow stock.

SUTHERLAND “MADE-IN-COLORADO” EVERGREENS

Our evergreens are grown here in our nursery, not collected in the mountains. Our stock is frequently transplanted, thus developing a compact root system so that we have no failures. The roots are saved, insuring the growth of the tree. Our soil is particularly adapted to the handling of evergreens, and we grow them with a firm ball of earth, and securely burlapped for shipping. The roots are NOT cut in digging; you can count on evergreen tree growing. We have them all over the country and have yet to hear of one failing to grow.

HOW TO LANDSCAPE YOUR GROUNDS WITH EVERGREENS.

A small, illustrated booklet, telling how to plant evergreens, and how to use them effectively. Free to our customers.
Sutherland Trees for Colorado and the Mid-West

PYRAMIDAL SILVER MAPLE. The foliage of this variety is similar to the well known soft maple. It is well adapted for use where a tree of a spreading character would be too broad. A very handsome tree, and one that has many distinctive uses. 5 to 6 feet, $1.50; 6 to 8 feet, $2.50; 8 to 10 feet, $3.50.

GINNALA. (Amur Maple). For the small garden, and for planting corners about the house where a tall effect is desired, there is nothing superior to the dainty little Maple. It never grows to be of any great size, can be kept down to the desired height, the foliage is almost as finely cut as a Japanese Maple, and in the fall turns to the most gorgeous shades of crimson and scarlet. 3 to 4 feet, $1.25; 5 to 6 feet, $1.75; 6 feet, $2.25.

A SPLENDID STREET TREE

PLATANOIDES. (Norway Maple). A large, handsome tree, with very large bright green leaves fading to yellow and gold in autumn, somewhat faster in growth than the Sugar Maple, makes a very symmetrical tree. 8 to 10 feet, $3.00; 10 to 12 feet, $3.75. Light stock, 6 to 8 feet, $1.75.

SACCHARUM. (Sugar Maple). A very handsome tree with bright foliage turning to gorgeous shades of scarlet, orange and yellow in autumn. Nothing better where a permanent tree is wanted. 6 to 8 feet, $3.00; 8 to 10 feet, $4.00; 10 to 12 feet, $5.00.

BLOODLEAF NORWAY MAPLE. When first opening the leaves of this tree are a bright blood-red, gradually turning to a plum-green. Makes a wonderful effect in the spring and early summer, and is an attractive tree at all times. 6 to 8 feet, $3.25; 8 to 10 feet, $4.25.

WEIR MAPLE. A Weeping Maple much on the order of the famous Cut Leaf Weeping Birch. The fall foliage is finely divided, and falls in large festoons, on the order of the Birch, has striking bright golden-yellow fall foliage. A very handsome tree, 6 to 8 feet, $2.00; 8 to 10 feet, $2.50.

SKINNER’S CUT LEAF WEEPING MAPLE. A beautiful Maple with fine fern-like foliage, almost as finely divided as the well known Cut Leaf Weeping Birch, and it has the same delightful weeping habit. A splendid tree for the lawn. Good sturdy tree, 6 to 8 feet, $2.50.

AILANTHUS—Ailanthus

GLANDULOSA. An attractive tree for the garden and for planting close to the house; makes a deep tap root that will not interfere with foundations. The foliage is much like the Sumac, but on a larger scale, has flowers in large panicles followed by fruit clusters that are often highly colored. Very ornamental. 5 to 6 feet, $1.25; 6 to 8 feet, $2.00.

BETULA—Birch

ALBA. (European White Birch). One of the most beautiful of our smaller trees, small bright green foliage, turning golden-yellow in autumn, and its white bark makes it a striking object in winter. Stock is scarce. 6 to 8 feet, $2.50; 8 to 10 feet, $3.50.

The Most Beautiful Tree

To many people the most beautiful tree is the Cut Leaf Weeping Birch, and it is a most lovely tree. It is strikingly beautiful at all seasons of the year. Of course you know it.

Cut Leaf Weeping Birch
it assumes a beautiful golden-yellow color. The most beautiful tree grown. The stock in this country is scarce, and is likely to be scarce for some years to come. It should be planted early in the season, and kept moist, and provided with a mulch of loose earth. In order to make this beautiful tree available to everyone we are pricing them at what would be termed "Popular Prices:" that is, our new prices will be popular with buyers. They are away below prices quoted formerly. You cannot now afford to go without this beautiful tree. Good strong trees, 5 to 6 feet, $3.00; 6 to 8 feet, $4.00; 8 to 10 feet, $6.00; 10 to 12 feet, $8.50.

Birches Dug With Ball of Earth

Do you want a Cut Leaf Birch that will go right along without any check, and with the chance of loss reduced to a minimum? We have a few select trees 8 to 10 feet in height for particular people.

These will be dug with a ball of earth, while dormant, and carefully tied with burlap so that the earth can not come loose from the roots—handled in the same careful way in which we handle our Evergreens. Although they come higher handled this way the satisfaction of knowing that they will be what you had hoped for will be worth more than the difference in cost. Each, packed ready for delivery, $15.00.

CELTRIS—Hackberry

OCCIDENTALIS. (Hackberry). A tree resembling the Elm, but with a rougher bark, and has brownish-black berries in the fall. Makes a good street tree, and affords a little variety from the common Elms and Maples. A fine tree, 8 to 10 feet, $2.75.

ELAEAGNUS—Elaeagnus

ANGUSTIFOLIA. (Russian Olive). A beautiful tree with silvery-grey foliage and picturesque habit, and a wonderful sweet perfume while in bloom. Does well under any conditions, will thrive in the driest soils. The most picturesque tree for gardens. 5 to 6 feet, $1.00; 6 to 8 feet, $1.50; 8 to 10 feet, $2.00.

FRAXINUS—Ash

AMERICANA. (White Ash). A tall tree with upright or spreading branches, forming a pyramidal or round-topped crown. Much used for street planting, good autumn effects in yellows. One of our most popular trees. 8 to 10 feet, $1.70.

LANCEOLATA. (Green Ash). A medium sized tree with handsome round head, slender branches and green twigs, and dark lustrous foliage. It makes a beautiful shade tree, and is especially adapted to regions where the rainfall is scant. It flourishes where many other trees would not live. 6 to 8 feet, $1.25; 8 to 10 feet, $2.25.

GLEDITSIA—Honeylocust

TRICANTHOS INERMIS. (Thornless Honey Locust). This is one of our most beautiful trees, graceful in habit, and a good tree for lawns, gardens, and general shade purposes. Very hardy and a splendid tree anywhere, particularly adapted to use on dry lands, as it succeeds with a mini-
mum of water. It has never been attacked by borers that have played such havoc with the Black Locust. See picture of Bolleana Poplar and Thornless Honeylocust, page 49. 6 to 8 feet, $1.25; 8 to 10 feet, $2.50; 10 to 12 feet, $3.25. We have some larger sizes, prices upon application.

JUGLANDS—Walnut

The Black Walnut makes a handsome tree, and so long as it is not planted where it will be the roots will be cut in, as under those conditions it suckers badly. A splendid tree where a tall background is desirable. 6 to 8 feet, $1.00; 8 to 10 feet, $1.50; 10 to 12 feet, $2.00.

PLANATUS—Planetree

AMERICAN PLANETREE. (American Planetree). A large tree of handsome outline, and large leaves resembling those of a maple. Although it is an unusually good tree for Colorado, it is seldom seen. There is a good specimen in front of the house of Mrs. Annie D. Morris, at 410 Marion Street, Denver. It is one of the most picturesque trees we have seen in Pueblo, and is well adapted to any purpose where a tall background is desirable. 6 to 8 feet, $1.00; 8 to 10 feet, $1.50; 10 to 12 feet, $2.00.

ALBA. (White Poplar). Sometimes called White or Silver Maple. A handsome, large tree with foliage resembling that of a maple, but white underneath like a Bolleana Poplar. Should not be planted in small sizes, as it makes a tap root that is difficult to dig without damage when it becomes upsize. In Boulder, and most places where we have seen it the Black Walnut bears good crops of fruits. 6 to 8 feet, $1.50.

BOLLEANA. The handsomest of the columnar sorts, the bark is a bright green, leaves light shining green white on the reverse side. Makes a handsome specimen, and is adapted to any purpose for which the Lombardy is used. See picture of Bolleana Poplar and Thornless Honeylocust on page 49. 6 to 8 feet, $1.50; 8 to 10 feet, $2.00; 10 to 12 feet, $3.00.

BOLTANIA. (Carolina Poplar). The favorite quick-growing Poplar, makes a large, somewhat spreading tree, and is recommended where quick results are desirable. Although common this is a handsome tree. 6 to 8 feet, $1.25; 8 to 10 feet, $1.75; 10 to 12 feet, $2.25.

HISPIDA. (Rose-Acacia). This makes a small tree, somewhat irregular in outline, with leaves resembling those of the Black Locust, and is a good tree for planting back of shrubbery. Has large racemes of bright rose-colored flowers in spring. Very showy. Tree form, $3.00. Extra large size, $5.00.

SALIX—Willow

AMERICAN PLANETREE. (American Planetree). One of the hardiest and best shade trees for Colorado. 8 to 10 feet, $1.50; 8 to 12 feet, $2.00.

GOLDEN WEEPING WILLOW. The best Weeping Willow, bright, attractive foliage and golden-yellow bark. A very handsome tree. 6 to 8 feet, $1.00; 8 to 10 feet, $1.50; 10 to 12 feet, $2.00.

ULMUS—Elm

AMERICAN ELm. (American Elm). One of the hardiest and best shade trees for Colorado. 8 to 10 feet, $1.50; 8 to 12 feet, $2.00.

CAMPSTRIAS. (English Elm). A splendid tree for lawns and parking, makes a large tree with a round-topped crown, foliage rich green, holding its color longer than any other species. 8 to 10 feet, $2.75.

A COTTONLESS COTTONWOOD

This is what you have been looking for, a fast growing tree, but without the cotton that makes the common cottonwood so objectionable. This is the fastest growing tree. 6 to 8 feet, $1.25; 8 to 10 feet, $1.50.

QUERCUS—Oak

Have you planted your Oak. Read the paragraph under Sutherland Trees for Colorado, on page 48. If you love your state and wish to help to beautify it plant at least one hard wood tree. Oaks are slow to start; don't be impatient.

OAKS. (Pin Oak). One of the finest of the Oaks, it is small, but has leaves, deeply lobed, and turns gorgeous colors in autumn. A most beautiful tree. 6 to 8 feet, $3.00.

OUR NEW MOLINE ELM

The Tree You Have Been Looking For

ROBINA—Locust

OAKS. (Pin Oak). A large and handsome tree. With a symmetrical round-topped crown; the leaves are larger than those of the Pin
This Is What You Have Been Looking For

All gardeners have been looking for a hardy tree with the columnar habit of the Lombardy Poplar, but somewhat larger and broader. We have this in our New Moline Elm.

OUR NEW MOLINE ELM

MOLINE ELM. This is a sport from the American Elm, has the same foliage and long lived habit of the Elm, but with the narrow, columnar form of the Lombardy Poplar. This is just the tree we have been looking for where a narrow-headed tree is needed. We cannot recommend our New Moline Elm too highly. 8 to 10 feet, $2.50; 1½ in. diameter, $3.50.

ANOTHER NEW ELM

OUR NEW VASE SHAPE ELM

VASE ELM. Another new Elm that also fills a long-felt want. The American Elm is one of the best shade trees for Colorado and the Middle West, but it is so irregular in habit, no two ever having just the same form, that it has not been altogether satisfactory for planting in parkings, etc. Our new Vase Elm is vase-like in form, just the outline needed for parkings; and the trees grow quite uniformly. This is the best tree to date for parkings; 6 to 8 feet, $2.50; 1¼ in. diameter, $3.00; 1½ in. diameter, $4.25.

THE NEW CHINESE ELM

This is claimed to be the fastest growing hard wood tree known. The claim is made for it that it will grow as fast as a Carolina Poplar— and that is going some. We have grown this tree for some years, and it IS a fast grower with us. We have also seen the claim made that it is free from pests and diseases. The claim would be altogether too much, however, for the most minute diseases of this class of trees there would be no room left for anything else in my catalogue. As a law we have to state we cannot be responsible for the small garden, and even a twenty-foot plot has room for the smallest garden or lawn specimen, for a larger note in the garden. 6 to 8 feet, $2.50.

Sutherland Flowering Trees

A group of trees that provide a magnificent show of flowers in the spring, have attractive foliage all summer, good fall color, and in addition most of them have attractive fruits for fall and winter color. No garden is complete without a few of them.

If you are a garden lover, and are not familiar with the many varieties of flowering trees adapted to our Colorado conditions, you are missing a great treat. If I attempted to go into the beauties of this class of trees there would be no room left for anything else in my catalogue. As a lay we know so little of our floral note in the trade than can be given by a shrub, use one of our flowering trees. With the exception of the Sorbus we have all the many hundreds of varieties of Hawthorn native to this country it would be very difficult to determine just what variety this is. It is so near like the Coccinoides, however, that you would be satisfied that you had the same variety. There are another one two-thirds.

If you are a garden lover, and are not familiar with the many varieties of flowering trees adapted to our Colorado conditions, you are missing a great treat. If I attempted to go into the beauties of this class of trees there would be no room left for anything else in my catalogue. As a lay we know so little of our floral note in the trade than can be given by a shrub, use one of our flowering trees. With the exception of the Sorbus we have all the many hundreds of varieties of Hawthorn native to this country it would be very difficult to determine just what variety this is. It is so near like the Coccinoides, however, that you would be satisfied that you had the same variety. There are another one two-thirds.

CRATAEGUS—Hawthorn

In many ways the Hawthorns are amongst the finest of our flowering trees, having many good features. They are attractive at all seasons, even in winter. They are attractive to birds as well as to people. As I write this, January 30, there is a Townsend Solitaire on a Washington Thorne in my garden eating the berries that have held over all winter; he has been there almost every day during the past three weeks. We have a large assortment of Hawthorns, one suitable for any purpose. Hawthorns should be closely pruned in plantings; cut off all small branches and shorten the larger one two-thirds.

DENVER'S MOST BEAUTIFUL FLOWERING TREE

The Hawthorn on the State Capitol grounds, near the Broadway side, is considered by many as Denver's most beautiful tree. There are so many hundreds of varieties of Hawthorn native to this country it would be very difficult to determine just what variety this is. It is so near like the Coccinoides, however, that you would be satisfied that you had the same variety. There are another one two-thirds.

MACRACANTHA. (Spike Hawthorn). Has attractive foliage, with good fall color, small but brilliant blood-red fruits, but the most striking feature is its many very long thorns which make it a most ornamental tree.
OXYCANTHA. (English Hawthorn). The celebrated May Thorn of the English gardens and hedges. It has small, attractive foliage, single white flowers, followed by brilliant red fruits not much larger than peas, retained on to the bare winter. A beautiful tree. 3 to 4 feet, $1.50; 4 to 5 feet, $2.00; 5 to 6 feet, $2.50; 6 to 7 feet, $3.00.

DOUBLE ENGLISH HAWTHORN. Has double white rose-like flowers that are retained for a considerable time. 3 to 4 feet, $2.50; 4 to 5 feet, $3.50; 5 to 6 feet, $4.50.

DOUBLE PINK ENGLISH HAWTHORN. Double, deep rose-pink flowers, a lovely tree. 4 to 5 feet, $1.50; 5 to 6 feet, $2.00.

PAULS DOUBLE SCARLET HAWTHORN. One of the showiest of the Hawthorns, has double carmine-pink flowers, borne in great profusion. 3 to 4 feet, $2.50; 4 to 5 feet, $3.00; 5 to 6 feet, $3.50; 6 to 7 feet, $4.00.

FRUNIFOLIA. This is a rare Hawthorn, a small, shrubby type, with lyrate leaves which turn brilliantly in autumn, and has bright red fruits. This is very fine for full effects. 2 to 3 feet, $1.00.

FRUINOSA. Another rare Hawthorn. The leaves are large, blue-green; the flowers are large, purplish, with rose-pink blushed tips, in which make a beautiful combination; the fall color is good. The fruits are large, bright scarlet and are held until late in the fall. One of the handsomest varieties. 18 to 24 inches, $2.00; 2 to 3 feet, $2.50; 3 to 4 feet, $3.00.

PRICE OF HAWTHORNS
Price of Hawthorns, except where noted, 3 to 4 feet, $1.75; 4 to 5 feet, $2.50; 5 to 6 feet, $3.50; 6 to 8 feet, $5.00.

Winter Color in the Garden
Most of us plan our gardens for spring, summer and fall effects. Not many of us think of the four months of December, January, February, March, when most gardens are altogether lacking in interest. A little thought along this line will give us a TWELVE MONTH GARDEN, one in which there is interest every day in the year. In our Evergreen Department I have called your attention to the winter possibilities of many beautiful class of plants; and now I wish to impress upon you the value of shrubs and trees with colored fruits. Many discriminating gardeners are now giving just as much thought to the berries and fruits as they formerly did to foliage and flowers. If you will stop to consider it, shrubs and trees that have attractive fruits also have attractive foliage and flowers, the fruits are a premium, extra value thrown in, for which you pay nothing, except, perhaps, just a little more use of your "gray matter." Another thought! Are you interested in the birds? Plan for them, also. They will eat any kind of fruit you will, and then some. Plant some fruiting trees and shrubs in your garden. Amongst the trees almost all the Prunus family have attractive fruits, the Hawthorns are unsurpassed, the Mountain Ash are remarkable crab on account of the flowers, leaves, and fruit all being red in color. A small, very showy tree. Scarce. See prices page 53.

MALUS—Apple, Flowering Crab
In many ways the Flowering Crabs are quite as attractive as the Hawthorns, in flower they are even more showy, having masses of single or double flowers in various shades of pink and red. Many of them have small ornamental fruits, and all have good foliage which assumes showy tones of red and yellow in autumn. They are all small trees, and no flowering trees make more beautiful objects for the garden and lawn.

ALDENHAM CRAB. This is a hybrid originated by Hon. Vicary Gibbs, of Aldenham, England. The branches are red with green leaves, followed by tiny fruits. Dwarf in habit. 3 to 4 feet, $2.00; 4 to 5 feet, $2.75.

DOLGO CRAB. This is a large growing tree, on the order of the Transcendent Crab. The flowers are a delightful shade of pink, and the fruits, which are borne very freely, are somewhat smaller than the Siberian Crab; fine for jellies, etc. The color is the most brilliant red of any fruit we have ever seen, and when the trees are hanging full of them they make a most gorgeous sight. Either as a fruit or a flowering tree this is in a class by itself. Good strong trees, each, $1.50.

FLORIBUNDA. (Japanese Flowering Crab). Makes a shrub or small tree with a symmetrical crown, foliage turns yellow in autumn, flowers rose-red, fragrant, and borne in great profusion, the fruits red, large enough for preserving, and makes most excellent jelly. 3 to 4 feet, $2.00.

HOPA. A new variety, only introduced in 1920, said to be a hybrid of Niedzwetzkyana. It makes a strong growth, the bark and foliage have a dark reddish tone, making it quite striking throughout the entire year. The flowers are rose colored, and are followed by brilliant red fruits, about the size of the Siberian Crab, and while the skin is somewhat bitter, protecting it from birds, the fruit does make most excellent jelly. It blooms while quite young. 4 to 5 feet, $2.00; 5 to 6 feet, $3.00.

You May Not Remember the Name But Will Never Forget the Tree
NIEDZWETZKYANA. (Redvein Crab). A remarkable crab on account of the flowers, leaves, branches and fruit all being red in color. A small, very showy tree. Scarce. See prices page 53.

Hawthorn—State Capitol Grounds
SCHIEDECKERI. (Scheideker Crab). The flowers are double and of great substance, bright rose, and are splendid for cutting as they last a long time in water. A dwarf, hardy, attractive tree. Prices of Flowering Crabs, except where noted, 3 to 4 feet, $1.50; 4 to 5 feet, $2.00; 5 to 6 feet, $3.00.

NEW LOW PRICES FOR FLOWERING CRABS

We believe that it is owing to the fact that the prices of Flowering Crabs have seemed high that these beautiful flowering trees have not been more generally planted. In order to popularize them we are quoting them at prices below any we have seen. At our new prices these trees should be found in EVERY garden.

TWO RARE VARIETIES OF FLOWERING CRABS

These two varieties, Sieboldi Calocarpa and Zuni, are raised from seed, not grafted, as are most of the Flowering Crabs. We have found these to be easily grown and more cold hardy than other varieties. They are handsome in foliage and flowers. On account of not having to graft them we are enabled to sell at a much lower price. Either variety, 2 to 3 feet, $1.00; 3 to 4 feet, $1.50.

SIEBOLDI CALOCARPA. One of the handsomest shrubs in the Arnold Arboretum, with masses of creamy-white fragrant flowers, foliage similar to the wild cherry, turning to deep reddish-purple, and the flowers are also red. Its rich color tones makes it invaluable in ornamental plantings. Each, $1.50; later trees, about 5 feet, $2.00.

ZUNI CRAB. Another splendid new variety with pink and white flowers, and bright scarlet fruit. Although the descriptions sound alike, they are dissimilar in flower and foliage, also in fruit.

PRUNUS—Plum, Cherry

Don't think of FEU-ONS, though even the lowly prune is now appearing in polite society. The Prunus family contains many of our most beautiful flowering trees and shrubs. All of them have beautiful flowers, most have splendid fall foliage, and many have ornamental fruits, quite a few have edible fruits of good quality. The birds will enjoy them, even the ones you do not care for.

CASTENIA. A dwarf Purple Leaf Plum. The foliage is a rich reddish-purple, and the flowers and fruit are also red. Its rich color tones makes it invaluable in ornamental plantings. Each, $1.50; later trees, about 5 feet, $2.00.

PADUS. (European Bird Cherry). A small tree with foliage similar to the wild cherry, turning to gorgeous shades of orange in the fall, and in spring it has masses of creamy-white fragrant flowers, followed by berries similar to the chokecherry. A very attractive little tree. 8 to 10 feet, $2.50.

PURPLE LEAF PLUM. A handsome small tree with purple foliage, retaining its color throughout the summer. In spring the blush-pink flowers are borne in great profusion. Rare and beautiful. Plant where it will be sheltered from the west. Good strong stock. Each, $1.50; Dozen, $15.00.

NEWPORT. Another variety with purple foliage and as it originated in Minnesota, at the Minnesota Fruit Breeding Farm, it is of undoubtedly hardiness. It has medium sized fruits, rare and of good quality, and are very attractive on the tree. An unusual fine purple leaf tree. 3 to 4 feet, $1.65; 4 to 5 feet, $2.00.

TRILoba. (Flowering Plum). A most attractive small tree, suitable for the garden, or as a lawn specimen. It makes a shapely tree and has quantities of double, deep rose-pink flowers in early spring. These are usually grafted on Peach root stock. Being a plum, the only kind we have found hardy in Colorado. Fine little trees, 3 to 4 feet in height, $2.00.

WHY NOT A GOOD PLUM TREE?

Why not a good Plum tree in your garden? It is just as ornamental as any other tree. In spring it is literally smothered under a cloud of sweetly fragrant white flowers, the habit of the tree is good, it is hardy, the foliage is attractive, and the autumn colors beautiful, it is not too large for the smallest garden,—and in addition, you have the fruit. Can you find a combination of so many good qualities in any other one tree?

WANETA. This is the best of the hardy American hybrid plums, originated by Prof. Hansen of the South Dakota Experimental Station. Prof. Hansen says it is his BEST. The tree is absolutely hardy, prolific, and handsome. The fruit is deep red and about two inches in diameter. The flavor is delicious. Here you have the combination of a lovely flowering tree, and splendid fruit, either for eating or canning. Bears when very young. A tree that should be in every garden. 4 feet, $1.25; 4½ to 6 feet, $1.50.

MAYDAY TREE

This is a variety of Prunus Padus, but more profuse in bloom. It is one of the most delightful small trees we know of. The spring foliage is very dainty, carrying shades of red, etc., and in May it is a mass of fragrant white blossoms on the order of the chokecherry. The fruits make good jelly, etc., 5 to 6 feet, $2.00; 6 to 8 feet, $2.50; 8 to 10 feet, $3.50.

SORBUS—Mountain-Ash

AUCUPARIA. (European Mountain-Ash). A small and most attractive tree, suitable for a lawn specimen; the leaves are compound, like an elm, but much smaller, and turn beautifully in the fall. In spring it has large heads of white flowers, followed by brilliant red fruits. 5 to 6 feet, $1.50; 6 to 8 feet, $2.00.

Dozen Rate on Trees

12 trees of one sort for ten times the single price.

Bechtels Crab in All Its Spring Glory

This makes a wonderful effect when planted in a large angle of the house. Equally good as a lawn ornament, as it is symmetrical in outline.
Fruit for the Home Garden

HOME GARDEN FRUITS

While we do not grow fruit to any great extent, we find that many of our customers want a few fruit trees for the home garden; so we are carrying just a small line of the choicest varieties; and only such varieties as we know from experience can be depended upon to succeed in this region. All the trees offered are large stock that will be satisfactory in every way, the largest size that can be depended upon for results.

APPLES

To allow for full development apples should be set twenty-five feet apart. They are too large for the average back yard, unless planted close to some building, so that they only grow out to one side. Used this way they are very attractive; and nothing is more beautiful than one of our Siberian Crab Apples in full bloom. Apples may be trained against a fence or wall; and are very effective trained in this manner. Only two branches should be left on each side, and these should be tied into place, and not allowed to vary from the direction in which you wish them to go. Of course, all shoots from the back and front of the tree should be cut off as soon as they appear. You can have a lot of fun training an apple tree this way. The effect is delightful; and the fruit is unusually good. Try one, if only for the sake of the fun of it. Do not overlook our Flowering Crab Trees on page 52. Fruit trees are all grafted, and should be trained with the graft two to three inches below the surface of the ground.

DELICIOUS. Considered the choicest apple grown.

RED JUNE. The best real early apple, bright red, of delicious flavor.

WEALTHY. A large fall apple of fine flavor, good for eating or cooking.

YELLOW TRANSPARENT. A splendid summer apple, ripening in August, delicious flavor. The best variety to can as apple sauce for winter.

RED SIBERIAN CRAB. The small red crab so well known, best for jelly.

JONATHAN. This is a brilliant red winter apple of the best quality, and what we consider the best variety for this section. Extra strong trees, Each, $1.00; Dozen, $10.00.

CHERRIES

The cherry is one of the best fruit trees for the small garden, as it takes up but little room. Even when full grown it may be kept within a space six to eight feet square. They are very ornamental, as the outline of the tree is symmetrical; and when in bloom they are as attractive as any flowering tree—and the fruit you have extra. Cherries bear when very small; I have picked a quart from a tree not four feet high. They seldom miss a year. They can be grown in shrub form, and kept down to a height of about six feet. See what a handsome specimen for your garden the one in our picture would make.

ENGLISH MORELLO. A large dark red cherry of fine flavor.

EARLY RICHMOND. The earliest variety, fine for pies.

LARGE MONTMORENCY. Large, red, productive, one of the best.

DELAWARE. This is a large black cherry, a good producer, and of a rich, sweet flavor.

Extra large, well-branched trees, Each, $1.00; Dozen, $10.00.

THE DOUGLAS PEAR

Pears are seldom found in Colorado gardens, owing to the fact that they are subject to blight. In the Douglas Pear we have one that has never blighted with us, and the introducer claims that it is "blight proof." It bears when very young, sometimes the first year after planting. The fruit is delicious. This is THE pear for the home garden. Extra large, strong trees, Each $2.50; 4 foot trees, regular grade, Each, $1.50.

PLUMS

Plums are also well adapted for use with ornamental shrubs, and trees; we use them a great deal in our gardens. They are small trees, not becoming too large for the home garden; and few trees have as many good qualities. They are picturesque in outline, the foliage is always attractive, and turns to splendid shades of orange and yellow in the fall. When in bloom nothing could be more attractive; and the blossoms have a delightful perfume. They bear freely and there is seldom an "off year." Read about our new Plum Waneta, on page 53. It is THE best plum for the home garden.

BRADSHAW. Large, early, dark violet-red, juicy and good.

GERMAN PRUNE. Large blue, juicy, rich, fine flavor.

IMPERIAL GAGE. Large pale green, sweet and juicy, excellent.

RUMBARD. Medium size, violet-red, hardy, juicy and good.

GOOD strong trees, Each, $1.00; Dozen, $10.00.

COMPASS CHERBRY-PLUM. This makes a delightful little ornamental tree for the garden. The fruits are small and round, much like a cherry in appearance, bright red, makes a brilliant show on the tree, and are very fine for jams and jellies. Extra strong trees, Each, $1.00; Dozen, $10.00.

WANETA. This is one of the finest plums for this section. You will find a description of it in the Tree Department, on page 53. It is THE best plum for the home garden. Extra strong trees, Each, $1.50; Dozen, $12.00.

GRAPES

Almost any section in Colorado outside the mountains can raise grapes. If you never had one bunch of fruit from them, grapes are well worth growing in the home garden, as they are the most decorative of all vines. No other vine has as beautiful foliage; and for use on pergolas, trellises, arches, etc., they cannot be surpassed. You will find the grapes listed on page 53. Do not overlook the Beta Grape; it will bear where no other grape is hardy.

ENGLISHimorelo. A large dark red cherry of fine flavor.

IN RICHMOND. The earliest variety, fine for pies.

LARGE MONTMORENCY. Large, red, productive, one of the best.

DELAWARE. This is a large black cherry, a good producer, and of a rich, sweet flavor.

Extra large, well-branched trees, Each, $1.00; Dozen, $10.00.
BERRIES

Some of our ornamental shrubs have unusually good berries for eating, raw, or cooked. Most people know nothing about these. Amelanchier has large juicy berries in August; they are delicious. Ribes berries make good pies and jams, as do also Elder berries. We have occasionally had some delicious fruit from the Japanese Quince. The Literary Digest recently gave a recipe for making lemonade from the berries of the Sumac.

NUTS

For years our customers have been asking if they could not grow some variety of nuts in their gardens. We have been offering one in our shrub department, but no one appears to have noticed it, apparently on account of the name—CORYLUS. This makes a handsome shrub, the foliage is good, and the form attractive; and it bears quantities of edible nuts of good flavor. We had quantities of them last fall.

Good strong plants, bushy. Each, $1.00; Dozen, $10.00. Large clumps that have fruited. Each, $2.50; Dozen, $24.00.

See Black Walnut on page 50. This tree does well in Colorado, and bears crops of good quality nuts.

CURRANTS

LARGE RED CHERRY CURRANT. This is the best of the large Red Cherry Currants, productive and of good quality. Each, 35c; Dozen, $3.50.

WILD CURRANTS. These are ornamental shrubs that also have good fruit, see "Ribes," page 40. Shrub Department.

RASPBERRIES

BOLERO. A new everbearing raspberry that has proved very successful in this district. It is a true everbearer, having good quantities of fruit of the best possible flavor from the last of June until heavy freezes. We usually have good fruit until about the second week in November, sometimes even later. We have never covered our stock; and while this might be necessary in some districts to insure the June fruit, it would not be necessary for the late summer and fall crops. Each, 25c; Three, 50c; Dozen, $1.00.

RHUBARB

Many home gardens want a few plants of Rhubarb, Pie Plant; Linneus. the variety we offer, has large stalks of a bright red color and good flavor. Dozen, $1.00; Three, 50c; One, 35c.

LUCK IN GARDENING

Do you have good luck in gardening? Some folks don't. People have told me about the "splendid luck" some friend has in gardening; everything the friend plants grows. Personally they don't have much luck.

Jock McTavish and two English friends went out on a fishing trip, and it was agreed that the first man who caught a fish was to pay for their dinners. Jock was known to be the best fisherman thereabouts and his friends were joshing him about his having to pay for the three dinners.

"'An', d'ye ken," said Jock, in speaking of it afterward, "baith 'o them had a guid bite, an' wuss sae mean they wadna' pu' in." "Then you lost?" asked the listener. "Oh, no. I didna' pit ony bait on my hook."

Jock didn't have good luck.

WE ARE MAKING YOU A PRESENT

We are making you a present of over twenty pages in our new catalogue. We have added twenty-four pages this year just to tell you how to have "good luck" in planting. Some of these pages will be given over to helpful talks on planting,—no selling talk; and throughout the catalogue we have used up a lot more space in giving you all the information about the various plants we think will be helpful. We have told, so far as we know them, the bad points of a plant as well as its good points. If you do not have "good luck" with the
plants you buy from us it will be because you “didna’ pit bait on your hook.” If you think this is not a present of some value, ask any printer with twenty additional pages of a catalogue like this costs.

THIS IS A BOOK OF “Short Stories”

Make this your “short story” book. Pick it up whenever you have a few minutes to spare; read a paragraph, you will find something interesting on every page. You will find lots of “go to bed” stories here, and it is not prostitution. Of course, a catalogue writer is an optimist. Someone says an optimist “is the man who thought the husband was the head of the house.” But an optimist is sometimes right and you will be an optimist about gardening if you “pit some bait on your hook.” I am going to tell you about the “bait” needed for good luck in gardening.

COMING DOWN TO FACTS

Coming down to facts, there are some things that you must know and do if you are to be successful in gardening, and I shall try to tell these as simply and as briefly as possible. Whether you are to have success (good luck) in your gardening, or failure (bad luck) depends upon yourself, so here goes for the essentials for “good luck.”

FIVE ESSENTIALS

The five essentials for success in gardening are: Nourishing soil. Proper planting. Sun. Water. Cultivation. Two per cent of the plant’s substance comes from the soil, the other ninety-eight per cent from moisture and the air. A soil containing the proper food in sufficient quantity will provide the two per cent, same watering, and a “place in the sun” will supply the remaining ninety-eight per cent. A favorable location will insure the light and warmth of the sun, and cultivating the soil will let in air.

“FIRST CATCH YOUR HARE”

This is an old adage. I was going to say, “first buy your ‘bait’” but I believe that figuring for the reception of the plants is even more important. The ground should be ready when they arrive. Of course it is a good plan to study our GARDEN HANDBOOK carefully, and select and order the plants you want for spring; sometimes late ordering means disappointment—certain plants are all sold. Place your order early, then—get busy.

WHAT IS GOOD SOIL?

A good soil is one that contains plenty of plant food, and is of such texture that the plant roots can readily penetrate it, and assimilate the food contained in it; and it should also be of such a character as to be fairly retentive of moisture. A soil that is almost pure clay contains many of the elements necessary to plant growth; if such a soil cannot be successfully worked when wet, and when dry it will bake and harden so that neither water, air and the roots; deep cultivation may disturb shallow rooted plants. For shrubs and trees a deeper cultivation is desirable. Go over the beds about once a week.

WINTER PROTECTION

Flower beds are benefitted by a winter protection of rotted manure, preferably that containing lime. If the bed is not covered, it should be dug up and left exposed to the air, and the roots are protected by the earth which is removed. In the spring, a good covering of leaf mold will let in air.

THE ACTUAL PREPARATION

First, stake out the shrub and flower beds; then prepare for some real work. The beds should be dug to a depth of at least fifteen inches; the deeper it is trenched the better. If the garden is large, it will be made more thorough if you first dig in chunks and throw to one side, dig out the next spadeful; this is your best soil, and should be put to one side and saved for the surface. Dig out yet another layer and the soil, so that with two spades depth in digging should give you the necessary fifteen inches. Break up the sod, and place it face down in the bottom of the trench; this will rot and form ideal soil. Throw back some of the bottom soil that has been removed, cover with well rotted manure, cow manure, preferably—it must be old and thoroughly rotted—mix this in by spading. Then fill another spadeful of soil, cover with manure and mix as before, and so on until the bed is filled up. Be sure and keep the best soil for the surface. Soak the beds with water, and let them settle the better. In a heavy soil it may be found necessary to dispose of some of the earth removed, or the beds may be too high; they should not stand higher than the surrounding grass. If any soil is removed, be sure that it is the subsoil, never that taken from near the surface. A wheelbarrow load of manure to every two square yards is ample.

CULTIVATION

The soil must be cultivated to keep it open, so that water, air and plant food can penetrate it, and thus effect the chemical changes necessary to put the food in condition to be absorbed by the roots. Of course, all weeds should be kept out, as they absorb moisture, and also use up plant food. The ground should be trenched to a depth of about two inches amongst perennial plants; deep cultivation may disturb shallow rooted plants. For shrubs and trees a deeper cultivation is desirable. Go over the beds about once a week.

HUMUS

Humus is very necessary. Many lawns and gardens are built on earth that has been removed from the cellar excavation. It contains no humus, and is dead and lifeless. It should be turned into a good soil by the addition of lime and fertilizer. A sandy loam is the best soil. It consists of a combination of clay, sand, and decayed vegetable matter, leaf mold and manure.

HOW TO MAKE A GOOD SOIL

If you are not fortunate enough to possess the ideal garden soil, you can make a good soil. If your soil is clayey, it must be broken up and well dug over, and sand and manure added. A little of our Holland Peat will make the soil more porous. Where a sufficient amount of vegetable matter is put the food in the soil in condition to be absorbed, and thus effect the chemical changes necessary to put the food in condition to be absorbed by the roots. Of course, all weeds should be kept out, as they absorb moisture, and also use up plant food. The ground should be trenched to a depth of about two inches amongst perennial plants; deep cultivation may disturb shallow rooted plants. For shrubs and trees a deeper cultivation is desirable. Go over the beds about once a week.
FEEDING PLANTS

Perennial plants, like all other plants, require food, and even a bed that has been properly prepared will not last indefinitely. If you wish to keep your garden right up to the mark work in some fertilizer each spring. A fork full of stable manure—well rotted—should be worked into the surface soil around each clump, or if bone-meal or other commercial fertilizer is used, work in at the rate of a handful about the clump every year, for two or four or five years. During blooming season use Vigoro every few weeks, just a light sprinkling, if you wish to have luxurious growth.

THE GUARANTEE ON PLANTS

Some people have a peculiar idea as to what they are entitled to in the matter of a guarantee on plants sold them by a nursery. If the plants do not grow they think the nurseryman should replace them—FREE OF CHARGE. Do you buy flour this way? Does the grocer who guarantees it, who will you get good results—The Sutherland Landscape and Nursery Company, Boulder, Colorado.

WHY WE USE BOTANICAL NAMES?

You should know this. Do not overlook it—it is important.

To make buying easy, and to insure customers getting what they think they are buying an American Committee of Horticultural Nomenclature has just published a book giving the new approved STANDARD SCIENTIFIC and approved STANDARD COMMON name of every plant in American commerce. The names used in our catalogue are taken from that book, and may be accepted as the correct names both scientific and common, of all plants offered. To illustrate:—on page 10 you will find:

ACHILLEA—YARROW

A robust growing plant, suitable for growing amongst shrubs but should not be used as a ground cover. (This is the description of Achillea, as a class).

"The Pearl. Large sprays, etc." (Description of Achillea, the Pearl).

"Perry's White. A choice variety, etc." (Description of Achillea, Perry's White).

"Achillea" is the scientific, or botanical, name of the group. "Yarrow" is the common name of the group.

Achillea, the Pearl, is the name of one particular variety of Achillea. Your order would read:

6 Achillea. The Pearl. $1.00.
The Sutherland Landscape and Nursery Company, Boulder, Colorado

**Common Names Are Deceptive.** If you buy by a "Common Name" you have no assurance that you will get what you expect. One plant may be known by a dozen different "Common Names," and the name you know it by may not mean anything to the person from whom you buy. On the other hand, the same "Common Name" may be applied to a dozen different plants. We rewrote practically the whole of our catalogue so that we might have the correct Botanical Name of each plant; and the correct Common Name. This was a big job; but it was done to insure your knowing exactly what you are buying. Correct names and correct descriptions are given in our catalogue. You know what you are getting when you buy from us.

Our Descriptions Of Plants Are As Truthful As We know How To Make Them And The Plants Are True To Name.

**Protect Your Investment**

You are investing your money in flowers, and it is a GOOD investment; protect this investment by learning how to properly plant and care for them. You will find the necessary directions on pages 55 to 58.

**Some Useful Books For The Amateur Gardener**

See Novelties, etc., page 8.

What Customers Think of Our Plants

If you want to know what you may expect from Sutherland Quality Stock read these testimonials. We have all the original letters on file.

Eaton, Colorado.

I have gone over the shrubs and trees you planted last spring, and do not find over a dozen dead in close to thirteen hundred planted, which is a real record.

Yours truly,

Bruce G. Eaton.

Big Horn Hot Springs State Reserve, Thermopolis, Wyoming.

Regarding the nursery stock that we bought of you last spring for our new park: We are well pleased, every item was up to specification, and better yet, every one grew, which I consider a splendid record when we take into consideration that there was over a thousand items in the order.

Yours very truly,

J. F. Divine, Superintendent.

Greeley, Colorado.

Yesterday I wrote you that one of the varieties of Iris were omitted from the shipment which I received last week. After mailing this letter I received this specimen of Iris by mail, which finished filling the order which I gave you some time ago. All plants were received in excellent condition and are growing nicely.

Very truly yours,

Associate County Horticulturist.

Grand Junction, Colorado.

We want to thank you for the plants we received last week. We have ordered plants, shrubs, and bulbs from many different nurseries and seed houses, but have never received better plants and bulbs than those we received from you. They were packed so they reached us in perfect condition.

Orlando Phillips.

Denver, Colorado.

Only one of the thirty-four shrubs which you sent us has failed to grow, and considering the unfavorable weather conditions this spring, I think that is an unusually fine record.

Mary A. Montrose.

Walsenburg, Colorado.

Your catalog was very helpful in planting the shrubs and vines in this order, as well as replanting other things. For instance, I observed your directions for planting peonies, and got results from a pink peony that hadn't bloomed for six years.

Very sincerely,

Mrs. John W. Nicol.

Greeley, Colorado.

Simply a line to let you know the Staghorn Sumac, as well as all the other shrubs you sent us, are doing very nicely. I wrote you a month ago that the Sumac did not look as though it would make it, but since then it has come out beautifully.

Very truly yours,

H. H. Croll.

Cimarron, Kansas.

The two Blue Spruce trees came, Saturday, in perfect condition.

Albert Bowling.

Haxtun, Colorado.

Dear Sir:

In regard to my trees and shrubbery, everything is doing fine, were pleased with size and condition of everything.

Mrs. F. A. Alcorn.

Colbran, Colorado.

I received small order of fruit trees some time ago, and they were very satisfactory.

Very true.

S. D. Lieurance.

Red Cloud, Nebraska.

Gentlemen:

The plants I ordered came yesterday and I have them planted. I was sure pleased with them. I do not know how they can help but grow, as they are all so healthy looking.

A. U. Kaley.

Gypsum, Colorado.

I had fine success with the Phlox I ordered from your firm last spring.

Very truly yours,

Mrs. A. P. Henderson.

CUSTOMERS IN ALL LARGE TOWNS OF THE STATE
The above list is taken from some of our larger plantings in Denver and other towns of Colorado; but we have customers in all the larger towns of the state. "SUTHERLAND QUALITY STOCK" sold in the following states: Colorado, Iowa, Illinois, Kansas, Nebraska, New York, New Mexico, Nevada, Utah, Oregon, Texas, Virginia, Wyoming. All these states have nurseries—many of them—but customers from all over tell us that our stock is of the finest quality, true to name, and our prices right. OUR POLICY: "Your money back if you are not satisfied."

PLAN YOUR GARDEN
If you wish to have a BEAUTIFUL GARDEN let us plan one for you. The cost is moderate and you will save more than the cost of the plan in the waste avoided. Send us a few Kodak pictures of your house and lot, showing the various objects surrounding it and we will be glad to suggest the kind of plan you should have and its cost.

The plan may be carried out at one time, or developed over a series of years.
